I. Report to Shareholders

Dear Sir/Madam,

I hereby represent our management team in thanking you for your participation and long-term support. With the effects of COVID-19 and its continuous mutations since 2020, the increasing number of confirmed cases has resulted in sluggish global economics, as well as rising material costs and freights eroding the Company's profits. Despite these many challenges, the management team has made progress with the turnover and profit performance in 2021, when compared to the previous year, through new businesses promotion, cost control, and improvement of production efficiency. In addition to continuously seeking new clients and orders for new products, the management team is also aggressively engaging in transformation to the advantageous field of exited production and bringing new operational force by integrating group products for continuous profit growth and to meet the expectations of shareholders.

I. 2021 Operation Results

(I) Operation Guidelines and Implementation Status

The results of new product arrangement in terms of metal stamping were gradually developed in 2021. With of the advancement of automobile electronic and heat spreader businesses, the non-hard drive businesses have grown significantly and also reduced the operational risks from concentration to single product. Although the production costs have increased due to the rising price of materials, the impact to profit has decreased thanks to process improvement and efficiency enhancement. With the efforts of the management team, the precision metal stamping businesses have shown a turn from loss to profit and is expected to subsequently provide stable profits. The turnover of automatic equipment businesses was better than past years, following the gradually relieved pandemic situation in China and the growing demand of automatic equipment, as well as entering the automatic medical equipment market. As for the medical plastic business, the demand of end customers has slowed down due to the effects of COVID-19 and the turnover thus recessed a little bit compared to performance in past years.

Overall, following the lead of precision metal stamping businesses, the operating income grew from NT\$114,070 thousands in 2021 to NT\$130,000 thousands in 2021, and the profitability was also increased compared to the previous year.

| Item | 2021 | 2020 |
|------------------------|-----------|-----------|
| Operating Revenue | 2,167,903 | 1,921,700 |
| Operating Gross Profit | 459,964 | 435,427 |
| Operating profit/loss | 130,000 | 114,066 |

(II) Implementation achievements of the operating plan

| Non-Operating Income and Expenses | -15,046 | -60,602 |
|-----------------------------------|---------|---------|
| Net income | 89,217 | 29,987 |

(III) Analysis of profitability

| Ite | em | 2021 | 2020 |
|---------------------------|------------------|--------|--------|
| Return on asset (%) | | 3.13% | 1.42% |
| Return on equity (%) | | 5.23% | 1.76% |
| $\mathbf{D}_{\mathbf{r}}$ | Operating Income | 16.88% | 14.81% |
| Paid-in capital (%) | Pre-tax Profit | 14.93% | 6.94% |
| Profit ratio (%) | | 4.12% | 1.56% |
| Earnings per share (N | T\$) | 1.16 | 0.39 |

(IV) Research and Development

The new plant and equipment for precision metal stamping businesses have been completed successively and contributed to the production and development of 2021. In addition to improving the ability to process different metal materials and thick products, the cutting quality and precision technology were also improved. Meanwhile, an additional lab line was created for surface processing technology to carry out simulated manufacturing aimed at customers' different surface processing demands. Accordingly, the development schedule was shortened, while the products were diversified. The medical plastic businesses had successively acquired product patents, and the clinical trial was launched in 2021. It is expected to apply for patents with different countries to establish technological threshold and ability and seize early opportunities for products. Furthermore, the automation businesses also successfully branched out into the research and sales of automatic medical equipment, which represents one big step in the application of automation businesses.

For our three major businesses, we will assess the market direction and customer needs based on our core technology and cooperate with domestic academic units and associate suppliers for mutual development to find niche markets, continuously creating leading positions and more benefits for shareholders.

II. 2022 Business Plan Overview

- (I) Operation guidelines
 - Precision metal stamping: New stamping and surface processing equipment will be used this year to correspond with more diversified materials and different thicknesses of products and to improve different surface processing technologies. Through integrated production, we hope to satisfy the one-stop demand of

customers and improve the yield rate while reducing loss through enhanced efficiency to increase the profitability of the Company.

- 2. Medical consumables: In addition to providing stable profits to the Company, we will develop non-medical plastic products this year with the expectation of bringing new operational force to the Company.
- 3. Automatic equipment: We successfully entered the automatic medical equipment industry last year, and we will continuously cultivate the local medical automation market in China through successful cooperation experiences with big medical manufacturers.
- (II) Expected sales volume and basis of calculation and important production and sales policies
 - 1. Precision metal stamping: Hard drive products are directed to high storage capacity, along with the increasing demand of cloud data centers for big data and storage. The Company will deeply cultivate our major customers and be dedicated to improving production and processes, aiming at high-end hard drive products to increase both the capacity and sales volume. As for non-hard drive products, automobile electronics will be increased along with the sales of new energy vehicles. On the other hand, heat spreading products are expected to be the major driving force for the growth of precision metal stamping businesses this year.
 - 2. Medical consumables: Following the slowdown of COVID-19, the demand for medical consumables will gradually grow and achieve past standards. We are devoted to new products and patent development based on core technology in the medical consumable industry to expand the field of non-medical plastic products.
 - **3.** Automatic equipment: The Company mainly produces customized equipment for consumer electronic products. After the pandemic period, all countries will be trying to revitalize their economy, and the demand of the consumer market will increase accordingly. Manufacturers are expected to purchase equipment to expand their production arrangement and will lead the growth of automation businesses.

III. Future Development Strategies of the Company

The Company will improve product efficiency and optimize processes based on current core technology to increase company profits even during low-profit times. Meanwhile, we will continuously invest in new equipment and cooperate with academic and professional units to reinforce our capacity and research ability. We will also satisfy the needs of customers by integrating extended products of the group to explore the opportunities of new businesses. In addition, we are paying attention to sustainable development and issues regarding all stakeholders to achieve social benefits and a sustainable environment while pursuing the interests of the Company.

IV. Impact of external competition environment, legal environment, and macro operation environment

With increasing uncertainty from such macroeconomic changes as an unstable pandemic situation, shortage of materials, labor and rising labor costs, and exchange fluctuations causing increased production costs to impact profit, the Company will conduct risk evaluation aimed at the aforementioned adverse factors and take all prior response measures to reduce impact to the Company.

Although the economy is gradually recovering, 2022 will still be a challenging year. The management team will continuously invest in resources and new product development by integrating the resources of its three major businesses and technology enhancement to increase industrial competitiveness and create new sales opportunities. It is expected to develop the best interest and create value of shareholders, as expected.

Finally, I hereby speak for the Board of Directors, the management team, and all employees to thank you for your trust and support and wish you all health and happiness.

Chairman: Chia, Kin-Heng

II. Company Description

2.1 Date of Incorporation: January 18, 2001

2.2 Corporate History:

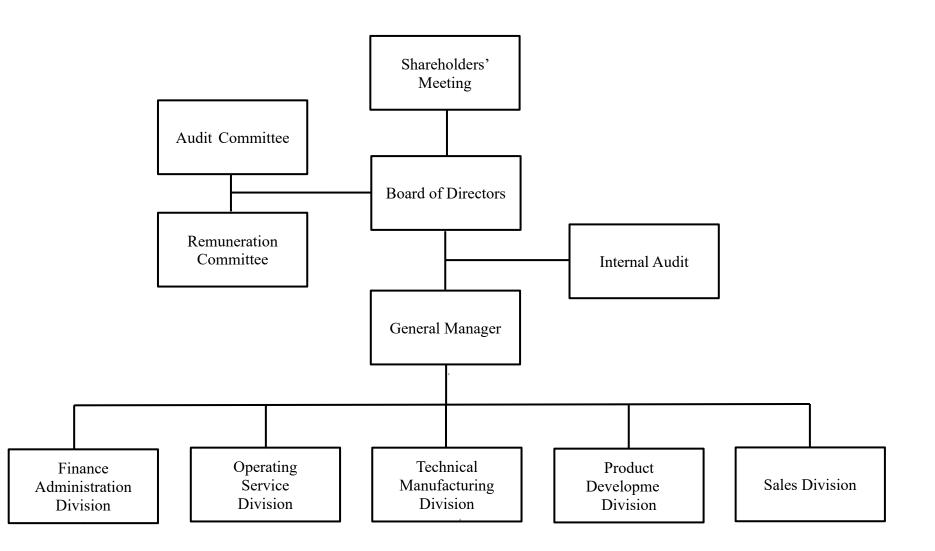

| Year | Important Matters |
|------------|--|
| Jan. 2001 | The company was duly incorporated. It was originally named Min En Color Plating Co., Ltd. Its address was No. 5, Jingjian 4 th Road, Guanyin Industrial Park, Guanyin District, Taoyuan County. The registered capital was NT\$120 million, and the paid- in capital, NT\$60 million. The company engaged in business of was surface treatment. |
| Sep. 2001 | The capital was increased by NT\$80 million. The paid-in capital was increased to NT\$140 million. |
| Jul. 2003 | Capital was increased by NT\$140 million in cash. The paid-in capital was increased to NT\$280 million. Min En Color Plating Co., Ltd. was renamed as Min Aik Precision Industrial Co., Ltd. For business expansion, more business items were included. The company was moved to No. 2, Guorui Road, Guanyin Industrial Park, Guanyin District, Taoyuan City. |
| Apr. 2004 | The capital was reduced by NT\$63 million and the capital was increased by NT\$100 million in cash. The paid-in capital was increased to NT\$317 million. |
| May 2006 | The earnings in the amount of NT\$92 million were transferred to capital. The paid- in capital was increased to NT\$409 million. |
| May 2008 | The company achieved FREESCALE certification. |
| Mar. 2009 | The company achieved ISO14001/OHSAS18001 certification. |
| Dec. 2009 | The company achieved TOSHMS certification. |
| Jan. 2010 | The company achieved SEAGATE certification. |
| Mar. 2012 | The company proceeded with achievement of PAS2050: 2008 and ISO14064-1: 2006 certification. |
| Mar. 2012 | The company invested in Esteem King Limited (hereinafter referred to as Esteem King), and indirectly invested US\$360 thousand in Ming Hung Material and Technology (Changshoou) Co.; Ltd |
| Jul. 2012 | The company invested in Esteem King and indirectly invested US\$4,258,943 in MATC Technology (M) Sdn. Bhd (hereinafter referred to as MATC). |
| Aug. 2012 | The company invested in Esteem King and indirectly invested US\$8,066,990 in MAP Plastic Pte. Ltd. (hereinafter referred to as MAPP). |
| Sept. 2012 | The company invested in Esteem King and indirectly invested US\$1,253,419 in Amould Plastic Industries Pte. Ltd (hereinafter referred to as API). |
| Sep. 2012 | The company invested in Esteem King and indirectly invested US\$3,500,000 in API. |
| Sep. 2012 | The employee stock option in the amount of NT\$32,720,000 was transferred to capital. The paid-in capital was increased to NT\$441,720,000. |
| Dec. 2012 | Initial public offering |

| Year | Important Matters |
|-----------|---|
| Dec. 2012 | The company completed the merger program with respect to holding companies that it controlled 100% in Singapore. MAPP, a sub-subsidiary that it controlled 100%, merged with Seb Plastic Pte. Ltd. and Seb Engineering & Trading Pte. Ltd., both of which were subsidiaries that it controlled 100%, API and Amould Technologies Pte. Ltd, a subsidiary that it controlled 100%. MAPP was the surviving company after the merger. |
| Apr. 2013 | Stocks were registered at Emerging Stock Market. |
| Jul. 2013 | The earnings and capital surplus in the amount of NT\$119,280,000 were transferred to capital. The paid-in capital was increased to NT\$561,000,000. |
| Dec. 2013 | Ming Hung Material and Technology (Changshoou) Co.; Ltd., a company in which the company had reinvested, was dissolved and liquidated. |
| Jun. 2014 | The earnings in the amount of NT\$51,100,000 were transferred to capital. The paid- in capital was increased to NT\$617,100,000. |
| Apr. 2015 | The company indirectly invested US\$2,500,000 in Dongguan Yi Hong Precision Industrial Co., Ltd. (hereinafter referred to as Dongguan Yi Hong) by investing in Evolution Holdings Limited (hereinafter referred to as Evolution). |
| Aug. 2015 | The earnings in the amount of NT\$61,710,000 were transferred to capital. The paid- in capital was increased to NT\$678,810,000. |
| Dec. 2015 | For initial public offerings, the capital was increased by NT\$91,190,000 in cash. The paid-in capital was increased to NT\$770,000,000. |
| Jan. 2016 | Listed on the Taiwan Stock Exchange. |
| Feb. 2017 | The company achieved ISO 22301 certification. |
| Mar. 2017 | Increased investment in Dongguan Yi Hong US\$1,900,000 and paid-in capital increased to US\$4,100,000. |
| May 2017 | Liquidation Dongguan Yi Hong Precision Industrial Co., Ltd. |
| Mar. 2018 | The company achieved IATF16949: 2016 certification. |
| Mar. 2018 | Increased investment in Evolution US\$2,100,000 and paid-in capital increased to US\$4,600,000. |
| Jun. 2018 | Disposal of the investment company SEB Manufacturing (Malaysia) Sdn. Bhd. |
| Dec. 2019 | Dongguan Yi Hong Liquidation was completed. |
| Feb. 2020 | The company achieved SA8000:2014 certification. |
| Feb. 2022 | The company achieved ISO45001:2018 certification. |

III. Corporate Governance Report

3.1 Organization system

3.1.1 Organization structure

3.1.2 Business of Each Main Department

| Department | Business |
|--|---|
| Internal Audit | Development, establishment, amendment and implementation of internal control and internal audit systems; supervision and management of subsidiaries; conduction of audit and submission of audit reports; reporting the result to the board of directors |
| Finance Administration Division | Daily accounting routines and preparation of financial statements; management of affairs relating to applicable laws; control of risks relevant to exchange rate and interest rate; management of working capital and its liquidity; budgeting, planning and review; matters relating to board of directors and shares |
| Operational Service Division | Supervision of personnel, administration and general affairs; monitoring of environmental pollution; prevention of occupational injury; maintenance of the company's internal information system, and management and maintenance of software and hardware for computer and the information system; management, review and approval of procurement; review of prices offered for procurement, and control of procurement cost; supervision of supplier management and assessment; management, control and review of demand for production; management of raw materials and purchase requisition |
| Technical Manufacturing Division | Production and quality control; collection of information of customers; control or production and product quality; management and planning of production units; production capacity planning and effectuation; production management, control, review and approval; management of expenses and purchase requisition of production units; planning of mass production and research of manufacturing process; production and delivery control; warehouse management planning, and management and review of materials and supplies; management of idle goods; maintenance of production equipment and power supply; introduction of automatic equipment, and maintenance and repair of factory equipment |
| Product Development Division | Responsible for new product development; sample delivery management and confirmation and mold design planning and execution, proposal and execution of mold design changes, research, development and maintenance of new mold technology and new manufacturing processes. |
| Sales Division | Establishment and performance of business goals; achievement of business objectives; maintenance of customer relationship and service; communication with customers; understanding and collection of information of customers and market trends; understanding of problems mentioned by customers and provision of feedback for factories; credit management; quotation management; order management |

(2) The policies, standards, and portfolios for the payment of remuneration, the procedures for determining remuneration, and the correlation with risks and business performance.

Director remuneration:

In addition to the transportation fee, the directors of the Company are entitled to fixed remuneration each month, the amount of which shall be discussed and determined by an authorized remuneration committee and the board of directors based on their involvement and contribution scale, along with the standard pay of the industry. The individual directors' annual performance assessment shall be held for reference. Furthermore, an amount of no more than 3% of the annual profit shall be set aside as directors' rewards pursuant to the Articles of Association of the Company, where the detailed distribution of the reward shall be calculated based on the provisions of the Remuneration Payment Guidelines for Directors and Functional Committee Members and then presented to the remuneration committee and the board of

directors for resolution prior to distribution.

Manager remuneration:

The package includes fixed salary, year-end bonus, and an amount of 3%-9% of the annual profit set aside as employee reward pursuant to the Articles of Association. The fixed salary is evaluated based on industrial standards, position, job rank, education background, work experiences, professionalism, and job scope; the bonus and employee reward take into consideration the manager's performance, including annual budget achievement, personal KPI, and individual professionalism, as well as behavior and conduct. The procedures of Administrative Measures for Salary and Remuneration of Managers and Guidelines Governing Manager Performance Assessment are followed when the remuneration committee offers suggestions regarding distribution principles and details, and from there it is submitted to the board of directors for resolution.

3.4 Implementation of Corporate Governance

3.4.1 Board of Directors

The board of directors met for 8 times (A) in the latest year (2021). Directors attending the meetings are as follows:

| Title | Name | Attendance in Person(B) | By Proxy | Attendance Rate (%) [B/A] | Remarks |
|-------------------------|---|----------------------------|----------|-----------------------------------|---------|
| Chairman | Min Aik Technology Co., Ltd. Representative: Chia, Kin-Heng | 8 | 0 | 100% | |
| Director | Min Aik Technology Co., Ltd. Representative: Chang, Lung-Ken | 8 | 0 | 100% | |
| Director | Beacon Investments Limited Representative: Jin, Bor-Shi | 7 | 1 | 87.5% | |
| Director | Beacon Investments Limited Representative: Kuo, Yao-Wen | 8 | 0 | 100% | |
| Independent Director | Chen, John-Sea | 8 | 0 | 100% | |
| Independent Director | Sun, Chu-Wei | 8 | 0 | 100% | |
| Independent Director | Chung, Kai-Hsun | 8 | 0 | 100% | |

Other mentionable items:

- 1. If any of the following circumstances occur, the dates of the meetings, sessions, contents of motion, all independent directors' opinions and the company's response should be specified:
 - (1) Matters referred to in Article 14-3 of the Securities and Exchange Act: Not applicable, since the company has established an audit committee; matters listed under Article 14-5 of the Securities and Exchange Act shall be applicable instead.
 - (2) Other matters involving objections or expressed reservations by independent directors that were recorded or stated in writing that require a resolution by the board of directors: On December 29, 2021, the 12th meeting of the 9th session of the board of directors discussed the initiation of a criminal proceedings regarding to the legal liabilities involved in the Rebate offering between the former CFO, Mr. Mong and the customer. Independent director Chen, John-Sea believes that the statement made by the legal adviser did not contain any specific comments involving in criminal law against the former CFO and the act itself was a commercial judgment, so he opposed the direct filing of a criminal proceedings. This proposal was approved after voting.
- 2. If there are directors' avoidance of motions in conflict of interest, the directors' names, contents of motion, causes for avoidance and voting should be specified:
 - (1) On December 29, 2021, the 12th meeting of the 9th board of directors discussed the filing of a criminal complaint against the former chairman of the board, Mr. Jin, Bor-Shi. Because director Jin has an interest, in order to comply with the principle of interest avoidance, he did not participate in the discussion and voting, and cannot exercise voting rights on behalf of other directors. The case was passed after voting by the directors present.
 - (2) On January 19, 2022, the 13th meeting of the 9th board of directors discussed the proposal

to adjust the chairman's salary. Since this discussion involved Chairman Chia, Kin-Heng, he did not participate in the discussion and voting or exercise his voting right on behalf of other directors on the principle of avoiding a conflict of interest. The case was passed after voting by the directors present.

3. The self-evaluation (or peer evaluation) cycle and period, scope, method, and content of the Board:

| Evaluation Cycle | Evaluation Period | Scope | Method | Content |
|---------------------------------------|--------------------------------|--|--|---------|
| Once every year | 2021.01.01 to 2021.12.31 | Board Individual directors Functional committees | Self-evaluation of the Board, committees, and directors | Note 1 |
| At least once every three years | 2018.11.01 to 2019.10.31 | Board Individual directors Functional committees | An external independent institution [Taiwan Corporate Governance Association] is designated for evaluation | Note 2 |

Board Evaluation Status

Note 1: Content of evaluation:

- (1) Board performance evaluation includes five major directions: the degree of participation in company operations, promotion quality of Board decisions, Board composition and structure, the selection and continuous training of directors, and internal control, with 45 indicators in total.
- (2) The performance evaluation of individual directors includes six major directions: the control company goals and missions, knowledge to competences of director, the degree of participation in company operations, internal relationship operations and communication, professional and continuous study of director, and internal control, with 23 indicators in total.
- (3) The performance evaluation of the audit committee includes five major directions: the degree of participation in company operations, promotion quality of functional committee decisions, the composition of functional committee and member selection, and internal control, with 22 indicators in total.
- (4) The performance evaluation of the remuneration committee includes four major directions: the degree of participation in company operations, knowledge to the competence of functional committees, promotion quality of functional committee decisions, and the composition of functional committee and member selection, with 18 indicators in total.
- Note 2: The external evaluation unit assesses eight major dimensions: the composition, instructions, authorization, supervision, communication, internal control, risk management, self-discipline, and other (board meeting, supporting system, etc.) of the Board, with 38 indicators in total via written review and field interview.
- 4. Evaluation of achievement of the goal of strengthening functions of the board of directors (e.g.: establishing an audit committee, enhancing transparency of information, etc.) during the current year and the latest years:
 - (1) To carry out corporate governance, enhance the functions of the Board, and establish performance goals to reinforce the efficiency of Board operation, the Board of the company approved the "Regulations Governing the Board Performance Evaluation" and implemented internal and external evaluation.

(2) To cooperate with the competent author regulations, the English version of the financial report and information related to shareholders are prepared, and significant information in English is published to promote the transparency of information.

3.4.2 Audit Committee

The audit meeting met for 7 times (A) in the latest year (2021). Independent directors attending the meetings are as follows:

| Title | Name | Attendance in Person(B) | By Proxy | Attendance Rate (%) [B/A] | Remarks |
|-------------------------|-----------------|----------------------------|----------|-----------------------------------|---------|
| Independent Director | Chen, John-Sea | 7 | 0 | 100% | |
| Independent Director | Sun, Chu-Wei | 7 | 0 | 100% | |
| Independent Director | Chung, Kai-Hsun | 7 | 0 | 100% | |

Other mentionable items:

- 1. If any of the following circumstances occur, the dates of meetings, sessions, contents of motion, the independent directors' objections, reservations or major recommendations, resolutions of the Audit Committee and the Company's response to the Audit Committee's opinion should be specified:
 - (1) Matters referred to in Article 14-5 of the Securities and Exchange Act.:

| Date/Session of Audit Committee | Content of Proposal | The independent directors' objections, reservations or major recommendations | Resolution of Audit Committee | The Company's response |
|--|---|---|---|--|
| 2021.01.22 The 6th meeting of the 3rd Session | Approved the project results of the financial information agreement procedures handled by the appointed accountants. 3.4.4 Composition, Responsibilities and Operations of the Remuneration Committee

| Title | Criteria Name | Professional qualifications and experience | Independence situation | Number of Other Public Companies in Which the Individual is Concurrently Serving as an Independent Director |
|-------------------------------------|--------------------|--|---------------------------|---|
| Convener Independent Director | Chung, Kai-Hsun | | | 0 |
| Independent Director | Sun, Chu-Wei | Please refer to information | | 0 |
| Independent Director | Chen, John-Sea | | | 1 |

1. Information on Members of the Remuneration Committee

2. Remuneration Committee Scope of duties

According to the company's Remuneration Committee Charter, the Committee shall exercise the care of a good administrator to faithfully perform the following duties and present its recommendations to the board of directors for discussion. However, recommendations regarding compensation for supervisors may be submitted to the board of directors for discussion only when the board of directors is expressly authorized to resolve on that matter by the articles of incorporation or by a resolution of the shareholders meeting:

- (1) Periodically reviewing this Charter and making recommendations for amendments.
- (2) Establishing and periodically reviewing the annual and long-term performance goals for the directors, supervisors, and managerial officers of this Corporation and the policies, systems, standards, and structure for their compensation.
- (3) Periodically assessing the degree to which performance goals for the directors, supervisors, and managerial officers of this Corporation have been achieved, and setting the types and amounts of their individual compensation.

The Committee shall perform the duties under the preceding paragraph in accordance with the following principles:

- (1) Ensuring that the compensation arrangements of this Corporation comply with applicable laws and regulations and are sufficient to recruit outstanding talent.
- (2) Performance assessments and compensation levels of directors, supervisors, and managerial officers shall take into account the general pay levels in the industry, the time spent by the individual and their responsibilities, the extent of goal achievement, their performance in other positions, and the compensation paid to employees holding equivalent positions in recent years. Also to be evaluated are the reasonableness of the correlation between the individual's performance and this Corporation's operational performance and future risk exposure, with respect to the achievement of short-term and long-term business goals and the financial position of this Corporation.
- (3) There shall be no incentive for the directors or managerial officers to pursue compensation by engaging in activities that exceed the tolerable risk level of this Corporation.
- (4) For directors and senior managerial officers, the percentage of bonus to be distributed based on their short-term performance and the time for payment of any variable compensation shall be

decided with regard to the characteristics of the industry and the nature of this Corporation's business.

(5) No member of the Committee may participate in discussion and voting when the Committee is deciding on that member's individual compensation.

"Compensation" as used in the preceding two paragraphs includes cash compensation, stock options, profit sharing and stock ownership, retirement benefits or severance pay, allowances or stipends of any kind, and other substantive incentive measures. Its scope shall be consistent with the compensation for directors, supervisors, and managerial officers as set out in the Regulations Governing Information to be Published in Annual Reports of Public Companies.

If the decision-making and handling of any matter relating to the remuneration of directors and managerial officers of a subsidiary is delegated to the subsidiary but requires ratification by the board of directors of this Corporation, the Committee shall be asked to make recommendations before the matter is submitted to the board of directors for deliberation.

- 3. Attendance of Members at Remuneration Committee Meetings
- (1) The Remuneration Committee of the Company is comprised 3 members.
- (2) Committee members' tenure of their current term: from May 21, 2020 to May 14, 2023. and the Remuneration Committee held 5 meetings(A) in 2021, during the most recent year, and members' qualifications and their attendance are given as bellows:

| Title | Name | Attendance in Person(B) | By Proxy | Attendance Rate (%) 【 B/A 】 | Remarks |
|-------------------------------------|-----------------|----------------------------|----------|--------------------------------|---------|
| Convener Independent Director | Chung, Kai-Hsun | 5 | 0 | 100% | |
| Independent Director | Sun, Chu-Wei | 5 | 0 | 100% | |
| Independent Director | Chen, John-Sea | 5 | 0 | 100% | |

Other mentionable items:

- (1) If the board of directors declines to adopt or modifies a recommendation of the remuneration committee, it should specify the date of the meeting, session, content of the motion, resolution by the board of directors, and the Company's response to the remuneration committee's opinion:
 - A. 2021.01.22 The 5th meeting of the 9th Session Proposal: Discuss the proposal for the manager's annual bonus in 2020. Resolution: The case was approved after the board of directors resolved to supplement some materials. Opinion response: Agree with the committee's resolution, but it is approved after the board of directors resolves to supplement some materials.
 - B. 2021.02.08 The 6th meeting of the 9th Session
 Proposal: Discuss the proposal for the subsidiary manager's annual bonus in 2020.
 Resolution: The proposal was approved by the Board of Directors after voting.
 Opinion response: Approval by vote as some directors oppose the case.
- (2) Resolutions of the remuneration committee objected to by members or expressed reservations and recorded or declared in writing, the date of the meeting, session, content of the motion, all members' opinions and the response to members' opinion should be specified: None.

(3) Content of Proposal, Resolution of Remuneration Committee, and How the company Dealt With it Subsequently :

| Date/Term | Content of Proposal, Resolution of Remuneration Committee, and How the company Dealt With it Subsequently |

Opinion response: This proposal was approved by the Board of Directors after voting. |

| Evaluation Item | Yes | No | Implementation Status Description of Summary | Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies and Reasons |
|---|-----|----|---|---|
| Does the company establish a governance structure to promote sustainable development, established a dedicated (part-time) unit to promote sustainable development; and did the Board of Directors authorize senior management to handle it and report the supervisory status to the Board of Directors? | | | In 2019, the Social Responsibility Performance Team was established by the Department of Business pursuant to Responsible Business Alliance standards. To incorporate corporate social responsibility into the Company's business strategy, the Team includes the General Manager as the Chairperson, the management personnel of the Department of Business in charge of management, and the management personnel of each department as a member to each system in accordance with their respective expertise. The Operation Service Division integrates and bridges vertical and horizontal communication, pinpointing topics of concern for both clients and stakeholders across annual key tasks as the guidelines for execution throughout the year. The execution status is monitored at least quarterly, while environmental sustainability and the execution outcome of social responsibility are reported to the Board of Directors at year's end to ensure key tasks and achievement. Each year, the internal audit and management review inspects the practice of all improvement measures, with at least a management review meeting to track Company health, safety, environment, risk identification and improvement, hygiene, welfare, normal equipment, system and other employee- related matters. The Company has been certified as an Environmental Management System (ISO14001), ISO 45001 Occupational Health and Safety Management Systems (OH&SMS), RBA (Responsible Business Alliance), and SA 8000 (Social Accountability 8000) and is active in social responsibility, environment protection, and public benefit activities. While developing our business, we stand by the environment, occupational safety, corporate | None |

3.4.5 The state of the company's promotion of sustainable development, any variance from the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies, and the reason for any such variance

|---|-----|----|---|---|
| | Yes | No | Description of Summary | |
| | | | governance, and social responsibility, among other topics. | |
| 2. Does the company assess ESG risks associated with its operations based on the principle of materiality, and establish related risk management policies or strategies? | ✓ | | Risk identification and assessment is performed once a year by our Social Responsibility Performance Team, which is joined by related units and departments. The assessment results lead to strategies for improvement and monitoring. Furthermore, the internal audit and management review once a year confirms the progress of each improvement measure. The risk assessment for operation related topics is conducted pursuant to the materiality of Corporate Social Responsibility, followed by risk management policy adoption according to the risks assessed (See Table 1). The disclosed information covers our achievements with regard to environmental sustainability from January to December of 2021; the boundary of risk assessment focuses on the precision metal stampings of our business. | None |
| 3. Environmental issues (1) Does the company establish proper environmental management systems based on the characteristics of their industries? | ~ | | The main process of the Company is precision metal stampings and surface treatment. By effectively identifying potential environmental pollution that may be caused through the process, an appropriate environment management solution was proposed and the company environment management system established in order to execute the system and ensure legal compliance by our dedicated personnel of the Environmental Engineering Department. To strengthen the process and environment safety management, the Company adopted effective management in accordance with management system and regulations, and every pollution facility installation and discharge permit abides by relevant laws and regulations. Furthermore, the PDCA cycle is implemented to successfully reduce the impact made to the environment by polluted air, sewage, waste, and toxicity. The Company became a certificat Environmental Management System (ISO14001) in 2009; its latest certificate is valid from 3/11/2021 through | None |

| | Evaluation Item | | | Implementation Status | Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies and Reasons |
|-----|---|-----|----|--|---|
| | | Yes | No | Description of Summary | |
| | | | | 10/10/2024. | |
| (2) | Does the company endeavor to utilize all resources more efficiently and use renewable materials which have low impact on the environment? | | | The Company has a system for sorting garbage and a dedicated place for recycling. Papers are recycled and reused, and we encourage reusable food ware. Our paperless movement helps reduce impact on the environment. Wastewater recycling equipment has been installed to reduce water usage and the load wastewater places on the natural environment. The target is to recycle more than 10,000 tons of used water. Regarding energy use, no effort was spared for saving electricity. From energy saving lighting to smart electric meters in selected areas, energy consumption is minimized with our eco-friendly measures. Natural gas has replaced boiler fuel since the end of 2019 as part of the company's energy efficiency enhancement policy. With the same heating value but fewer CO2 emissions, GHG volume has been continuously examined every year since then. Compared with the reference year, 2019, where 7,901 tons of CO2 was emitted, a total of 1,155.7 tons of CO2 was emitted from 2020 to 2021. In the future, continuous carbon reduction will be an annual goal. | |
| (3) | Does the company evaluate potential risks and opportunities brought by climate change, and take response measures to climate-related issues? | ~ | | Within the structure of the S H E (Safety, Health, and Environment) management system, in each department, the personnel implementing the system must review any changes in the internal and external environment and Company products, activities, and service flow via annual management review meetings and perform risk identification based on the analysis of internal and external S H E risks and opportunities that may affect the company management system's operation. Quantitative scoring is made against the impact and urgency to the Company in accordance with Internal and External Topics Scoring Criteria to locate material topics. As a result of such assessment, countermeasures were taken on the topics of Greenhouse Gas Management, pollution and wastes, energy saving, and | |

|-----|---|-----|----|--|---|
| | | res | NO | Description of Summary | |
| | | | | carbon reduction to improve performance through personnel training, reduction from sources, water quality investigation, improvement assessment, and recycle tests and examination. | |
| (4) | Does the company compile statistics of greenhouse gas emissions, water use, and total weight of waste in the past two years, and does it establish policies for energy conservation & carbon reduction, greenhouse gas emission reduction, water use reduction, and other waste management? | | | The main statistical boundary of the Company is precision metal stamping. The GHG volume has been disclosed on the Company's website for the past two years. Waste reduction, wastewater recycling and reuse, and steam reuse are all a part of the policy contributing to environmental protection. 1. GHG: At the end of 2019, an energy efficiency enhancement policy was carried out, with natural gas replacing boiler fuel, with 39.7% CO2 reduction as a yearly goal. The statistics below show the GHG volume emitted by the Company in the past two years. Scope 1: 2019: 1,902 tons; 2020: 1,522 tons; 2021: 1,535 tons. Scope 2: 2019: 5,188 tons; 2020: 5,837 tons; 2021: 6,397 tons. Scope 3: not counted Intensity (CO2/million NT-net income): 2019: 7.85 tons; 2020: 7.68 tons; 2021: 6.93 tons Water usage: The Company started recycling wastewater years ago. Each year, we aim to recycle more than 10,000 tons of tap water for reuse. The statistics of water usage and recycling from 2020 to 2021 are listed below. Water usage: 2020: 274,087 tons; 2021: 16,142 tons Intensity (water/net income (million NT): 2020: 258 tons; 2021: 215 tons 3. Waste: With source reduction as our original intention, the sludge drying system helps cut sludge by 57% in each batch of hazardous industrial waste. The statistics below list the wastes in 2020 and 2021. Hazardous waste volume: 2020: 11 tons; 2021: 166 tons Non-hazardous waste volume: 2020: 251 tons; 2021: 312 tons Intensity of hazardous wastes (wastes/net income (million NT): 2020: 0.12 | |

| | | Yes | No | Description of Summary | | | |
| (2) | Does the company have reasonable employee benefit measures (including salaries, leave, and other benefits), and do business performance or results reflect on employee salaries? | | | Thorough employee welfare measures and retirement system: The off-day system is in accordance with the Labor Act. For child caring, major illness, and major incidents that require longer leave, unpaid leave is applicable to meet personal and family needs. According to the Articles of Association, 3%-9% of annual profits shall be set aside as employee compensation, reflecting business achievement on the employee remuneration package. To secure the future living of employees, the Management Guidelines for Employee Stock Ownership Trust has been adopted, along with the employee Stock Ownership Committee, setting aside a reward amount based on the amount of members' salary withheld. Physical examination at a regular interval and subsidies for colleagues undergoing health examinations. We value a diversified workplace and gender equality. Women represent 50% of our employees, while 40% of senior management personnel are female. See Labor Relationship under Operation Overview (page 113) for employee welfare measures and retirement system implementation. | | | |
| (3) | Does the company provide a healthy and safe working environment and organize training on health and safety for its employees on a regular basis? | ✓ | | The following sets out the SHE policy adopted by the Company to provide a safe and healthy working environment. Legal compliance, continuous improvement, risk minimization, training implementation, consultation and communication, energy saving and carbon reduction, health improvement The Company has established a S H E management system. Continuous improvement with annual validation ensures that both legal and system requirements are met. In 2020, S H E trainers of the Occupational Safety Team were appointed. Representing their own departments, each trainer underwent professional training every month to become an internal lecturer in order to educate and pass down the training to their colleagues, so that | | | |

| | | | | safety awareness prevails. So far, 185 individuals have received training, and total training hours have reached 2,128 hours. In addition, 612 individuals have undertaken regular fire drills, evacuation, chemical spillage and leakage drills, together with personnel safety training when necessary, for a total of 824 training hours. In addition to a safe and healthy work environment, the Company provides regular employee safety lectures and employee health examinations. Furthermore, work environment monitoring twice a year helps ensure a healthy work environment. In 2021, a total of three occupational accidents occurred, and the FSI 0.34 was slightly higher than 0.22 of 2020. After a thorough review, the improvement included a safety interlock device on machinery, SOP amendment, and safety training across the plants to ensure employee safety. The Company was ISO45001 (standard for occupational health and safety) certified in February 2021. The latest certificate is valid 4/2/2021-3/2/2024. | |
| (4) | Does the company provide its employees with career development and training sessions? | V | | The training programs for employees and their implementation are described below: 1. New employees receive their orientation on the day they report to the position. A total of 301 people received such training this year, with a total of 452 training hours. 2. Training programs are designed for all employees, and programs are implemented accordingly. A total of 705 people received such training this year, with a total of 2,094 training hours. 3. A total of 129 individuals received professional skills training outside the Company this year, with a total of 387 training hours. | |
| (5) | Does the company comply with relevant regulations and | √ | | Consumer protection, customer rights, and complaint procedures have not been adopted because the parts and components we produce are not categorized as end products. However, as specified by the provision of SA 8000, an NDA is signed | |

| Evaluation Item | Yes | No | Implementation Status Description of Summary | Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies and Reasons |

| | | | verify that suppliers have received and understood the procedures stipulated by the Company. 5. The supervision of supplier abidance is carried out through field assessment, which covers items from "Supplier Quality Audit system" to "supplier procurement system audit" and "general assessment and check on supplier social responsibility management." A contract with a supplier that violates social responsibility and brings significant impact on the environment shall be canceled or terminated pursuant to the content of the contract. | |
| 5. Does the company reference internationally accepted reporting standards or guidelines, and prepare reports that disclose non- financial information of the company, such as corporate social responsibility reports? Do the reports above obtain assurance from a third-party verification unit? | | ✓ | Although the company has not yet compiled a sustainability report, we are still committed to promoting social responsibility, and has acquired ISO14001, ISO 45001, RBA and SA 8000 certification. | None |

Listed Companies, please specify its operation and the difference from its policy.

The company has not established the sustainable development policy. However, to keep its promise to employees, shareholders and the public, the company not only makes information transparent, but also actively participates in environmental protection and public welfare activities. By doing so, the company has complied with the spirit of "The Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies".

- 7. Important information helpful for understanding the state of the company's promotion of sustainable development:
- (1) Employees of the company are offered equal rights of employment and opportunities of expressing opinions and developing abilities freely regardless of race, sex and age. the company has also established and complied with strict standards for safety and health of the work environment for employees.
- (2) As a corporate citizen, the company, when developing its business, also pays attention to protection of natural environment and prevention of occupational injury to meet the requirements provided by internal and external customers. To perform social responsibility, the company also promotes the road adoption activity while facilitating the growth of the enterprise as well as environmental protection.
- (3) The company has achieved ISO14001, ISO45001, RBA (Responsible Business Alliance Code of Conduct, formerly: EICC) and SA 8000 (Social Accountability) system certification. Members of the team not only promote the aforementioned system, but also visit nearby underprivileged groups needing assistance in hopes of starting from communities to take care every corner that needs us.
- (4) With the philosophy of "Take from Society and Give Back to Society", the company performs its obligations as an enterprise by developing and realizing the concept of environmental protection and making charitable contributions in order to bring about care and warmness for the society. Checking greenhouse gases has been listed as one of the key points in work in recent years. The company actively reduces greenhouse gases in order to achieve the objective of reduction of CO2 omission, protecting the earth and sustainable operation.

| Material Topic | Items assessed | Description |
|-------------------|--|--|
| Environment | Environment protection and ecological maintenance | Acquired the first environment certificate in 2009 and again in November 2021, the Company environment management system has maintained ISO 14001 certification. Substantial reduction of pollution source. Practices in line with the government regarding the protection of air quality. Full practice of natural gas throughout process lines to minimize waste gas emitted from heavy fuel combustion. Water reuse policy pursuant to government policy. Wastewater recycling system to reduce discharge so that every drop can be reused. Beach cleaning activities restore the natural look a coast should have. Beach adoption in response to government policy further protects our environment through physical action. Sludge drying system in place to reduce solid wastes. |
| Society | Occupational safety | In 2021, the Company's occupational safety management system was ISO 45001 Occupational Health and Safety Management Systems (OH&SMS) certified. Daily field safety is checked based on 6S for the work environment. Regular annual employee fire drills, plant-scaled evacuation drills and dormitory escape drills fully prepare employees' capability in reacting to emergency and safe escape. The accumulated disaster-free working hours approved by ISHA (Industrial Safety and Health Association) have |

 Table 1- Risk assessment and management policy

| Material Topic | Items assessed | Description |
|-------------------|--|---|
| | | now reached 1,218,541 hours. |
| | Social responsibility | Approved by and received RBA certificate regarding the full inspection on labor, health and safety, environment, and ethics. The Company is RBA VAP validated with a silver award. Regarding public welfare, we endeavor ourselves and seek companies that will contribute to greater love. Our achievement includes inviting employees to donate blood and joining with independent institutions like Used Shoes Save Lives. |
| | Ethical management | Any form of bribery, corruption, blackmail, or embezzlement is prohibited. Specific standards and regulations are established for employees to follow. Promising, offering, approving, giving, or accepting bribes or any form of unjustifiable income, including promising, offering, or taking any valued items, is prohibited. |
| Corporate | Continuous operation and management | Regulations of each department and office shall be followed; internal control procedure implemented to ensure all personnel are working pursuant to Company regulations. The operation is in line with government regulations by regular follow up on acts and orders and update Article of Associations. To fulfill environmental sustainability, every management policy is implemented, along with the obtainment of ISO 22301, Business Continuity Management System certificate. |
| Governance | Reinforcing the function of Directors and its value | To advance the function of Directors, courses are offered every year regarding the most updated legal regulations and concerned topics available for directors. The Procedure for Handling Demands by Directors is adopted to ensure proper handling and execution regarding issues raised by directors. |
| | Engaging stakeholders | We value employees' rights and interests by establishing consultation and complaint channels for employees to speak freely and express their concerns in their position; we follow up on Company related topics and are devoted to creating a work environment that is friendly and has positive labor relations. Channels are in place for external communication; regular announcements on stakeholders' concerned issues are made for their reference. |

| Concerned Topics | Goal and Implementation | Risk Assessment | Measures for Mitigation | Remedy |
|---|---|--|--|--|
| Providing a safe and healthy work environment | Full prevention of occupational illness to enhance employees' physical and mental health. | Records with regard to any occupational illness caused by chemical exposure. The voluntary participation rate in the health project shows how the Company supports employees in health promotion. | Control chemical, physical, human, biological, psychosocial hazardous elements that cause occupational illness by management representatives and committee representatives of laborer health and hygiene management in relevant departments. Nursing staff in place for healthcare, health promotion, and employee support projects. Regular residence to perform health consultation and related inquiry with physicians. | Immediate adjustment of work. Sufficient medical resources. Prevention from recurrence |
| Complete eradication of unlawful discrimination to ensure equal job opportunities | Operation in line with the Labor Law, Ministry of Labor, international regulations and Company Human Rights Policy; Implementation of internal regulations. Procedures are adopted and implemented; declaration in Recruitment and Employment Management Procedure with regard to the non-discrimination principle: equal job opportunities for every job seeker and employee. No discrimination against races, skin colors, ages, genders, sexual orientation, ethnicities, | As early as possible in the recruit process, internal control is activated to eliminate any discrimination against laws. On their resume, no applicants are required to provide job-irrelevant personal information. | Legal compliance is performed from the very beginning of recruitment in order to eliminate discrimination against laws. | No violation cases. |

Table 2- Concerned human rights and practices

| Concerned Topics | Goal and Implementation | Risk Assessment | Measures for Mitigation | Remedy |
|---|--|---|--|--|
| | disabilities, pregnancy, religious beliefs, political faction, members of societies, or marriages. 3. Training for recruiting managers on no discrimination against applicants. | | | |
| Child Labor Avoidance | Child Labor Avoidance Management Procedures are adopted when interviewing applicants. Newly hired employees are reviewed to ensure no omission. | Applicants are required to produce statutory identification proof so that the Company may verify their appointment qualification. | Legal compliance is performed from the very beginning of recruitment. | No violation cases. |
| Forced labor prohibited | Labor related acts and orders by the regional government, international regulations, and Company human rights policy are followed. No forced or coerced laborer shall perform labor. It is specified in the work rules that extra work hours require the consent of employees, with overtime pay or compensatory leave. | In addition to internal controls for work hours, channels for complaint and communication sessions are in place for dissemination and inspection. | The attendance system and overtime report system are devised with reminders. Monthly checks and control on work hours. | In the event of forced labor, improvement measures shall be taken by relevant management personnel. Relevant employees shall be compensated accordingly. |
| Supporting employees' balance between mental and physical health and work life | Diversified activities from culture and art to sports, family, and kids; clubs and societies are available for expanding colleague interaction and obtaining a balance between work and life. Contract with kindergarten helps provide childcare solutions and better support employees' work performance. | Participation rate will be reviewed. | Encouraging employees and their family to participate in activities by publicizing such activities through Welfare Committee members and partner sponsors. | Survey after activities for future improvement. |

- (4) The company's board of directors established a Corporate Governance Officer on January 17, 2019.

3.4.9 The Performance in Internal Control System shall disclose items given as follows:

A. Declaration of Internal Control System

Min Aik Precision Industrial Co., Ltd. Declaration of Internal Control System Date: March 11, 2022

Over the Company's internal control system of Year 2021, based on the results of our self-evaluation, we'd hereby like to declare enumerated below:

- 1. Here at the Company, we confirm full awareness that implementation and maintenance of the internal control system are the inherent responsibility of the Company's Board of Directors and managers. The Company has duly set up such internal control system in an attempt to provide rational assurance of the effect and efficiency of the business operation (including profitability, performance and assurance of the safety of assets), reliability of reports, timeliness, transparency and accomplishment of the compliance targets on related requirements, laws and regulations.
- 2. Internal control system is subject to inherent restriction, disregarding how sound it has been designed. Effective internal control system could only provide rational assurance for accomplishment of the three aforementioned targets. Besides, in line with the changes in circumstances and environments, effectiveness of internal control system might change as well. For the Company's internal control system, nevertheless, we have set up sound self-superintendence mechanism. As soon as a defect is identified, the Company would take corrective action forthwith.
- 3. Exactly in accordance with the items of judgment for the effectiveness of the internal control system under "Regulations Governing Establishment of Internal Control Systems by Public Companies" (hereinafter referred to as "Managerial Regulations"), we duly judge whether the internal control system is effective in design and implementation. The items adopted for aforementioned "Managerial Regulations" for judgment of internal control system are the process for management control. The internal control system is composed of five composition elements: 1. Circumstances of control, 2. Risk evaluation, 3. Control operation, 4. Information and communication, and 5. Superintendence. Each and every composing element includes a certain items. For more details regarding the aforementioned items, please refer to contents of the "Criteria".
- 4. Here at the Company, we have adopted the aforementioned items of judgment over internal control system to evaluate the effectiveness of the design and implementation of the internal control system.
- 5. On the grounds of the results of evaluation in the preceding paragraph, we are confident that the Company's internal control system in design and implementation as of December 31, 2021 (including the superintendence and management over subsidiaries), including the understanding of the results and efficiency of business operation in accomplishment of the targets, reliability of reports, timeliness, transparency and compliance of the relevant laws and regulations are effective and would reasonably assure accomplishment of the aforementioned targets.
- 6. The Declaration will function as the key element of the Company's Annual Report and Prospectus and will be made public externally. In the event that the aforementioned made public involve misrepresentation, concealment or such unlawful practice, the Company shall get involved in the legal responsibilities under Articles 20, 32, 171 and 174 of the Securities and Exchange Act.
- 7. This Declaration has been approved by the Company's Board of Directors on March 11, 2022. Seven (7) directors were in attendance, none kept objecting opinions, and all directors in attendance hereby state their agreement to the contents of this declaration.

Min Aik Precision Industrial Co., Ltd. Chairman: Chia, Kin-Heng General Manager: Fang, Kuang-Yi

| | () | rr ··································· |

3.4.12 In the most recent year and as of the Annual Report issuance date, different opinions posed by the directors to the Key Resolutions in the board of directors, as backed with written records or declaration in writing:

- (1) 2021.02.08
 - Proposal: Discuss the year-end bonus for subsidiary managers.
 - Jin, Bor-Shi: He believes that the Remuneration Committee's definition of managers and the procedures and content of the review are inadequate, so he opposes it.
 - Kuo, Yao-Wen: He believes that the bonus payment base is too high, so he opposes it.
- (2) 2021.12.29
 - Proposal: Discuss filing a criminal complaint against the Company's former chairman and former CFO of the relevant legal liabilities.

- Chen, John-Sea: He believes that the statement made by the legal adviser did not contain any specific comments involving in criminal law against the former CFO and the act itself was a commercial judgment, so he opposed the direct filing of a criminal proceedings.
- Kuo, Yao-Wen: He believes that based on the content of the legal opinion and the facts that I know, the company may pose a risk of false accusation and cause damage to the reputation of others, so he opposes this proposal.
- Jin, Bor-Shi: He believed that the company could not clearly explain the criminal responsibility of former CFO, and he had explained the causes and consequences of the case, so he opposed using the company's resources to do things that would have a negative impact on the company.
- (3) 2022..01.19
 - Proposal: Discuss the proposal to adjust the chairman's salary.
 - Kuo, Yao-Wen: He believes that the compensation of the board of directors has been the highest in history, so he opposes the proposal.
 - Jin, Bor-Shi: He believes that the company's current situation has not changed much from when it was set, and that fixed pay should not be increased just because it is profitable, so he opposes the proposal.
- (4) 2022.03.11
 - Proposal: Discuss the KPI of managers for 2022.
 - Jin, Bor-Shi and Kuo, Yao-Wen: They believe that the KPI content of some managers needs to be adjusted, so they oppose the proposal.

- * If use profits or capital reserve for raising capital shares appropriate, then it should announce the information of the number of appropriate shares and retroactively adjust market price and cash dividend.
 - Note 1 : list the highest and lowest price of the common stocks in that year, and the average market price for that year is calculated based on the transaction values and transaction amounts.
 - Note 2 : Use the number of circulated shares at the end of the year as the base, then the dividend distributed determined by the board or in the coming year's stockholders' meeting.
 - Note 3 : If there is any retroactive adjustment from the stock dividend without compensation, then it should list earning per share on before and after adjustment.
 - Note 4 : If the equity investment has constraint that limits the undistributed dividend for that year and it is cumulated until to later profitable year. Then it should disclose the cumulative undistributed dividend up to that year.
 - Note 5: Price / Earnings Ratio = Average Market Price / Earnings per Share
 - Note 6: Price / Dividend Ratio = Average Market Price / Cash Dividends per Share
 - Note 7: Cash Dividend Yield Rate = Cash Dividends per Share / Average Market Price
 - Note 8: The net value per share and earnings per share should be filled in with the information checked by the accountant in the most recent quarter of the annual report. The remaining fields should be filled in the year of the year as of the date of publication of the annual report.

4.1.6 Dividend Policy and Implementation

(1) Dividend Policy

The net profit of the Company after yearly closing shall, other than paying the income tax payable by law, first be used to compensate losses from the past years. Then 10% of the balance amount shall be provided as legal reserve (unless the amount of legal reserve has reached the total amount of capital). Special reserve shall also be provided in accordance with the law as required. The rest shall be used to distribute dividend. If there is any profit remaining, it shall be combined with the undistributed profit in the beginning of the period, subject to a dividend distribution proposal to be prepared by the board of directors and submitted to the shareholders meeting for resolution for distribution.

To pursue long-term shareholder interest and achieve the target of stable operating performance, the Company adopts the policy of balanced dividend, provided that cash dividend shall not be less than 30% of total dividend.

Although the dividend policy of the company's articles of association does not specify the proportion of dividend distribution, considering the short-term capital needs and long-term financial planning of the company, as well as the domestic and international competition, and taking into account the interests of shareholders, the company's shareholder dividends should not be low. In the current year, the principle of 50% of the surplus is allocated.

(2) Allocation of dividend for the year having been proposed

The Company's board of directors already resolved the 2021 Earnings Distribution on March 11, 2022:

Unit: NT\$ItemAmountUndistributed profit at start of period1,085,240Plus: Variation following re-evaluation of confirmed welfare plan776,759Plus: Net profit after tax for the current period89,216,586

| Less: Legal reserve Less: Special reserve provided for equity deductions Distributable surplus | (8,999,335) (36,616,761) |
|--|-----------------------------|
| Accumulated distributable earnings | 45,462,489 |
| Allocation items in this period Less: Cash dividends (NT\$0.55 / per share) | (42,350,000) |
| Undistributed earnings at the end of the period | 3,112,489 |

(3) If there is a significant change in the expected dividend policy, it should be stated: N/A

4.1.7 The impact of proposed stock dividend on the Company's business performance and earnings per share: N/A

4.1.8 Employees' and Directors' compensation

(1) Percentage or range of employees'/directors' compensation stated in the Articles of Incorporation:

If the Company has profit in the year, 3% to 9% shall be provided as employees 'compensation and no more than 3% as directors' compensation. However, if the Company has accumulated losses, the amount of compensation shall first be provided.

The employees entitled to shares or cash as compensation under the previous paragraph shall include employees of the subsidiaries who meet certain conditions.

- (2) Basis of calculation for employees'/directors' compensation and share-based compensation, and accounting treatment for any discrepancies between the amounts estimated and the amounts paid: N/A
- (3) Compensation approved by the board of directors: The employees' compensation and directors' compensation in 2021 was approved by the Board of Directors on March 11, 2022 and they are to be distributed in cash. The amounts are as follows: A. Employees' compensation: NT\$9,991,095.
 - B. Directors' compensation: NT\$1,110,121.
- (4) Allocation of compensation to employees and directors in the preceding year with significant discrepancy of the acknowledgement of bonus to employees and compensation to directors, the causes, and countermeasures:

In 2020, the Company actually distributed NT\$3,303,067 in employee compensation and NT\$367,007 in director compensation, both of which were paid in cash, and there was no difference from the amount recognized in the financial report.

- 4.1.9 Share buybacks: None
- 4.2 Corporate Bonds issued: None
- 4.3 Preferred stock issued: None
- 4.4 Global depositary receipts (GDR) issued: None
- 4.5 Employee Stock Options issued: None
- 4.6 Acts on new restricted employee shares: None
- **4.7** Facts of merger/acquisition (M&A) or inward transfer of outstanding new shares from another company: None
- 4.8 Capital plans and execution: None

V. Operations Overview

5.1 Business Content

5.1.1 Business Scope

1. Main Content of Operating Activities

Min Aik Precision Industrial Co., Ltd.: (hereinafter referred to as "The company" or Min Aik Precision)

- (1) C805050 Industrial Plastic Products Manufacturing
- (2) C805010 Plastic Sheets, Pipes and Tubes Manufacturing
- (3) C805030 Plastic Made Grocery Manufacturing

| Total | 2,167,903 | 100% | | |

3. Current Products (Services) of the Company

Min Aik Precision

- (1) Stamping assembly of the hard disk drive.
- (2) Consumer electronic assembly.
- (3) Parts of the heat spreader.
- (4) Stamping parts for the automobile.
- (5) Surface treatment and electroplating service of metal parts

MAPP

- (1) Medical plastic consumables.
- (2) Life Science consumable and enclosure plastic parts to be used in the lab.
- (3) Other plastic products.
- (4) Mould fabrication.
- (5) Automation equipment for assembling of the medical consumables

Suzhou Amould

- (1) Assembly, testing, installation, laser and assembly line of 3C Product automation equipment.
- (2) Inspection and assembly automation equipment of medical products.
- (3) Assembly and test automation equipment of memory, solar energy, LED and many other industries.
- 4. New Products (Services) Planned to be Developed

Min Aik Precision

- (1) Develop high-end service hard disk related stamping components incorporated with market trend
- (2) The development and manufacturing of mobile phone, tablet, notebook, automobile, display electronic components
- (3) The development and manufacturing of 5G and communication base electronic parts

MAPP

- (1) Thermoforming of medical devices.
- (2) Silicon moulding of medical devices.

Suzhou Amould

- (1) Design and develop automatic process equipment with the launch of 3C new products in the market.
- (2) Design and develop automatic equipment to meet the needs of traditional industries.
- (3) Design and develop automation equipment to meet the needs of medical products.
- (4) Inspection and assembly automation equipment of medical products.

5.1.2 Overview of the Industry

- 1. Current Situation and Development of the Industry
 - (1) Stamping of precision metal
 - A. Hard disk drive industry

After years of industrial competition and benign merger and acquisition, the oligopoly market mode in which the hard disk drive industry has been globally dominated by three major hard disk drive manufacturers began in 2012. All the procedures for Seagate to merge with and acquire the Hard Disk Drive Department of Samsung Electronics Co., Ltd. were completed on December 19, 2011. Western Digital Corporation (WD) successfully carried out its acquisition of Hitachi Global Storage Technologies (HGST) on March 8, 2012. However, due to requirements of mainland China's Ministry of Commerce at that time, the status was maintained until October 2017, and the independent operation of WD and HGST brands was maintained until then. Therefore, WD and HGST were considered different brands and storage technology companies and occupied the market separately although they belonged to the same group. In 2018, WD Group continuously merged, organized, and adjusted its actions, market positioning, and target groups. After successive acquisitions of such internal storage device brands as HGST, SanDisk, G-Technology, Tegile, and Upthere, WD decided to re-adjust the brands it owned so that the products of the owned brands

could be more easily identified in the market. After such adjustment, the name --Western Digital would be used in a unified manner to refer to all the brands of the enterprise, as well as its commercial application products. In the future, HGST and WD brands would no longer be used to promote the products of the enterprise and commercial application, respectively. The three major hard disk drive manufacturers, Western Digital, Seagate, and Toshiba, shall continue to subsequently lead the hard disk drive market.

From the market share of HD manufacturers observed in 2021, Seagate will still take the lead with a 43% market share and stand firm as the biggest HD manufacturer of the world; it is followed by the manufacturer Western Digital with a market share of 36%; and Toshiba stands in third place with 21% of the market share.

Shipment statistics of hard disk drives and analysis of market shares of major hard disk manufacturers in 2019-2021

Source: Forbes

In the Citi 2021 Global Technology Virtual Conference, Seagate announced that it is now focusing on 2nd generation high capacity Heat Assisted Magnetic Recording (HAMR). The Company introduced 20TB HAMR HD for sale in December 2020. However, the quantity is only available for major customers to familiarize themselves with the new HD. The Company is also now developing 2nd generation HAMR HD with a capacity of about 30TB.

The Company plans to introduce 50TB HD in 2025 and the 2nd generation HAMR HD may be delivered in 2023 or the beginning of 2024.

Seagate has been a staunch supporter of HAMR technology over the years and has delivered thousands of these HD products to specific customers. Seagate still has no plans to mass-produce the 1st generation HAMR HD but it is developing the 2nd generation HARM HD and expects to promote them to the public market.

The disc material will be heated temporarily during the HAMR writing process to allow significant data to be written in the same area. This may significantly and rapidly increase the area density of HD.

The area density of 20TB HD with 9 discs is about 1.116 Tb/inch2. Seagate has proved that its HAMR technology may reach an area density of up to 2. Tb/inch2 and expects to introduce 100 TB 3.5 inch HDD by increasing the capacity to 6 TB/inch 2 in 2030. However, HAMR is troublesome because it not only needs new disk heads but also requires new mediums. This is likely the reason why it has been adopted slowly among general products.

Although consumers have turned their preferences to faster SSD for storage, the operators of Exascale data centers still depend on HD to store massive data. Among them, many companies are not hesitant about using new technology. For use cases, HAMR HD is the perfect resolution because it could save a lot of data in the same 3.5-inch dimension.

B. Electronic Components

The heat spreader is one of most basic heat spreading components and is usually made of metals that easily conduct heat. The metal materials of the heat spreader include such high heat conductive metal materials as copper alloy, aluminum material, aluminasilicon carbon, and stainless steel. In general, the heat spreader is in direct contact with the chip that is the direct material for CPU or GPU. Since the heat spread must be completely bound with CPU to equally conduct the heat, flatness is very important. Furthermore, because it needs to be bound with CPU, the heat spreader has become a highly customized product in order to meet the different requirements of various chip plants for the package.

The application of heat spreaders is very extensive, e.g., electronic components in the electronic information industry, semiconductor, and photoelectric component industries. Downstream industries have further expanded to 3C and automobile electronic industries. Current major applications are such electronic components as CPU, GPU, single chip, and multiple chip modules, and the market demand is increasing along with computer productivity.

The continuous expansion of new applications for Central Processing Units (CPU), Graphics Processing Units (GPU) and Accelerate Processing Units (APU) - three major processing technologies – as well as the maintenance of the existing market will stabilize key developments in the global processor market over next decade.

Several events in the processor industry in recent years have rebuilt the potential of its overall market. This includes Apple's decision to create Mac processor designs of its own, the rapid development of cooperative accessing of CPU acceleration data centers and the reorganization of the APU supply chain in the tense China-US trade situation.

According to Yale's John Lorenz calculations, a software technology and market analyst, "APU is the core chip built-in modern 'smart' devices for management and execution. In fact, following more and more consumer devices which are always on and connected, APU may become the ideal substitution for products similar to traditional x86 which is much power consumable."

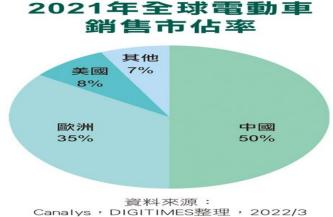

C. Automotive stamping parts

Aimed at the development of the global electric car market, the sales volume of electric cars showed significant growth compared to the low overall car sales. Among them, the market penetration rate of electric cars in both China and Europe exceeded 15% and was better than the global performance. Following the approach of fuel car bans, car plants are continuously increasing electric car business investments and see it as their core business. The penetration rate of global electric cars is expected to exceed 30% in 2025.

According to automobile association statistics in different countries, only 71 million cars were sold in 2021 worldwide with just 3.8% growth compared to 2020's low point which had been affected by a serious shortage of chips. On the contrary, the annual

growth of global electric car sales was over 100% and the top three major markets in order were China, Europe and the US with a 90% global share.

The share of China's electric car market recovered to 52% worldwide and returned to the top place in 2021. The main reason is that car plants must have a certain ratio of new energy vehicles in production as regulated by the Chinese government. They have also introduced popular low-price small vehicles. Accordingly, the annual sales growth reached 168% in China's market. The second-largest market, Europe, then continued the carrot and stick policy in 2020 and the annual sales growth was approximately 60%.

In view of mid to long-term global electric vehicle market development, DIGITIMES Research estimates that the sales volume will reach 28.5 million in 2025 and the overall car market penetration rate will exceed 30%. With an incoming ban schedule of fuel cars and stricter carbon emission standards, car plants continuously increase investments in electric vehicle businesses, including the expansion of electric car production lines to avoid carbon taxes and large penalties. In addition to the new vehicle production trend, traditional car plants are also accelerating the transformation from "oil to electric", showing that car plants consider electric vehicles as their core business.

Hybrid, fuel batteries and pure electric vehicles are the main trends. Most traditional car manufacturers face resources, money and time consumption to accelerate the development of electric vehicles or enhance the quality of existing vehicle technology for product transformation. Distinguished from traditional vehicle manufacturing, electric vehicles enter professional work divisions like mobile phone manufacturing, which also creates more opportunities for electric car and information industries and component suppliers.

(2) Medical consumable industry

The global medical devices market was USD 432.23 billion in 2020. The global impact of COVID-19 has been unprecedented and staggering, with medical devices witnessing a negative impact on the adoption rate across all regions amid the pandemic. The global market exhibited a decline of 3.7% in 2020 as compared to the average year-on-year growth during 2017 -2019. The market is projected to grow from USD 455.34 billion in 2021 to USD657.98 billion in 2028 at a CAGR of 5.4% in the 2021-2028 period. The sudden rise in CAGR is attributable to this market's demand and growth, returning to prepandemic levels once the pandemic is over.

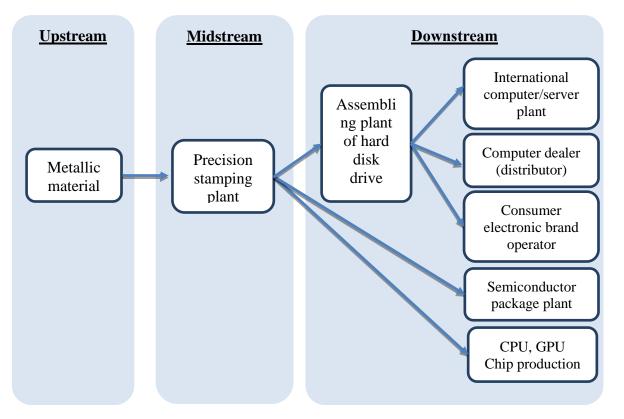

(3) Automation industry

Automation industry is the support industry of automation technology for other industries, belonging to the upstream industry with technology-intensive, service-intensive, non-mass production and many kinds of projects. This characteristic is the same at home and abroad, but the advanced countries abroad started earlier, the industry has developed and formed, and the world market is mostly occupied by it, while the scale of domestic automation industry is still smalldue to its late start. Because of the wide range of automation products and the high quality of technical services, there is still a lot of room for the development of domestic automation industry in the future.

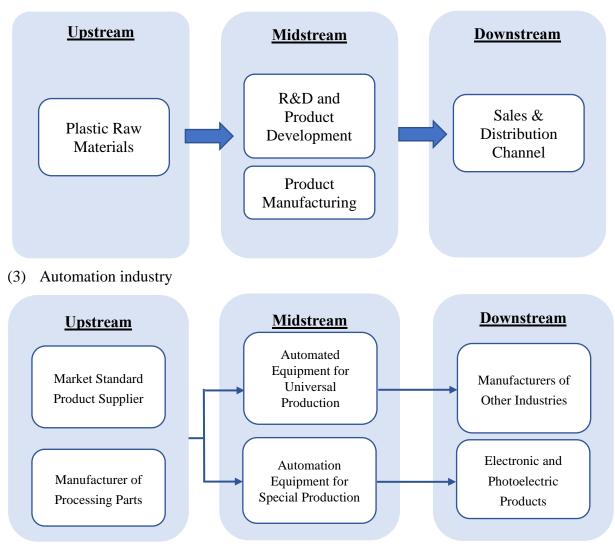

Automation refers to the combination of various types of computers, application software, sensors, control and communication technology, in order to replace or save labor, increase productivity, provide stable quality and increase efficiency. Various industries have different products and processes, and they need different functions of automation machines. Therefore, the demand for automation machines in industry is continuing. It is an important task for manufacturing industry to find manufacturers with the ability to design and manufacture automation equipment in order to manufacture automation machines that meet their needs.

Since 2008, China has applied the Active Contract Law, which expressly stipulates the protection of employment rights, including the provision of social insurance, overtime pay and severance pay. This has greatly increased the employing cost of enterprises, especially in the intensive manufacturing industry. In addition, due to the increase of employment opportunities and wages in China, manufacturers in coastal areas are facing fierce competition. In severe cases, there will be job shortages. However, automation will help to improve production efficiency, reduce employee costs, improve quality, and enhance competitiveness. Especially in the case of high wages and job shortages, it is expected that the demand for automation will increase year by year in the future.

- 2. Relevance to Upstream, Midstream and Downstream Suppliers in the Industry
 - (1) Precision Metal Stamping

(2) 2.Medical Consumables Industry

- 3. Trends of Product Development and Competition
 - (1) Hard disk drive industry

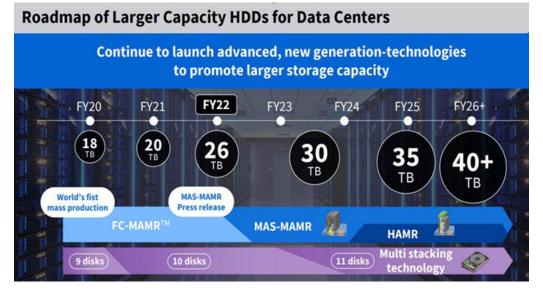

A. Development trend of hard disk products

In terms of future development of the hard disk product, the design to be applied to the non-portable product should emphasize the capacity and performance first. While the design of the hard disk product should emphasize breakthroughs on lower power consumption/power saving, lower heat dissipation, lightness and seismic resistance when applied to the portable products.

Observing the design trend of HD products in recent years, the most important technology development has been Energy-Assisted Magnetic Recording (EAMR) technology, population of series interface structure, HD encryption design, HD energy saving design, and potable HD proposals. With increasing demand of large data centers and server operators, HD manufacturers have invested more development resources into Nearline and other such large capacity HD research and production.

To correspond with the trend of big capacity HD and Nearline HDD products required by Data Centers, TOSHIBA expects to double the Nearline HDD capacity from now to 2025. The goal is to introduce 30TB in 2023, 35 TB in 2025 and 40 TB and above in 2026. The magnetic recording MAMR with magnetic acceleration supported by

microwave is undergoing and an 18TB HDD with FC-MAMR technology has been introduced in 2021. In December 2021, the experiment of increasing HDD memory density supported by MAS-MAMR was completed. The investment in existing HDD capacity mainly derived from the Philipines continues and new plants will be established in China. The goal is to double HDD capacity by 2025.

Source: Toshiba Corporation

B. Competitive situation of the hard disk product

Min Aik Precision Industrial Co., Ltd. produces a variety of stamping assemblies of the hard disk, therefore the competitive situations of all products are also different from each other according to different types of the products. The market competitive situations of the first two major products of the Group -- Voice Coil Motor Plate (VCM plate) and the stamping assembly of the hard disk drive shall be briefly explained.

The manufacturers from Southeast Asia or Taiwan are the main competitors of the Group. The main competitors of the VCM plate include Cheung Woh, KOBAKIN, Interplex (originally named as Amtek), CFTC and NHK Spring, the main competitors of the stamping assembly of the hard disk drive include IPT and NHK Spring. Because the stamping assembly of the hard disk plant has the high requirements -- high precision and high cleanliness, the entry threshold is high and the hard disk drive manufacturers rarely introduce and develop the new suppliers. The good and stable product quality is more important than the price competition. Based on slowdown of the hard disk shipment, the assembly suppliers have also begun to further merge, and the supply chain is also expected to be adjusted. With changing market environment and increasing demand of data center, the design of top and bottom plate of voice coil motor tends to have thicker materials and complicated design, which have promoted the threshold and technology of component suppliers.

(2) Medical consumable industry

A. Development trend of Medical consumable industry

The Covid-19 pandemic dominated every aspect of the medical device industry in 2020, and there was a surge in demand for products such as ventilators and Personal Protective Equipment (PPE), buffering the financial impact of the pandemic.

The pandemic also accelerated technological advancements that allow the treatment of care with limited physical contact, and the use of wearables that enable users to better

track their own healthcare indicators and needs.

Home-based treatments, supported by remote healthcare professionals, have also risen in popularity as patients look to decrease their exposure to the Covid-19, and seek alternative ways to access medical support. This new way of working – reflected by so many industries affected by the Covid-19 pandemic – will likely shift patients' expectations and preferences, leading to new 'norms' in the healthcare sector, and in turn the provision of medical devices.

Covid-related products aside, the medical device industry experienced an overall dip in demand during 2020 – but by early 2021 the sector was recovering well. The emergence of the delta variant in 2021 had less impact on the sales of non-Covid medical devices than the initial outbreak in 2020.

With recovery well on its way, the global market for medical devices is estimated to be better in 2021 – which is higher than for pre-pandemic 2019. In 2022, however, this recovery may be slowed by the emergence of the omicron delta variant.

B. Competitive situation of Medical consumable industry

A frenzy of merger and acquisition activity could spell opportunity for health care stock investors – especially in data, biotech, pharma, and medical devices.

The year 2021 went out with a bang for health care M&A action, with major tech companies getting in on the action. But this year should see lots more buys ahead with hundreds of billions of dollars waiting to be spent, according to several experts. Industry experts concur, with some noting it's a good time for some M&A activity in health care.

"Healthtech" is a natural target for more consolidation today on the basis that the space exhibits the classic advantages of scale, yet most companies are still-under scaled, such that larger players can bring the broader solution to fruition and achieve the natural scale advantages. Examples abounded in 2021, which could set the pace for 2022.

Over 2021, health records giant Cerner (CERN) got snapped up by tech giant Oracle (ORCL) for the hefty price of \$28.3 billion. Microsoft (MSFT) made a \$19.7 billion purchase of Nuance Communications, and Alphabet (GOOGL) partnered with HCA Healthcare Partners (HCA) to help its digital transition in health care. Apple (AAPL) meanwhile, is believed to be on the hunt for a health care takeover target of its own. Those events tee up 2022 for more M&A engagement. Overall, the activity in 2021 represented a more normal year of M&A investing and some level of deferred M&A from 2020. In 2022, M&A investments is expected to reach \$350 billion to \$400 billion, driven by all subsectors.

Already in 2022, medical device firm ShockWave Medical (SWAV) is attracting interest from Penumbra Inc. (PEN). Abbott (ABT), Boston Scientific (BSX) and Medtronic (MDT) are apparently eying the firm as well. Given the number of firms interested in a potential multi-billion-dollar deal, the expectation of more deals targeting the space is hardly a stretch.

(3) Automation Industry

A. Development Trend of Automation Industry

As a world-class factory, China mainland provides processing and manufacturing services for many world-class customers. Automation industry started late in the mainland, and the existing industry is still small. There is still a lot of room for development in the future industry. In addition, China's labor costs are increasing year by year, and the demand for automation equipment is increasing gradually. The trend

of industrial development in recent years, the most important technology is the integrated use of robots and the application of precision mounting and measuring equipment. In addition, according to the manufacturing layout of existing and new customers, the service area will also be extended to Asia Pacific region such as Vietnam, India and other regions.

a. Integrated Utilization of Robots

In recent years, the installed capacity of industrial robots in the world has been increasing at a rate of about 10%. Due to the increasing labor costs and the increasing requirements of assembly quality, more and more jobs have been replaced by robots to reduce the pressure of labor costs and work intensity. Robot technology will change factories in the next five years.

b. Application of Precision Mounting and Measurement Equipment

On the basis of improving the performance of the current consumer electronic equipment, the pursuit of thinning the product itself, accuracy requirements have been raised to the micron level for internal parts assembly, relying on manual work has been unable to meet the accuracy requirements, it is necessary to rely on automatic equipment to complete high-precision assembly and testing.

- c. In response to the 2020 COVID-19 epidemic, the pharmaceutical industry is developing rapidly, and the corresponding demand for automated production is generated to improve its quality and output.
- B. Competitive situation of Automation Products

The automation equipment produced by our company involves the integration and use of automation in various fields, from robots to assembly lines, from precision adjustment platform to complete process development. The R&D team is actively integrating existing mechanical, control, optical and software modules to construct more precise and high-speed manufacturing and processing equipment to meet the development needs of future equipment.

5.1.3 Technology and R&D

1. R&D expenses in the latest year and as of the publication date of the annual report:

Unit: NT\$ thousands

| Year | 2021 | |
|--------------------|-----------|--|
| A.R&D expense | 63,188 | |
| B.Operating income | 2,167,903 | |
| A/B | 2.91% | |

- 2. Technologies or products developed successfully in the latest year and as of the publication date of the annual report
 - (1) Min Aik Precision

| Year | R&D achievements | | | |
|------|---|--|--|--|
| 2021 | Large-area multiple asymmetric selective plating technology Masking and spraying painting technology for precision microelectronic three-dimensional parts | | | |

| 2022 | 1. Multi-Spindle Tapping Machine Development |
|------|--|
|------|--|

(2) MAPP

| Year | R&D achievements |
|------|---|
| 2021 | Design and built custom Automation machine for semi-con Plastic Carriers secondary process. In collaboration with a government institution, design and developed Vaginal Swab collection device. |
| 2022 | None |

(3) Suzhou Amould

| Year | R&D achievements | | |
|------|--|--|--|
| 2021 | Biopsy forceps Assembly Packing with birth control pills Packing with biopsy forceps | | |
| 2022 | None | | |

5.1.4 Long-term and Short-term Business Development Plans

- 1. Short-term plans
 - (1) Min Aik Precision

In order to serve the existing customers and develop the potential customers, the company shall continuously implement the pace of globalization in accordance with the requirements of the market and the customers while establishing the overseas production and service bases duly and continuously introducing the automation technology, to improve the capacity, the productivity and the product quality, achieve the goal of reducing cost, expanding market share of the products and accordingly improve the profitability. In addition, the company shall strengthen the strategic alliance with the service agent partners while expanding other niche markets, developing the products and increasing the existing market share. In allusion to the existing customers, the company shall also enhance the high involvement in the development stage of the new product, to improve the customer's trust and dependence on the company and acquire the first opportunity in mass production and the high market share.

(2) MAPP

The COVID Pandemic made global Vaccine makers to rethink their business strategy. To have a strong foot hold in Asia, many major player including Thermo Fisher, Merck joint venture, Sanofi and BioNTech decided to setup production and filling facility in Singapore. Also Singapore played key role in the COVID diagnosis supply chain, as 60% microarrays and one third of the world's thermal cyclers and mass spectrometers are manufactured in Singapore.

Singapore's MedTech Manufacturing eco system is the key factor to attract global key players to invest here. There more than 25 multinational MedTech companies have established their R&D presence in Singapore, with many investing in end-to-end capabilities ranging from product design, to optimization and validation. Also more than 50 regional headquarters from the world's leading MedTech firms are based in Singapore. Singapore is a hub for business model innovation, marketing and regulatory, and ecommerce to expand access in Asian markets.

MAPP will align resources and strategies to capitalize on this regional growth, both from MedTech companies in Singapore and developing economies like Vietnam, India and Indonesia.

MAPP will look for opportunities to collaborate with MedTech startups, institutes and hospital to develop and manufacture new products and technologies.

MAPP to look for post Covid opportunities from existing and new customers.

MAPP to work with MedTech companies by leveraging group automation capabilities to provide automation solutions.

MAPP will also continue to create value with existing customers, by tapping on any available funding support from the Singapore Government.

(3) Suzhou Amould

Utilize the ability of automation equipment to solve the problem of lack of manpower, reduce costs and improve production capacity to meet the needs of the market. Machine modular design integrates the production technology of machinery and equipment, quickly supplies the machinery and equipment needed by downstream industries. Modularizes similar equipment institutions in various industries. Only special or different parts need to be designed and developed when receiving new demands. In addition to speeding up the lead time, it can also reduce the cost of research and development. Coordination of excellent management and sales personnel within the group and injects new blood into the company to meet the needs of professionals at all stages of the company's growth.

- 2. Long-term plans
 - (1) Min Aik Precision
 - A. In terms of production: Min Aik shall actively cooperate with the strategic partners and establish a mode of division during production, to facilitate the control of the overseas inventory and make the timely adjustment and supply in real time in accordance with the changes of overseas customers' requirements. In this way, the transportation and process expenses may be effectively reduced, and the undertaking rate of the orders may be improved.
 - B. In terms of R&D: Min Aik shall maintain the technological improvement of the hard disk and the storage device, while continuously expanding the design, production and assembling technologies of other electronic assemblies and the assemblies for automobile and improving application of the production automation to mass production, inspection and packaging of the product.
 - C. In terms of marketing:
 - a. Min Aik shall consolidate and strengthen the existing business contacts with the customers having good relationships while creating the integrated advantages of Development and Manufacturing of Metal Assembly of Precision Hard Disk Drive in the field of storage, improving the customer satisfaction, expanding the proportion of the existing customers' orders and actively developing the potential customers and products.
 - b. Creation of other niche markets: Min Aik plans to gradually adjust the proportion of the hard disk customers in the future and increase the proportions of other 3C electronic products and the heat spreader, so as to gradually disperse the risk of the market.
 - c. Min Aik shall promote the field of professional Original Equipment Manufacturer (OEM) of the electronic parts and constitutive products to integrate the products

and advantages of the subsidiaries of the Group and provide the customers with the more comprehensive product line, added values, bases and services.

- d. Min Aik shall continuously focus on the metal stamping assembly market related to the automobile in response to the electronic trend of the automobile.
- D. In terms of quality assurance and environmental protection, Min Aik shall implement these policies related to quality assurance, environmental protection, labor and safety, such as ISO 9001, ISO 14001, ISO 22301, ISO 45001, IATF16949 and RBA (EICC), Automobile quality management system certification, while creating the high-quality products on the premise of meeting the specification of RoHS, fulfilling the social responsibilities, and enhancing the enterprise image and the international competitiveness.
- E. Operating scale:
 - a. Min Aik shall coordinate the industry boom and market development and adjust the diversified capacity, to increase the operating scale.
 - b. Except continuous research of the main products and diversification of product development, Min Aik shall adhere to the concept of "Sustainable operation", and develop towards the direction of enterprise cluster, in order to implement the management of various business systems.
- (2) MAPP
 - A. In terms of production: Progress towards a Smarter factory through continuous efforts to automated our production process (minimize reliance on human and for better quality and productivity). Develop and introduce the use of Cobots (Collaborative Robots).

To vertically integrate with customer needs, MAPP target to expand its offering from production to complete packaging and sterilization for MedTech devices.

- B. In terms of R&D:
 - a. To work with prestigious institutes in Singapore in developing New Technologies in MedTech and industrial Automation.
 - b. Automatic Optical Inspection: To replace human browsing for better quality output to customer and better factory productivity.
 - c. Sale of automation machine and provision of automated assembly services to existing customer.
 - d. Sale of automation machine and provision of automated assembly services to existing customer and venture into new markets.
 - e. ODM: To collaborate with promising Startups and institutions to develop innovative products and venuture into new markets.
- C. In terms of marketing:
 - a. Expand footprint into high potential developing countries within Asia/ASEAN
 - b. Continue exploration of new manufacturing technologies such as 3D-Printing, Precision Machining, Silicon Moulding and Thermoforming Moulding
 - c. Seek opportunities for collaborative innovation
 - d. Work with MedTech companies to jointly develop MedTech products.
- D. In terms of quality assurance and environmental protection:

The company is ISO 9001 (Quality Management System) and ISO 14001 (Environmental Management System) certified. We are also ISO 13485 (Medical Device; Design & Development) certified to be able to design and manufacture medical components. Target to get Good Manufacturing Practice (GMP) and FDA certification for the plant to manufacture medical device. As our operations does not produce pollution, we are not bound by any government regulation on pollution control.

E. Operating scale:

Continue to search for new businesses and strategic alliances to increase our customer base. As and when there is additional demand from customer, we will expand our production capacity and increase our scale of operation. We are also constantly on a look out for potential business acquisitions that are aligned with our core competencies.

- (3) Suzhou Amould
 - A. In terms of production: Promote modular process program control system, strengthen process management and shorten production time to stabilize product quality.
 - B. In terms of R&D: On the basis of existing technology, develop more mature technology, integrate machine and equipment production technology with modular design. When receiving new customer needs, only design for special or different parts can accelerate the delivery speed and reduce R&D costs.
 - C. In terms of marketing:
 - a. Consolidate and strengthen business contacts with existing good relationship customers. Improve customer satisfaction and expand the proportion of orders of existing customers and develop potential customers and products actively.
 - b. Understand the company's competitive advantages, find market entry points, seek quantitative product production plans in stable cooperative relationships, and share benefits with customers.
 - c. Predict customer demand, prepare beforehand and take the initiative to attack.
 - d. Understanding the needs of traditional manufacturing and medical industries, providing complete solutions to potential customers and expanding new businesses.
 - D. In terms of quality assurance and environmental protection:

Implementing ISO 9000 and conforming to RoHS standards to enhance corporate image and international competitiveness.

- E. Operating scale:
 - a. In line with the development of the industrial boom, we should choose the right time to expand production capacity to increase the scale of operation.
 - b. In addition to the continuous research of major products, and the development of multi-directional integration and utilization of automated products.

5.2 Market, Production, and Sales Review

5.2.1 Market Analysis

1. Sales of main products (services)

| Unit: NT\$ thousands | | | | | |
|--------------------------|----------|--------------|------------|--------------|------------|
| Amount | | 2020 | | 2021 | |
| Area | | Sales volume | Proportion | Sales volume | Proportion |
| Sales in domestic market | | 255,747 | 13% | 379,276 | 18% |
| | Asia | 1,432,105 | 75% | 1,533,462 | 71% |
| Export sales | America | 225,681 | 12% | 245,398 | 11% |
| | Europe | 8,167 | 0% | 9,767 | 0% |
| | Subtotal | 1,665,953 | 87% | 1,788,627 | 82% |
| Total | | 1,921,700 | 100% | 2,167,903 | 100% |

2. Market Share

(1) Min Aik Precision

The company insists on creating the integrated advantages for development and manufacturing of the stamping assembly of the all-round hard disk drive in the storage field, and expects to make the operation of the Group more diversified through the efforts in product diversification. At present, among the only three major manufacturers of the hard disk drive in the world, the company's products have been used by the first two major American hard drive manufacturers, and more successfully adopted by the third largest Japanese hard drive manufacturer. The company has laid a solid foundation in the supply chain of the stamping assembly of the hard disk drive, extended the product line to other electronic assemblies and successfully become the supplier partner trusted by the large international factories.

From the perspective of turnover in 2021, HK driver stamping parts, which accounted for 70% of the company's total turnover, represented our major products greatly supplying important HD driver assembly customers (WD, Seagate, Min Aik, MMI, ShinEtsu). The global market share of our major product VCM plate was about 25.5%.

Global market share of the company's main product in 2019 and 2021 VCM plate

| | | Unit: | Million sets |
|--|------|-------|--------------|
| Year | 2019 | 2020 | 2021 |
| Shipment of the company (SET) | 60.7 | 64.4 | 66.0 |
| Shipment of the hard disk drive all over the world | 320 | 260.3 | 258.9 |
| Market share of Min Aik | 19% | 25% | 25.5% |

Source: Forbes and shipment statistics of the company.

(2) MAPP

Medical consumables produced by MAPP are shipped to Europe, America, Japan, SEA, etc. Due to the wide variety and vast geographical distribution of medical consumable products, there is no industry statistics available to calculate the market share of a single product.

(3) Suzhou Amould

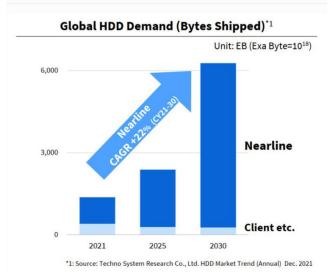

Suzhou Amould is a professional manufacturer of customized automation equipment. The manufacturing process of the industry is extremely complex and the equipment needs to

fully meet the specific needs of customers to design and plan. Therefore, there is no certain product specifications, and there are many types of automation equipment. Each manufacturer of automation equipment has its own areas of specialization and development, and there is no perfect competitor, Thus, there is no complete and objective market share statistics available.

- 3. Market supply and demand
 - (1) Hard disk drive industry

A. Supply and demand situations of the market

The growth of personal and home NAS and the NAS market for small- to medium-size businesses and the demand for security monitor, cloud storage, data centers, and other such HD storage applications will be continuous and stable. The annual demand growth rate of the three major HD driver manufacturers, i.e., Western Digital, Seagate, and Toshiba aiming at the PC industry that uses HD most is negative. They all have continuously adjusted steps to improve business operation and profit through solid manpower structure, solid product structure, production line adjustment, and expansion of Nearline HD production methods. Meanwhile, inventory and capacity control has also allowed for the stable rise of average prices in the overall market.

B. Future growth and development trend of the industry

Nowadays, the demand for storage of the market has broken away from the demand of the pure PC, the consumer electronics and the enterprise users. The hard disk develops toward the diversified application, and the Unmanned Aerial Vehicle (UAV), Virtual Reality (VR), Augmented Reality (AR), cloud, Big Data analysis, embedded system and Internet of Things (IoT), security monitoring and other markets have become the main impetus of driving the growth of the storage demand. On the other hand, the demand for the 4K/8K high-resolution digital images makes the data storage requirement constantly increased. Besides the enterprise-level hard disk market, the nearline storage hard disk market of the individual or the small and medium-sized enterprise is nonnegligible as well. The capacity requirement of the storage and recording device will also be greatly increased with the subsequent development of 5G, Artificial Intelligence (AI) and automatic driving. Especially, the expected popularity of IoT technology brought by 5T era will lead significant growth of giant storage demand from AI application and big data analysis.

The annual shipment of HD drivers (see table below) .It is expected that the overall shipment of hard disks will be reduced to about 234 million sets in 2022.

| Shipment of hard disk drives from 2018 to 2022 |
|--|
|--|

| | | | | Uni | it: Million sets |
|------------|----------|----------|----------|----------|------------------|
| Annual | 2018 | 2019 | 2020 | 2021 | 2022 |
| projection | (Actual) | (Actual) | (Actual) | (Actual) | (Forecast) |
| Total | 375 | 320 | 260 | 259 | 234 |

Source: The statistics and evaluation of Trendfocus and the company

a. The applications of PC related fields

The evaluation of the PC market in 2022 will be back to its core issue. However, with the impact of inflation arising from the war between Russia and Ukraine as well as COVID-19 has meant that shipments will be changed from original growth to remain the same or even drop. Nonetheless, these fluctuations are limited without the risk of collapse.

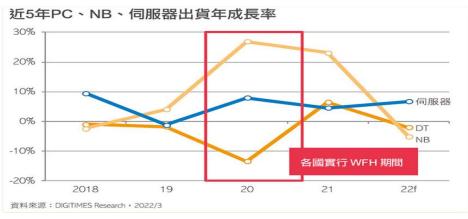

The downstream electronic foundry in Taiwan plays a decisive role, occupying more than 60% of the global PC assembly. Among them, NB shipments are over 75% and server shipments over 90%. Following the increasingly maturing foundry industry, orders are more concentrated and therefore, the view that big electronic foundry plants as a means to prosperity will be the trial bullion that the market should pay attention to.

The shipment of NB has been driven up rapidly after the pandemic spread worldwide as the demand for working and studying at home continues to grow dramatically. This trend will be continued until the end of 2021. Following the conclusion of tenders for the education market and an increasingly saturated consumer market, most plants are conservative but optimistic regarding the shipment and evaluate that the growth will be the same or in the single digits.

b. Server product related fields

The HD brand Seagate proposes five major storage trends in 2022: post-quantum cryptography technology is ready to take off; the rise of distributed storage networks; object storage resolutions introduced by more enterprises; dynamic allocation storage promoted by cloud-native software; application development and fabrics are still important to support distributed frameworks based on the surging demand for data storage. It shows current conditions that data growth and spread are unprecedented when new technologies like auto-drive, smart city, edge and cloud data centers are launched. All these trends will lead to the long-term demand for storage.

Compared to PC in the same situation, the server industry is still hot and no doubt that it will grow in 2022.

(2) Electronic Components

A. Supply and demand situation of the market

The benefit of the pandemic is that the demand for NB, tablet and desktop computers are increasing. Since product specifications are continuously enhanced, processor efficacy requirements are increasing and leading to the popularity of advanced processes. However, material shortages and delayed distribution pose a challenge to supply chains.

The 5G penetration rate is increasing continuously; the annual average compound growth rate of 5G has exceeded 100% from 2019 to 2015. The sales volume of global 5G mobile phones is expected to be upward of 1.43 billion. Regardless of the types and quantities of core processors of mobile phones, 5G communication components like base, power management IC or memory, lens sensors or driver ICs are all increasing dramatically.

Cloud computations are growing rapidly and top network leaders like Google, Apple, Facebook and Amazon have a much higher demand for chips with high calculation power. Since the process evolution cannot catch up with data growth and AI demand, these computations will consume much power. Therefore, these network leaders have started to invest in the design and development dedicated to AI chips and hope to create the most efficiency with the lowest power consumption. This would be great news to the chip foundry.

Emerging applications are coming one after another. The demand includes power semiconductors led by the demand for carbon reduction, ID device demands driven by the pandemic, automobile electrification, smart trends, and types and quantities of semiconductors like MCU, MPU, and FPGA are all increasing significantly.

Meanwhile, the serious chip shortage is also making policy changes in different countries' semiconductor industries from global work division to protectionism. The US, EU, India, Japan and China are establishing autonomous semiconductor capacities as national policies. This may likely cause a shift in the supply chain. Since the supply chain of Taiwanese companies is complete, they have become the top choice for all countries seeking cooperation.

B. Growth and development trends of the industry in the future

The semiconductor industry has reached new peaks every year since 2020. The demand for a contract-free economy and digital transformation promoted by the pandemic is not as large as the gradually matured, converging new technologies and new applications forming these channels. After experiencing the full capacity and short supply in 2021, supply and demand are expected to gradually balance in 2022. In the meantime, the types and quantities of end electronic products will become the driver of the semiconductor industry. The annual compound growth rate of the global semiconductor market is expected to be 3.7% from 2021 to 2025.

- (3) Medical consumable industry
 - A. Supply and Demand of Market

The Life Science Industry which directly or indirectly involved in COVID diagnosis and medications seen surge in demand. These demand expected to normalize once the pandemic becomes endemic. Investments in Vaccine related products expected to grow as companies expanding their market reach. These will create new opportunities for manufacturing industries involved in those supply chain.

The novel coronavirus pandemic has disrupted the supply chain across all industries

and sectors, with the medical device industry hit especially hard due to delay in hospital care procedures as majority of hospital resources were allocated to handle the pandemic.

B. Future Growth and Development Trend of the Industry

As the number of COVID-19 cases begins to stabilize in many countries, and governments begin to ease lockdown restrictions, elective procedures are resuming. When patients will become confident enough to undergo procedures will depend on numerous factors, including local infection rates and the complexity and necessity of the actual procedures. Thus, there will be some return to normal for medical device companies, but the recovery period is likely to be uneven and drawn out.

- (4) Automation Industry
 - A. For consumer products, the E-car industry, medical industry and traditional industry upgrading trend of increased automation equipment requirements, and the inevitable trend for the future industrial upgrading. Effected by the COVID 19 plus major manufacturing areas of artificial increases year by year, so the demand of future automation dedicated machine equipment is short due to unstable demand influence customer's devotion to equipment will, but with a longer-term automation equipment requirements will be increased year by year Supply and Demand of Market

The demand for OEM products and quantities in the downstream of automation is relatively stable and persistent. The demand for 3C products such as mobile phones and computers has stabilized.

- B. Future Growth and Development Trend of the Industry
 - a. Memory

In recent years, the sales volume of domestic intelligent hardware industry has shown explosive growth. With the continuous development of Internet of things, cloud computing, artificial intelligence and other technologies, differentiated intelligent products emerge in an endless stream, and the functions are constantly upgraded and iterated quickly. The memory market still has broad application prospects in the future.

b. LED

With the continuous development and subdivision of the downstream application of LED, the market penetration has gradually increased. In consideration of efficiency, quality and cost, more and more led enterprises are bound to adopt automation equipment.

c. 3C electronic products related fields

According to data from market surveyors, the global growth trend of smart phones has slowed down, and demand for other personal devices is no longer strong, but products for virtual reality experience are on the rise.

d. Traditional industries

According to media reports, in recent years, countries around the world have encouraged their domestic industries to introduce automation in order to improve per capita output value. Some countries have proposed preferential measures or tax deductions to accelerate the introduction of automation.

e. Medical Industry

Medical industry is one of its pillar industries in Singapore. The local government has given more support to the medical industry.

It also gives incentives and preferences to the automation industry related to medical products.

- 4. Competitive Niche
 - (1) Min Aik Precision
 - A. Cost and capacity advantages

The company implements consistent operation and lays a strong design, development and production competitiveness by combining with production, manufacturing, R&D, marketing, management and other competitive advantages, including the mould design capability, simulated design of Computer Aided Engineering (CAE), process development capability, automation machine design, dust-free room production, good management technology and supply chain management in operation and management. The company focuses on the efficiency, technology and shortening of the process with the way of perpendicular integration and production, and further reduces the manufacturing and R&D costs to accordingly improve the market competition. In presence of introduction of the ERP material requirement system, the cost can be controlled more effectively. Therefore, the company is more competitive than any other competitors.

B. Complete quality assurance system and strict quality control

The company is committed to wholly improving the quality. Besides passing the certification of ISO 9001, ISO 14001, ISO 22301 IATF16949 and ISO 45001 Automatic quality management system certification, quality and environmental system and full implementation, the company adheres to the principle of "Innovation-centered, management-based and quality first" to achieve a high-quality level while producing the products with high added value and low pollution to maintain stable and sustainable operation. In this way, the company is well received by the customers, thereby consolidating the long-term partnership.

C. R&D capability of new product

The company adheres to the consistent integration to provide the most complete and rapid R&D services and the most real-time professional technology through the team technology; in this way, the requirement of new development is handled preferentially and properly. The company assists the customers to shorten the R&D time of the new products, thereby facilitating the launch of the new products to the market within the shortest time and making the customers enjoy the higher profits by. Recently, industry-university cooperation has also been introduced, and there has been constant emphasis on improving design and production technology.

D. Flexibility

The company masters the market trend and the customer needs at any time while actively and continuously analyzing and adjusting all details from design, production and even shipment and logistics of the product in order to grasp the market opportunity and make a response to the increasingly competitive market.

E. Diversified development

The products of the company are more diversified than any other competitors. Besides the VCM plate developed for the hard disk drive, the company also develops the stamping assembly of other hard disk drives, such as Disk Clamp, Balance Weight, Insert Plate, Bobbin, Stiffener, Pin and Protector in accordance with the customers' requirements, and actively expands the capacity and the overseas bases, in order to fight for making the other electronic assemblies, such as the heat spreader, the consumer electronic parts and the electronic parts for automobile become the focus of the company's development at this stage and achieve the remarkable growth.

F. Maintain the good and mutually beneficial partnership with the customers

Because the service life of the hard disk drive product is prolonged and the technical and professional requirements are improved, it is not easy for other manufacturers to enter except the existing leading manufacturers. The company has many years of professional experiences in manufacturing, and has established the stable and mutually beneficial partnership with the customers. Moreover, the company plays an indispensable role in the customer supply chain.

- (2) MAPP
 - A. Superior Automated Production Capabilities

Automated production capabilities is one of the core competitive advantage of Min Aik Precision Group. Apart from its main business of assisting customers to improve their production efficiency through automation, it is also used to increase the production efficiency of the Group's various business units. Due to the rapid increase in labor cost in Singapore, the Group invests in automated inspection equipment for MAPP to reduce its production cost, improve output quality and efficiency. The Singapore Government also encourages local companies to improve productivity by offering various incentive schemes. MAPP has therefore used some of the grants available to improve its internal process, productivity and quality and thereby giving it an added advantage against overseas competitors.

B. Geographical proximity to international companies

With the aging population, increasing affluence and rise in chronic diseases, the Singapore Government has identified the healthcare sector as one of the key growth cluster. Singapore can therefore expect to see more commitment from the government in investing resources to help flourish this sector. Greater commercialization of products by locals and MNCs of health solutions will indirectly provide more business opportunities to MAPP.

As majority of European and American medical equipment manufacturers set up their Asia-Pacific headquarters in Singapore, MAPP will have better opportunity to have face-to-face discussions and visit these international medical companies to demonstrate MAPP's production and technical capabilities and sell its products to Europe and USA. Furthermore, MAPP may have the opportunity to work together with these key market players to expand into the developing countries.

C. Excellent mold making capabilities and abundant clean room capacity

Medical products are generally low-mix high-volume in nature and must be produced in a highly clean condition. MAPP has the largest cleanroom capacity in Singapore. The Group's long-established knowhow in mold-making allows it to support diverse requirements from medical customers.

D. MedTech Manufacturing expertise and Know-how:

MAPP has developed internal system and protocols that suits very well for various medical device and life science manufacturing needs. From Medical device specific raw materials selection to R&D and Mold fabrication, MAPP differentiates from market.

- (3) Suzhou Amould
 - A. Complete Quality Assurance System and Strict Quality Control

Suzhou Amould is committed to improving its overall quality. Besides being certified by ISO 9001/TS16949/ISO 13485/UL and fully implemented, the company also has strict control over the improvement of production efficiency and design and R&D skills, so it has won the favor of large manufacturers and affirmed and consolidated the long-term partnership.

B. R & D capability

Suzhou Amould can provide customers with instant technical services, help customers shorten the time of new product development, so as to facilitate the launch of new products in the shortest time, and enjoy higher profits. Participate in customer R&D and design, grasp change trend of design and schedule, and improve design productivity.

C. Flexibility

In addition to keeping abreast of market trends and customer needs, Suzhou Amould has taken the initiative to analyze and adjust all the details of product design, production, shipment and even all the details in order to grasp market opportunities and cope with the increasingly competitive market. At the same time, it can adapt to the needs of customers, upgrade the previous generation of equipment to produce new products, and help customers reduce capital investment, thus attracting more customers.

- 5. Favorable and Disadvantage Factors for Development Prospects and Corresponding Strategies
 - (1) Min Aik Precision

Favorable Factors

A. Expectable industrial and market growths

With the rapid development of the information, the consumer electronic products, and the cloud digital demand, the company is committed to improving the technology, quality, cost and market of the assembly of the hard disk drive, and also gets involved in application of the mainstream consumer electronic assembly and the field of the high-stability electronic assembly for automobile, to maintain the continuous growth of the customers and the market.

B. High entry barrier for the new competitor

Because the hard disk drive industry is featured with intensive technology, prolonged service life of the product, high innovation pressure and other characteristics, the hard disk market is more closed than other industries and has the high technology barrier. In order to ensure maximization of the speed and the efficiency, and accordingly gain the technological and market opportunities, the relationship between the upstream and downstream manufacturers of the hard disk drive industry is very close. Therefore, it is not easy for the competitors outside the industry to enter into the market.

C. Unique niche in management, production and quality

The company has the complete management system and excellent technical personnel which are conducive to the long-term operation and development of the technology, and has rich experiences in plant management and perpendicular integration advantages. Therefore, the company can accurately master from the upstream mould design, precision stamping, vibration grinding in the post process and electroplating to the operating environment and technology of the dust-free room.

In addition, in order to fulfill the commitment to the quality and the environment, the company has passed the certification of ISO 9001, ISO 14001, ISO 22301 TS16949 and ISO 45001, and actually implemented all quality control requirements in the actual

operation. Therefore, the product quality of the company is fairly stable and well received by the major customers every year.

D. Master the market demand and marketing channel

In order to expand the overseas market and provide the customers with the real-time services, the company has set up the overseas storage locations in mainland China, Malaysia and Thailand, so as to master the market trend and the industrial information while timely scheduling and offering the services. In the era that the channel means the business opportunities, the good channel is the important niche for the company's development in the future.

E. Maintain long-term and good cooperation with the world-class plants

Most of the main customers of the company are world-class plants, with fairly strong finances and operations. Due to years of development in the hard disk drive market, the company has established the good and tacit cooperation with the customers in R&D and production of the products and has been well received by the customers in terms of quality and service. Therefore, the company can keep up with the market trend at any time in mastering the key technologies and improving the production efficiency.

F. Solid R&D and design capability

In order to implement the in-depth development of the R&D technology, the company adheres to the concept of training the professional talents to promote the high-tech and sophisticated technology and accordingly meet the industry requirements and challenges. The company recruits the elites of the industry and has been continuously ensuring the continuous improvement of the R&D technology through a series of R&D training plans, such as the internal technology inheritance of the company, internal/external education and training, and technical exchanges with the academic societies.

Disadvantage Factors

A. Lack of the professional talents of the hard disk product and inadequate domestic labor supply

Because Taiwan is lacking in the professional talents of the hard disk industry, the company should train the relevant talents every year and work on making the human resource planning, in order to handle the changes of the industry.

Corresponding Strategies

- a. Since its establishment, the company has been committed to improving the automatic production and process to improve the unit output of the grass-roots human resources while further improving the degree of automation of the plant, and reducing the dependence on manpower by increasing the automatic machine and equipment.
- b. The company strengthens the pre-service and on-the-job training of the employees to improve the personnel quality and productivity, and is committed to planning the human resources and strengthening the welfare of the employees, to effectively reduce the turnover rate of mold the employees.
- B. The company has high degree of industrial concentration which accordingly increases the operating risk.

The operating income of the products related to the hard disk drive of the company was 37.6% of the operating income of the whole Group in 2021. If the industrial supply and demand change greatly or the imbalance occurs between the supply and the demand,

the company may be trapped in operating pressure.

Corresponding Strategies

The company actively develops other non-hard disk electronic assemblies, such as the heat spreader, the consumer electronic parts and the electronic parts for automobile. In order to make the products of the company more diversified, multiple key technologies and products are being actively developed, including the heat spreader for the advanced IC packaging, the heat spreader of the base module, the cell phones, the portable devices, the steel sheet, the aluminum sheet, the radiator for automobile and so on. Moreover, the company also makes the customers and products of the Group more diversified through implementing the strategic merger and acquisitions at home and abroad and setting up the overseas bases.

(2) MAPP

Favorable factors

- A. The Singapore Government has actively developed the country to become Asia Pacific's biomedical hub.
- B. New vaccine manufacturing and filling plant investments in Singapore from Sanofi, Thermofisher and many other leading players.
- C. Labour crunch and Industrial 4.0 movement increasing demand for automation solutions in Southeast Asia.
- D. High capital investment cost with long validation and qualification processes have become barrier for any potential entrants.
- E. Increasing investment in MedTech Industries by private and government entities.

Unfavorable factors

A. Insufficient supply of labor has always been a hindrance factor for Singapore's economic development. The increase in basic wages and shortage in labour supply has result in the rising manufacturing costs.

Corresponding Strategies

Dedicated human resources planning, employee benefits, on-the-job training to improve employee quality and productivity are some of the staff retention measures. Automation of factory processes and increase in use of automation equipment also help to reduce the dependence on human labour.

B. Increasing energy cost, oil price, shipping cost and lead time of raw materials due to COVID-19.

Corresponding Strategies

Establish supply chain arrangements with raw material distributors, get customer forecast earlier and scheduled cargo planning to manage costs.

(3) Suzhou Amould

Favorable factors

A. Prosperity of Industry and Market Growth

With the rapid development of demand for consumer electronics products, automation replaces manual labor with automation machines to achieve the same cost reduction and improve product quality stability. There are various products and processes in various industries, and the functions of automation machines are different. It is expected that with the increasing competitiveness of automation technology, quality and cost, automation will be applied more widely and demand will continue to grow.

The increase of labor cost in mainland China by about 6% every year will inevitably lead to the rapid introduction of automation process to reduce the cost of human resources and also reduce manufacturing risk of chain-break due to uncontrollable factors(such as COVID-19)

B. Unique In terms of R&D in management, production and quality

In addition to the complete management system and excellent technical personnel, which is beneficial to the company's long-term operation and deep cultivation of technology, the other advantage is our company also has rich experience in factory management and vertical integration. Our company could grasp the process development, software integration, mechanical and fixture design accurately.

C. Solid R&D and design capability

In order to further develop R&D technology, the company not only collects the elites of the industry, but also continuously ensures the continuous improvement of R&D technology through a series of R&D training programs, such as internal technology inheritance, internal/external education and training, and technical exchanges with academic groups.

Unfavorable Factors

A. Lack of professional design and R&D talents in automation industry and insufficient supply of domestic talents.

Due to the shortage of relevant professionals, our company devotes itself to human resource planning in order to cope with the fluctuations of the industry while training relevant talents every year.

Coping strategies

Strengthen the pre-service and on-the-job training of colleagues, improve the quality and productivity of personnel, and devote to human resources planning and strengthen the welfare of colleagues, so as to reduce the turnover rate of personnel effectively.

Set up automation R & D center in Taiwan to undertake customer demand assessment projects simultaneously, improve efficiency and human coordination flexibility.

B. The homogeneity of the target market of domestic equipment manufacturers is too high. At the same time, we are facing the catch-up of the mainland manufacturers and the pressure of competition is too high.

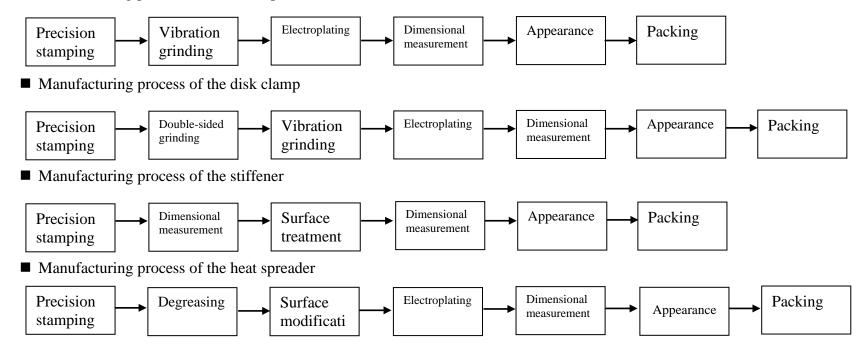

Coping strategies

Enhance the overall competitiveness, speed up the delivery speed, rectify design ingenuity, enhance customization capabilities. And expand new customers through the understanding about other markets.

5.2.2 Important Use and Manufacturing Processes of Main Products

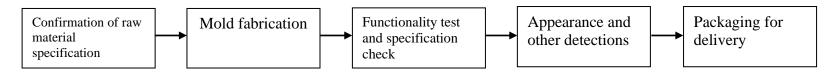

- 1. Important Purposes of Main Products
 - (1) Min Aik Precision
 - A. VCM plate: the VCM plate is mainly taken as the drive motor of the magnetic head when assembled with the VCM with the permanent magnet and responsible for driving the radial movement of the magnetic head, in order to make the magnetic head change the track arbitrarily on the disk and accordingly read and write the data.
 - B. Disk clamp: the disk clamp is mainly used to fix the hard disk and the spindle motor so that the disk can be driven to rotate by the spindle motor.
 - C. Automatic stiffener: The major function is to reinforce the metal support as required by the electric circuit board and is made of a metal material for the local welding of parts or reinforcement to facilitate assembly
 - D. Heat spreader: The major function is to spread heat of high-end packages and semiconductor components. It equally diffuses several hot spots in the chip to the surface of the heat spreader to equally spread the heat source and achieve the heat dissipation effect.
 - (2) MAPP
 - A. Plastic medical components: Mainly non-invasive medical plastic components, such as needle tubes, infusion tubes, etc.
 - B. Plastic components for DNA diagnostic testing kits: Mainly used by hospital medical laboratories, biochemical laboratories, etc., to carry out medical testing for data analysis or various physiological reactions and pathological analysis.
 - C. Mold fixture: Used for production of plastic injection products.
 - D. Automation: Automated Optical Inspection, Automated product assembly and packaging.
 - E. Precision plastic products for semi-conductor and various other industries.
 - (3) Suzhou Amould
 - A. SMT RF Test integration equipment: The main function is to fully automate SMT RF test section, including integration: test equipment, transmission pipeline, communication system, Robot.
 - B. Memory card test equipment: the main function is to achieve the memory module loading and unloading related path and test memory module related functions.
 - C. Magnetic flux measuring machine: The main function is to measure whether the magnetic flux of the magnet assembled on the housing is within the range.
 - D. Multiple Types of Mylar Mounter: The main function is to identify Mylar of different sizes and mount it accurately on the specified parts.
 - E. Medical product assembly and testing equipment: the main function is to assemble and test all parts of medical disposable products to achieve the output of finished products.

- 2. Manufacturing Processes of Main Products
 - (1) Min Aik Precision
 - Manufacturing process of the VCM plate

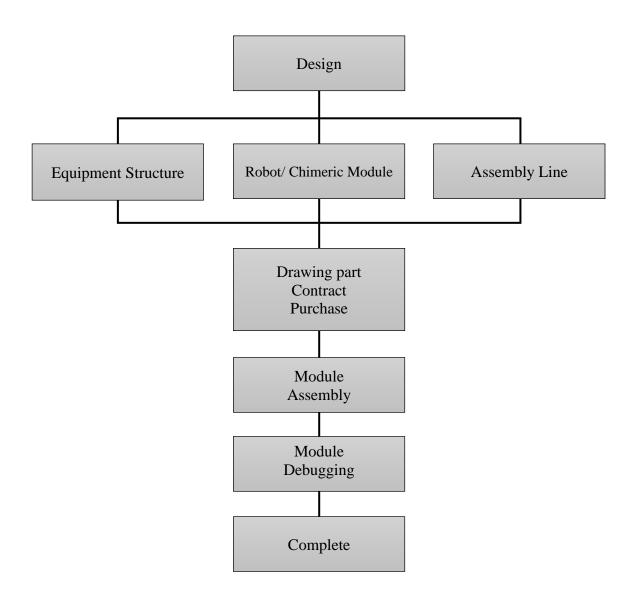

(2) MAPP

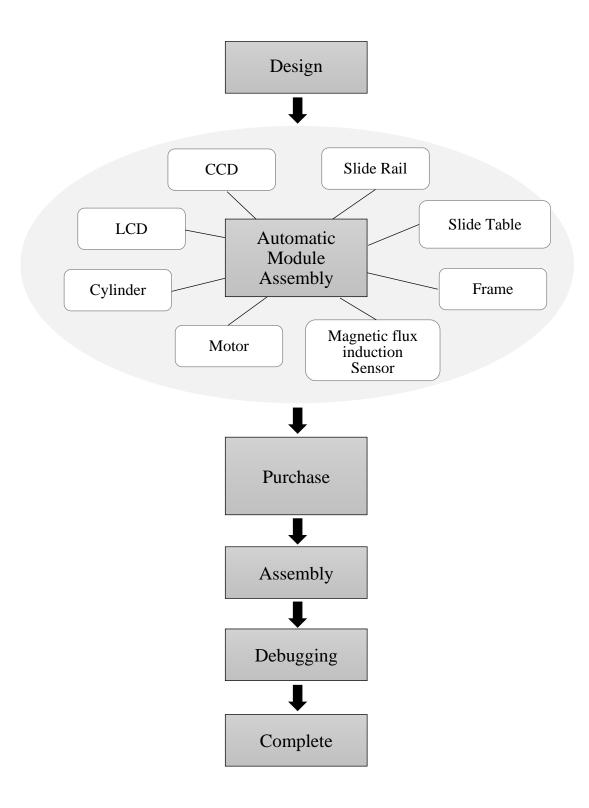

■ Manufacturing process of the medical plastic product

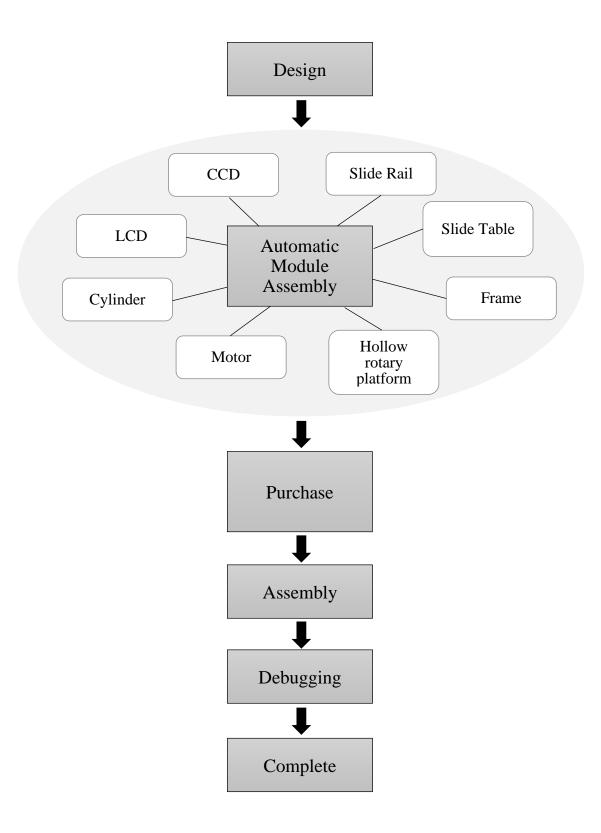

- (3) Suzhou Amould
 - Manufacturing process of SMT RF Test integration equipment/ Manufacturing process of SSD Testing equipment

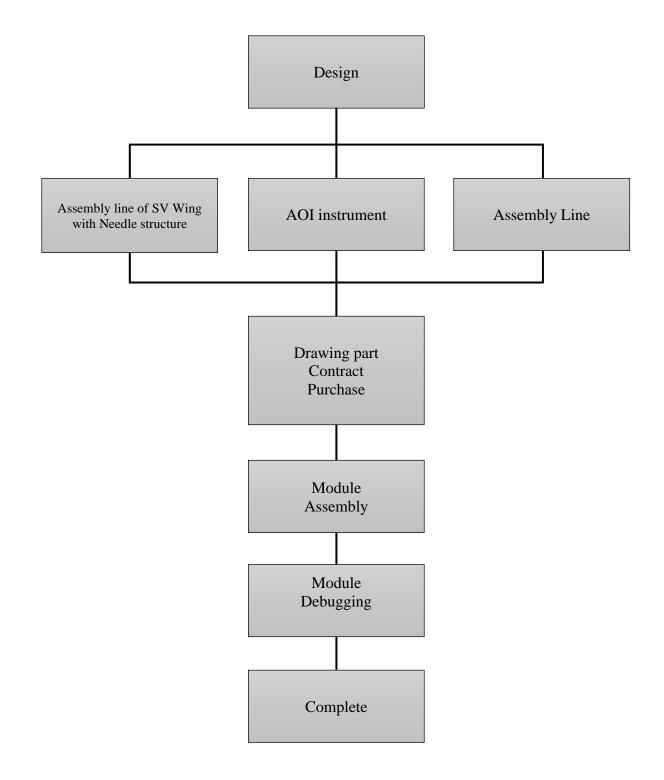

■ Manufacturing process of Magnetic flux measuring machine

■ Manufacturing process of Multiple Types of Mylar Mounter

■ Medical product assembly test equipment manufacturing process

5.2.3 Quality of Supplied Main Raw Materials

(1) Min Aik Precision

| Name of Main Raw Materials | Main source | Quality of Supply |
|-------------------------------|-------------|-------------------|
| Iron | Taiwan | Good |
| Electroplating solution | Taiwan | Good |

(2) MAPP

| Name of Main Raw Materials | Main source | Quality of Supply |
|-------------------------------|-------------|-------------------|
| Plastic resin | Singapore | Good |

(3) Suzhou Amould

| Name of Main Raw Materials | Main source | Quality of Supply |
|-------------------------------|-------------|-------------------|
| Machined part of the rack | China | Good |
| Electromechanical parts | China | Good |

5.2.4 The name of the suppliers (clients) and the amount and proportion of the goods in which the 10% total amount of goods has been accounted for in either of the two most recent years, and the reasons for the increase or decrease.

1. Suppliers accounted for at least 10% of annual consolidated net procurement in recent two years

Unit: NT\$ thousands

| | 2020 | | | | 2021 | | | |
|------|--------------------------|---------|-------------------------------|----------------------------|--------------------------|-----------|-------------------------------|----------------------------|
| Item | Name | Amount | As % of total net procurement | Relation to the Company | Name | Amount | As % of total net procurement | Relation to the Company |
| 1 | AB Company | 81,471 | 9.18 | None | AB Company | 145,400 | 13.31 | None |
| 2 | CD Company | 82,738 | 9.33 | None | CD Company | 141,668 | 12.97 | None |
| | Others | 722,947 | 81.49 | _ | Others | 805,398 | 73.72 | _ |
| | Total net procurement | 887,156 | 100.00 | _ | Total net procurement | 1,092,466 | 100.00 | _ |

Reasons for increase or decrease:

(1) AB and CD Company are both of the company's major suppliers of iron materials. Due to increase in the overall revenue in 2021, and the cost and demand of iron materials are increased, the net purchases amount and the proportion of purchases from AB and CD company are increased compared to 2020.

2. Customers that accounted for at least 10% of annual consolidated net revenue in recent two years

| Unit: | NT\$ | thousands |
|-------|------|-----------|
|-------|------|-----------|

| | | 2020 | | | | 2021 | | | |
|------|----------------------|-----------|------------------------------|----------------------------|----------------------|-----------|------------------------------|----------------------------|--|
| Item | Name | Amount | As % of total net Revenue | Relation to the Company | Name | Amount | As % of total net Revenue | Relation to the Company | |
| 1 | Min Aik Group | 464,497 | 24.17% | related party | Min Aik Group | 462,936 | 21.35% | related party | |
| 2 | J Company | 300,448 | 15.63% | None | J Company | 349,158 | 16.11% | None | |
| 3 | S Group | 252,325 | 13.13% | None | S Group | 253,359 | 11.69% | None | |
| 4 | — | _ | _ | | A Company | 217,629 | 10.04% | None | |
| | Others | 904,430 | 47.07% | _ | Others | 884,821 | 40.81% | _ | |
| | Total net Revenue | 1,921,700 | 100.00% | _ | Total net Revenue | 2,167,903 | 100.00% | _ | |

Reasons for increase or decrease:

- (1) Min Aik Group: Due to the reduction in demand from end customers and the impact of product mix, the sales amount and proportion in 2021 are both lower than in 2020.
- (2) S Company: Due to the adjustment of supplier strategies and product mix changes by end customers, the sales amount and proportion in 2021 are both higher than in 2020.
- (3) J Company: Due to the impact of the production and sales mix and the reduction in customer orders, the sales amount and proportion in 2021 are both lower than in 2020.
- (4) A Company: Due to the increase in demand from the automation equipment, the sales amount and proportion in 2021 are both higher than in 2020.

5.2.5 Table of the production volume in recent two years

| | | | Unit | : Thousands of | of PCS, NT\$ | thousands |
|---|-----------|------------|-----------|----------------|--------------|-----------|
| Year Production | | 2020 | | 2021 | | |
| Volume Major products (or Department) | Capacity | Production | Value | Capacity | Production | Value |
| Hard Disk Drive stamping components | 376,200 | 376,200 | 376,200 | 387,526 | 224,198 | 930,825 |
| Other electronic stamping components | (Note) | 376,200 | 376,200 | (Note) | 106,625 | 637,659 |
| Plastic injection parts | 1,655,684 | 1,324,547 | 368,600 | 1,550,111 | 1,240,089 | 339,118 |
| Automated machine | 1.001 | 0.381 | 153,379 | 1.001 | 0.402 | 265,636 |
| Total | 2,031,885 | 1,589,582 | 1,488,437 | 1,937,638 | 1,570,912 | 2,173,238 |

Note: Due to the alternative production of Hard Disk Drive stamping components and Other electronic stamping components, combined capacity.

5.2.6 Table of the volume of units sold in recent two years

Unit: Thousands of PCS, NT\$ thousands

| Sold Year | | 2020 | | | | 2021 | | | |
|--|--------|----------|-----------|-----------|--------|----------|-----------|-----------|--|
| volume | Domest | ic sales | Expor | t sales | Domest | ic sales | Expor | t sales | |
| Major products (or Department) | Volume | Value | Volume | Value | Volume | Value | Volume | Value | |
| Hard Disk Drive stamping components | 27,860 | 156,275 | 121,930 | 573,353 | 32,815 | 185,886 | 123,627 | 616,471 | |
| Other electronic stamping components | 5,780 | 93,416 | 65,965 | 121,459 | 10,063 | 181,418 | 67,161 | 147,801 | |
| Plastic injection parts | 90 | 486 | 1,302,430 | 512,998 | 190 | 969 | 1,214,610 | 479,433 | |
| Automated machine | 0.079 | 4,565 | 7 | 298,860 | 0.002 | 6 | 3 | 414,105 | |
| Other (Note) | _ | 1,005 | _ | 159,283 | _ | 10,997 | _ | 130,817 | |
| Total | 33,730 | 255,747 | 1,490,332 | 1,665,953 | 43,068 | 379,276 | 1,405,401 | 1,788,627 | |

Note: Raw materials and consumables and moulds are not calculated due to different calculation units.

5.3 Employees: the number of the employees, average length of service, average age and educational background distribution ratio in the last two years and as of the date of publication of the annual report

| | Year | 2020 | 2021 | As of 2022/03/31 |
|---------------------------------|-----------------------|------|------|------------------|
| Num | ber of employees | 900 | 913 | 920 |
| | Average age | 38 | 38 | 38 |
| Average years of service (year) | | 6 | 6 | 6 |
| | Ph.D. | 0% | 0% | 0% |
| Distribution of | Master | 2% | 1% | 1% |
| Educational Background | College | 41% | 41% | 41% |
| | High school and below | 57% | 58% | 58% |

5.4 Information of Expenditure for Environmental Protection

Indicate the amount of the loss (including compensation) and penalty resulting from environmental pollution in the latest year and as of the publication date of the annual report, and explain the countermeasures (including improvement measures) to be taken in the future and possible expenditures (including the estimated amount of possible loss, penalty and compensation if improvement measures are not taken. If it cannot be evaluated reasonably, please explain why it cannot be reasonably estimated.): the company has not yet been suffered from the loss (including compensation) or punishment due to environmental pollution so far.

5.5 Labor-Employer Relation

- 5.5.1 State employee welfare measures, advanced study, training, retirement system, implementation of retirement system, agreements between the employer and the employees, and measures for protection of employees' rights and interests.
 - 1. Welfare measures of the employees: the welfare measures of the company are standardized in accordance with the laws and regulations, and some of the welfare measures are better than the laws and regulations; we actively create a more friendly environment, in order to make all employees work in a better environment.
 - (1) Insurance: besides the statutory labor and health insurance, the company buys all employees the accident insurance and hospitalization medical insurance.
 - (2) Physical and mental health and safety assurance of the employees:
 - A. In order to maintain the health of the employees, the employees can receive additional health check-up allowance after working two years, once every two years and each for NT\$10,000 besides the health check-up stipulated by the law.
 - B. The company cordially invites the external professional lecturers to give the health promotion lectures every season to exchange and teach in allusion to the issues, such as the career, personal and family, chronic diseases, stress management and so on, in order to maintain the physical and mental health of the employees.

- C. The Automatic External Defibrillator (AED) is arranged to protect the safety of the employees and accordingly promote the company as a safe enterprise.
- (3) Rest, growth and learning:
 - A. In order to promote the communication between the employees and the children, the company holds the family day every year. In this way, the feeling between the employees and the family members and the centripetal force of the company are increased, and accordingly the goal of balancing the job and the life is achieved.
 - B. The company handles the tourism activities at home and abroad for the employees, and provides subsidies.
 - C. The Welfare Committee aperiodically invites the external professional teachers to come to the plant to offer the courses related to language learning, to enhance their language skills of the employees and accordingly keep up with the international development.
 - D. Besides the professional learning courses, the Welfare Committee also prepares the soft courses, such as the coffee culture and kneading, to improve the humanistic quality of the employees.
- (4) Facilities: the dormitory, the rest area, the dining room, the nursing rooms and so on
- (5) Other welfares: cash gift for birthday, hospitalization leave, wedding and funeral leave, birth allowance, cash gift of three important festivals, dinner party, company's uniforms, etc.
- 2. Advanced studies of the employees: the company provides the employees with the inservice advanced study channel which includes teaching centers in various professional fields, extension education and so on.
- 3. Training of the employees: the company also offers the training courses, such as the industrial trend information and spiritual growth so far besides the core, professional and management function training.
- 4. Retirement system and its implementation situation: the company stipulates the retirement measures in accordance with the relevant provisions of the Labor Standards Act and Labor Pension Act, and allocates the reserve for employee retirement:
 - (1) Besides the reserve for employee retirement to be allocated each month in accordance with the proportion 2.29% of the gross salary, the employee to whom the Labor Standards Act is applicable to allocate the pension can regularly review the allocation rate every year. The Labor Retirement Reserve Oversight Committee is established to regularly monitor the allocation of retirement reserve and is responsible for reviewing the retirement applications.
 - (2) The employees to whom the Labor Pension Act is applicable to allocate the pension can allocate 6% to their personal retirement accounts in accordance with the allocated salary scale every month, or allocate the pensions with a proportion of less than 6% to the their personal retirement accounts every month according to the allocated salary scale based on their own wishes. The remaining subsidiaries shall handle in accordance with the relevant local laws.
 - (3) The Defined Contribution Plan (DC plan) shall be implemented in the overseas subsidiaries in allusion to the pensions, and the provident fund, the pension, the medical and other social security benefits are paid monthly in accordance with the provisions of the local government.
 - (4) Retirement conditions shall be handled in accordance with local laws and regulations. The applicable regulations for employees in the ROC are as follows:

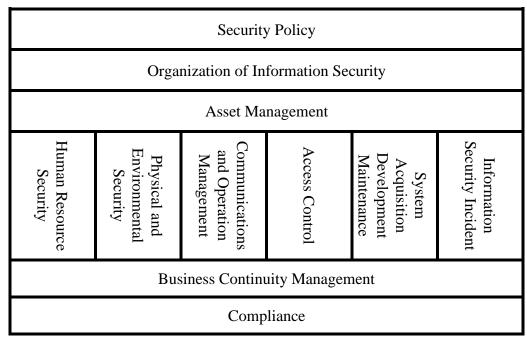

- A. Those who joined the company after July 1, 2005 (inclusive) shall fully apply the Labor Pension Act.
- B. Those who joined the company before July 1, 2005 (exclusive) may choose to continue to apply the pension provisions of the Labor Standards Act or the Labor Pension Act within five years from that date.
- C. Employees who meet the retirement requirements of the Labor Standards Act may apply for retirement.
- (5) Set up employee stock ownership trusts, in order to achieve long-term savings through continuous accumulation and ensure the stability of employees' retirement life. \circ
- 5. Agreements between the employer and the employees and various measures to protect the rights and interests of employees:
 - (1) The company formulates the 'Measures for the Implementation of Labormanagement Conference, 'while holding the labor-management conference to discuss and consult various relevant issues of the employees. The relevant units are also be obligated to handle and complete the matters decided during the conference within a certain period of time.
 - (2) The company formulates 'Internal Appeal Measures 'to protect the legal rights and interests of the employees and assists to solve the unreasonable treatment received by the employees, in order to maintain a legal, reasonable and fair work environment.
 - (3) In order to provide the more diversified channels of communication, the company provides the options of communicating the opinions in the Employee Handbook and sets up the staff suggestion box. The company also sets up the contact mailbox on the entrance website while publicizing the communication channels during the assembly of all employees, so as to give full play to the labor-management coordination mechanism.
 - (4) The company also complies with the provisions on Gender Equality in Employment Act and formulates the measures to prevent and control the sexual harassment, appealing and disciplinary measures, to protect the rights and interests of the employees.
- 6. In order to strengthen and improve the occupational safety and health facilities and work environment while effectively reducing the occurrence rate of the occupational disasters and ensuring the occupational safety and health, the company formulated and implemented various management and implementation measures, and passed SA8000 certification in February 2020, RBA certification in July 2020, 45001 certification in February 2021, and 14001 certification in November 2021.

5.5.2 The losses as a result of labor disputes in recent years and as of the date of publication of the annual report were listed, and the estimated amount and countermeasures that occur at present and might occur in the future were disclosed. If they cannot be estimated, the fact that they cannot be estimated should be clarified.

The company and its subsidiaries always regard the employees as the most important asset of the company, equally pay attention to the working conditions and the welfare of the employees and are committed to creating a good work environment and providing an unblocked communication channel between the employer and the employees. Therefore, the company has not yet been suffered from the loss due to the labor disputes in recent years and as of the date of publication of the annual report. The company will continue to make efforts in this direction to maintain the harmonious relationship between the employer and the employees and accordingly protect the company from the loss due to the labor disputes which occur in the future.

5.6 Cyber security management

5.6.1 Describe the cyber security risk management framework, cyber security policies, concrete management programs, and investments in resources for cyber security management.

1. Risk management framework:

2. Cyber security policies : In order to implement the system, the following four-level documents are therefore established:

- 3. Concrete management programs :
 - (1) Establish various management and comprehensive records of various information activities:

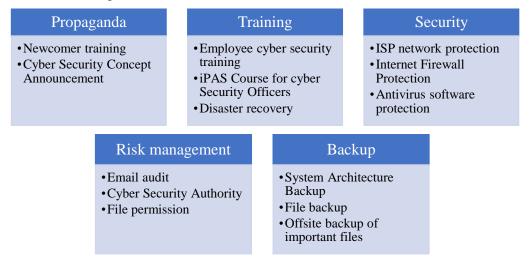

Mobile storage management, document operation management, authorized connection management, equipment usage management, asset record management.

(2) The company has not yet purchased capital security insurance. In order to implement risk management, before completing the insurance, the specific preventive measures are as follows:

A. Backup data encryption.

- B. The data storage device actually builds a three-tier structure.
- C. Three different places to store.
- 4. investments in resources for cyber security management :

In order to strengthen information security, in addition to the necessary software and hardware costs, the company continuously invests manpower and related resources to implement the following measures:

5.6.2 List any losses suffered by the company in the most recent fiscal year and up to the annual report publication date due to significant cyber security incidents, the possible impacts therefrom, and measures being or to be taken. If a reasonable estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided: None

5.7 Important contracts

(1) Min Aik Precision

| Contractual nature | Concerned Party | Contract Date | Main contents | Restrictive clause |
|--------------------|--------------------|---------------------------|--|--------------------|
| Loan contract | Cathay United Bank | 2018.04.16~ 2027.04.16 | Land and building guarantee loans | None |
| Loan contract | Hua Nan Bank | 2020.01.22~ 2022.01.21 | Medium and long-term loans | None |
| Loan contract | Hua Nan Bank | 2020.03.23~ 2022.03.23 | Medium and long-term loans | None |

(2) MAPP

| Contractual | Concerned Party | Contract Date | Main | Restrictive |
|----------------|------------------|---------------------------|-------------|-------------|
| nature | Concerned 1 arty | Contract Date | contents | clause |
| Lease contract | JTC | 1996.11.01~ 2052.10.31 | Plant lease | None |
| Lease contract | JTC | 1995.12.16~ 2052.12.15 | Plant lease | None |

| Engineering contract | Presico Engineering Pte. Ltd. | 2019.12.13~ 2021.08.31 | Factory expansion project | None |
|-------------------------|----------------------------------|---------------------------|---------------------------------|------|
|-------------------------|----------------------------------|---------------------------|---------------------------------|------|

(3) Suzhou Amould

| Contractual nature | Concerned Party | Contract Date | Main contents | Restrictive clause |
|--------------------|--|-------------------------|------------------|--------------------|
| Lease contract | Suzhou Yifeng Automation Equipment Co., Ltd. | 2017.7.15~ 2022.7.14 | Plant lease | None |

(1) Financial analysis - Consolidated Financial Statements (IFRS)

Analysis of financial ratio differences for the last two years: (Not required if the difference does not exceed 20%)

- 1. The increase in the interest coverage ratio was due to increase in the profit before income tax.
- 2. The increase in the profitability ratio was due to increase in profit before and net of income tax, resulted in the rate of return on total assets, the rate of return on shareholders ' equity, the ratio of pre-tax income to paid-in capital, the rate of profit ratio and the EPS are higher than the previous period.
- 3. The increase in cash flow ratio was due to increase in net cash inflows from operating activities, resulted in the rate of cash flow ratio, the rate of cash flow adequacy ratio and the cash reinvestment ratio are higher than the previous period.

(2) Financial analysis - Financial Statements (IFRS)

| Cash flow | Cash flow ratio (%) | (14.53) | 5.54 | 14.88 | (4.91) | (10.09) |
|-----------|------------------------------|----------|----------|---------|----------|----------|
| | Cash flow adequacy ratio (%) | 94.35 | 52.39 | 39.22 | 19.34 | (5.91) |
| | Cash reinvestment ratio (%) | (Note 2) | (Note 2) | 1.24 | (Note 2) | (Note 2) |
| Leverage | Operating leverage | 22.36 | (1.53) | (10.07) | (1.90) | 42.07 |
| | Financial leverage | 1.37 | 0.90 | 0.61 | 0.85 | (1.50) |

Analysis of financial ratio differences for the last two years: (Not required if the difference does not exceed 20%)

- 1. The decrease in the quick ratio was due to the increase in the current portion of bank loan.
- 2. The increase in the interest coverage ratio was due to the increase in profit before income tax.
- 3. The decrease in the inventory turnover and the increase in the average days in sales were due to the increase in the end of the inventory.
- 4. The increase in the profitability ratio was due to increase in profit before and net of income tax, resulted in the rate of return on total assets, the rate of return on shareholders ' equity, the ratio of pre-tax income to paid-in capital, the rate of profit ratio and the EPS are higher than the previous period.
- 5. The decrease in cash flow ratio was due to the net cash outflows from operating activities increase compared to the 2020, resulted in the rate of cash flow ratio and the rate of cash flow adequacy ratio are lower than the previous period.
- 6. The change in operating leverage and financial leverage were due to the increase in operating income.

Note 1: The financial statements from 2017 to 2021 had been duly certified by CPAs.

- Note 2: Net cash flow from operating activities is negative after deducting cash dividends, so it is not calculated.
- Note 3: Formulas for financial analysis ratio as the followings:
 - 1. Financial structure
 - (1) Debt Ratio = Total liabilities / Total assets.
 - (2) Ratio of long-term capital to property, plant and equipment = (Total equity + Noncurrent liabilities) / Net Property, Plant and Equipment.
 - 2. Solvency
 - (1) Current ratio = Current Assets / Current liabilities.
 - (2) Quick ratio = (Current Assets Inventory Prepaid Expenses) / Current liabilities.
 - (3) Interest Coverage Ratio = Net gains before income tax and interest expenses / Current interest expense.
 - 3. Operating ability
 - (1) Account receivables (including notes receivables from operating activities and accounts receivable) turnover = net sales / average receivables of each term (including notes receivables from operating activities and accounts receivable) balance.
 - (2) Average collection days = 365 / Account receivables turnover.
 - (3) Inventory turnover = COGS / average inventory amount.

- (4) Account payables (including notes payable from operating activities and accounts payable) turnover = COGS / average payables of each term (including Notes payable from operating activities and accounts payable) balance.
- (5) Average days in sales = 365 / Inventory turnover.
- (6) Property, Plant and Equipment turnover = Net sales / Net average Property, Plant and Equipment.
- (7) Total assets turnover = Net sales / Average total assets.

4. Profitability

- Return on assets = [gain/loss after tax + interest expense x (1 tax rate)] / average total asset.
- (2) Return on equity = gain/loss after tax / average total equity.
- (3) Pre-tax income to capital = income before tax / paid-in capital.
- (4) Net gains ratio = gain/loss after tax / net sales.
- (5) Earnings per share = (the gain/loss contributed to the parent company preferred stock dividend) / weighted average shares outstanding.

5. Cash flow

- (1) Cash flow ratio = net cash flow from operating activities / current liabilities.
- (2) Cash flow adequacy ratio = net cash flow from operating activities in the past five years / five years sum of (capital expenditures + inventory addition + cash dividends).
- (3) Cash reinvestment ratio = (net cash flow from operating activities cash dividends) / (Property, plant and equipment gross + long term investment + other non-current assets + working capital).

6. Leverage

- Operating leverage = (net operating revenue variable operating cost and expenses) / operating gains.
- (2) Financial leverage = operating gains / (operating gains interest expense).

Min Aik Precision Industrial Co., Ltd.

Audit report issued by Audit Committee for 2021

The individual financial report and consolidated financial report of 2021 of the company, which were prepared by its Board of Directors, have been certified by Chen, Cheng-Chien and Huang, Yung-Hua, CPAs of KPMG. The aforementioned reports, the business report and the earnings distribution proposal are reviewed by the Committee and found true and correct. The Committee hereby submits the aforementioned reports and proposal for approval in accordance with Article 14-4 of the Securities and Exchange Act and Article 219 of the Company Act.

Submitted to:

2022 Annual General Meeting of Min Aik Precision Industrial Co., Ltd.

Convener of Audit Committee: Sun, Chu-Wei

March 11, 2022

- 6.4 Financial statement for the most recent fiscal year, including an auditor's report prepared by a certified public accountant, and 2-year comparative balance sheet, statement of comprehensive income, statement of changes in equity, cash flow chart, and any related footnotes or attached appendices: Please refer to Appendix 1
- 6.5 A parent company only financial statement for the most recent fiscal year, certified by a CPA, but not including the statements of major accounting items: Please refer to Appendix 2
- 6.6 The financial problems of the Company and its Affiliated Enterprise found as of the Annual Report issuance date and the impact of such problems upon the Company's financial standing: None

VII. Review of Financial Conditions, Financial Performance, and Risk Management

1

7.1 Analysis of Financial Status

| | | | | | Unit: NT\$ t | |
|---|-----------|------|-----------|------|--------------|-------|
| Year | 2020 | | 2021 | | Differen | ce |
| Item | Amount | % | Amount | % | Amount | % |
| Current assets | 1,818,796 | 58% | 1,811,294 | 59% | (7,502) | 0% |
| Investments accounted for using equity method | 37,016 | 1% | 29,323 | 1% | (7,693) | (21%) |
| Property, plant and equipment | 1,113,511 | 36% | 1,117,731 | 36% | 4,220 | 0% |
| Other assets | 161,626 | 5% | 118,747 | 4% | (42,879) | (27%) |
| Total assets | 3,130,949 | 100% | 3,077,095 | 100% | (53,854) | (2%) |
| Current liabilities | 894,294 | 29% | 998,692 | 32% | 104,398 | 12% |
| Non-current liabilities | 535,468 | 17% | 365,104 | 12% | (170,364) | (32%) |
| Total liabilities | 1,429,762 | 46% | 1,363,796 | 44% | (65,966) | (5%) |
| Capital stock | 770,000 | 25% | 770,000 | 25% | 0 | 0% |
| Capital surplus | 685,135 | 22% | 654,335 | 21% | (30,800) | (4%) |
| Retained earnings | 331,384 | 10% | 409,828 | 14% | 78,444 | 24% |
| Other equity interest | (85,332) | (3%) | (120,864) | (4%) | (35,532) | (42%) |
| Total equity | 1,701,187 | 54% | 1,713,299 | 56% | 12,112 | 1% |

Analysis of changes in financial ratios over 20% and the difference amount over NT\$ 10,000 thousand:

- 1. Other assets including non-current financial assets at amortized cost > right-of-use assets and non-current assets. Mainly due to deferred tax assets reduced, resulting in other assets decreased by NT\$42,879 thousand with a decrease of 27%.
- 2. Due to long-term borrowings decreased, the non-current liabilities decreased by NT\$170,364 thousand with a decrease of 32%.
- 3. Due to Net profit increased, the Retained earnings increased by NT\$78,444 thousand with an increase of 24%.
- 4. Due to the exchange rate fluctuations for exchange differences on translation of foreign financial statements, other equity interest decreased by NT\$35,532 thousand with a decrease of 42%.

7.2 Analysis of Financial Performance

| (1) | Analysis of changes | in Financial | Performance |
|-----|----------------------|--------------|-------------|
| (-) | i maijele el enangee | | |

| _ | | | Ui | nit: NT\$ thousands |
|--|-----------|-----------|------------|---------------------|
| Year | 2020 | 2021 | Difference | (0/) |
| Item | Amount | Amount | Difference | (%) |
| Operating revenue | 1,921,700 | 2,167,903 | 246,203 | 13% |
| Operating costs | 1,486,273 | 1,707,939 | 221,666 | 15% |
| Gross profit | 435,427 | 459,964 | 24,537 | 6% |
| Operating expenses | 321,361 | 329,964 | 8,603 | 3% |
| Operating Income | 114,066 | 130,000 | 15,934 | 14% |
| Non-operating income and expenses | (60,602) | (15,045) | 45,557 | 75% |
| Profit before income tax | 53,464 | 114,955 | 61,491 | 115% |
| Minus: Income tax expense | 23,477 | 25,738 | 2,261 | 10% |
| Net profit | 29,987 | 89,217 | 59,230 | 198% |
| Other comprehensive income (net of income tax) | (14,258) | (34,755) | (20,497) | (144%) |
| Total comprehensive income | 15,729 | 54,462 | 38,733 | 246% |

Analysis of changes in financial ratios over 20% and the difference amount over NT\$ 10,000 thousand:

- 1. The current non-operating income and expenses increased by NT\$ 45,557 thousand with an increase of 75%, which is mainly due to the decrease in exchange losses caused by exchange rate volatility, and the decrease in investment loss.
- 2. Other comprehensive income decreased by NT\$ 20,497 thousand with a decrease of 144%, which is mainly due to exchange rate fluctuations for exchange differences on translation of foreign financial statements.
- (2) Anticipated sales volume and grounds thereof, potential impact upon the Company in future financial conditions and the countermeasures:

According to Trendfocus research report, the global sales of hard drives were approximately 234 million units in 2022 and is 9.6% lower than 2021. The after observing the design trend of the hard disk product in recent years, the most important technological development includes energy-assisted magnetic recording (EAMR) technology, popularization of the serial interface architecture, encrypted design of the hard disk, the energy-saving design of the hard disk and the launch of the portable hard disk solution. Due to the high unit price of high-capacity hard disk products and the gradual withdrawal of competitors from the market, the company is also actively seeking other stamping components for hard disk drives.

With growing demand of data center and brand server recently, all hard disk manufacturers contribute more development resources in Nearline such big capacity hard disk development and production.

In order to serve the existing customers and develop the potential customers, the company shall also enhance the high involvement in the development stage of the new product, to improve the customer's trust and dependence on the company and acquire the first opportunity in mass production and the high market share. In allusion to the existing customers, the company shall continuously implement the pace of globalization in accordance with the requirements of the market and the customers while establishing the overseas production and service bases duly and continuously introducing the automation technology, to improve the capacity, the productivity

and the product quality, achieve the goal of reducing cost, expanding market share of the products and accordingly improve the profitability. In addition, the company shall strengthen the strategic alliance with the service agent partners while expanding other niche markets, developing the products and increasing the existing market share. The company will try its best to achieve the goal and will keep focusing on raising the sales of automobile components and electronic components.

In the medical plastics field, the Company mainly focused on OEM for global medical device companies, with the rapidly increasing technology developments of medical diagnostics and lengthened life expectancy of the general population in developed countries. The Company will seize the trend and opportunity to cooperate with clients more closely, shape its strategy and reallocate the resource via the current industry place that the Company owned in Singapore and other Asia countries, to attain a promising growth in the future. Additionally, in response to the 2020 COVID-19 epidemic, the pharmaceutical industry is developing rapidly, and the corresponding demand for automated production is generated to improve its quality and output.

However, while the changing situation of the market economy, the company will strictly maintaining the cost and expense structure, trying to locate itself in an invincible position, then seek to more competitive advantages and turning points by transforming and introducing new management system, trying to create a greater profit in the future.

7.3 Analysis of Cash Flow

(1) Cash Flow Analysis for the Current Year

| Year Item | 2020 | 2021 | Variance (%) | |
|----------------------|----------|-----------|--------------|--|
| Operating activities | 15,839 | 144,306 | 811% | |
| Investing activities | (31,029) | (104,602) | 237% | |
| Financing activities | 61,217 | (111,949) | (283%) | |
| Total | 46,027 | (72,245) | (257%) | |

Analysis of change in cash flow in the current year:

- 1. Operating activities: The increase in net cash inflows by increased operating profit and accounts receivable received in 2021.
- 2. Investing activities: The increase in net cash outflow was due to acquire equipment in 2021.
- 3. Financing activities: The increase in net cash outflows by repayments of bank borrowings in 2021.
- 4. In summary: the net cash outflow increased NT\$ 118,272 thousand in 2021, which is upper compared with 2020.
- (2) Contingency plans for projected insufficient capital liquidity: N/A

(3) Cash Flow Analysis for the Coming Year (2022)

Unit: NT\$ thousands

| Cash and Cash | Net Cash Flow | | | Leverage of Cash Deficit | | |
|-----------------------------------|---------------------------------|--------------|---------------------------|--------------------------|--------------------|--|
| Equivalents, Beginning of Year | from Operating Activities | Cash Outflow | Cash Surplus (Deficit) | Investment Plans | Financing Plans | |
| 790,507 | 226,800 | 352,627 | 664,680 | - | - | |

- 1. Cash Flow Analysis for the Coming Year:
 - a. Operating activities: The cash inflow from operating activities is estimated at NT\$ 226,800 thousand in 2022.
 - b. Investing activities: Expected to acquisition of machinery and equipment and expansion of the factory, estimated cash outflows at NT\$ 131,573 thousand in 2022.
 - c. Financing activities: Repayments of bank borrowings and dividend distributions to shareholders by cash, estimated cash outflows at NT\$ 221,054 thousand in 2022.
 - d. In summary, the total cash surplus in 2022 is approximately NT\$ 664,680 thousand.
- 2. Contingency plans for projected insufficient cash position: N/A

7.4 The impact of the significant capital expenditure of the latest year upon the financial conditions:

(1) Major Capital Expenditure Items and Source of Capital:

Unit: NT\$ thousands

| Project | Actual or Planned Source of Capital | Actual or Planned Date of Completion | Total Capital |
|---------------------------|--|---|---------------|
| Plant expansion (MAPP) | Own funds and bank | 2022.03 | 158,834 |

(2) Expected Benefits: In production space and equipment utilization rate are nearly full, the Group's planned to expand the production capacity and increase the production scale in order to obtain business opportunities.

7.5 Investment Policy in the Last Year, Main Causes for Profits or Losses, Improvement Plans and Investment Plans for the Coming Year

- (1) Reinvestment policy for the most recent fiscal year: The Company's reinvestments are in compliance with the "Procedures for Acquisition and Disposal of Assets", and shall be implemented after the evaluation of investment effectiveness and approved by the board of directors.
- (2) The main reasons for profits or losses: In 2021, the Company recognized investment loss of NT\$5,379 thousand by using the equity method of accounting, which was mainly due to reduced profits on reinvestment of overseas companies caused by decline in operating loss.
- (3) Investment Plans for the Coming Year: In order to obtain business opportunities and product upgrades, the Company expects to expand the plant for the Company's long-term development.

7.6 Analysis of Risk Management

- (1) The effect upon the Company's profits (losses) of interest and exchange rate fluctuations and changes in the inflation rate, and response measures to be taken in the future.
 - 1. Interest rate

If the interest rate had increased or decreased by a quarter-point, the Company's net income before tax would have increased or decreased by \$268 thousands with all variable factors remaining constant. This is mainly due to the Company's financial liabilities and bank deposits in variable-rate bills.

The Company use bank loans for debt financing, with agreements on interest rate intervals to reduce the interest rate risks. Thus, the change in interest rate has no significant impact on the Company. The Company has also keep up with changes in interest rates and conduct necessary measures, thereby reducing the impact of interest rate fluctuations on profit and loss.

2. Foreign exchange rate

The Company's business is mainly focused on exports, which is mainly based on US dollars, whereas purchases are mainly from domestic manufacturers. Total receivables denominated in US dollars is larger than the purchases denominated in US dollars, thus after calculating the balance amount, the foreign exchange rate fluctuations would still have certain impact on the Company's income.

A weakening or strengthening of 1% of the NTD against the foreign currency as of 31, December, 2021 would have decreased or increased the net profit before tax by \$4,934 thousand.

Although the foreign exchange rate fluctuations have an impact on the Company's revenue and profit, the Company manages its foreign capital based on the Conservatism Principle, and commit to greater efforts to avoid adverse effects that may be caused by foreign exchange rate fluctuations. In addition to the natural hedges from foreign denominated receivables and payables, the Company's financial personnel would retain foreign currency holdings in response to the demand for foreign currencies, and adjust its foreign currency holdings accordingly, depending on the exchange rate trends, in order to reduce the impact of foreign exchange rate fluctuations. When providing a quote, the business department also considers price adjustment caused by foreign exchange rate fluctuations to ensure profitability, and make efforts on eliminating the impact of foreign exchange rate fluctuation on the Company's income.

3. Inflation

Inflation has no significant impact on the Company, and the Company will also pay close attention to future inflation, and adjust its inventories and product price accordingly.

(2) Policies, Main Causes of Gain or Loss and Future Response Measures with Respect to Highrisk, High-leveraged Investments, Lending or Endorsement Guarantees, and Derivatives Transactions

In order to manage financial risks, the Company has not engaged in high-risk or highly leveraged investments, and has established internal management and operational procedures in accordance with regulations such as the "Procedures for Acquisition and Disposal of Assets", "Procedures for the Loaning of Funds", and "Procedures for Endorsements and Guarantees".

Financial derivatives held or issued by the Company are for hedging foreign exchange rate risks of net assets or net liabilities, and the transactions are based on regulations of the "Procedures for Acquisition and Disposal of Assets". Up to date of publication of the annual report in 2021, the Company has not engaged in transactions of financial derivatives.

- (3) Future Research & Development Projects and Corresponding Budget
 - 1. Future Research & Development Projects

The Company has already invested considerable resources in the development of new products over a long time. In terms of precision metal stamping, the Company has considerable investment on hard disk and other products in order to meet clients' needs in product development. For hard disks, the Company has actively invested on the improvement and R & D of various new molds and manufacturing processes since its establishment. In terms of precision stamping of products other than hard disks, the Company actively focuses on entering communication or electronic fields. The products underline features of thin and robust, hence the Company also invests considerable resources in surface treatments and manufacturing processes of these products in order to meet the needs of clients who seek new developments.

For the medical plastics business, the Company will gradually invest resources in order to maintain steady and long-term development.

As for the automation equipment, since the business focuses on customization, the Company's automation business unit has considerable R&D and innovation abilities in order to meet clients' needs. In addition, the recent increase in labor costs accelerated automation demands, thus the business unit actively invests in robotic arms and systems integration, in order to offer more varieties for its clients. Moreover, the business unit for automation equipment also makes considerable improvements in the product design process, enabling clients to receive the required products in a short period of time, and gain more opportunities on obtaining client orders in automated businesses.

2. Expected Research Expenditure

The Company will continue on developing projects acquiring patents, investing R&D expenses accounting about 3% of total operating revenue in 2022, in order to boost its R&D capability and market competitiveness.

(4) Effects of and Response to Changes in Policies and Regulations Relating to Corporate Finance and Sales

The Company's various businesses are implemented in accordance with regulations of the competent authority, and pay attention to the changes major policies and regulation changes locally and internationally in order to assess its impact on The Company. Up to the date of publication of the annual report, major policies and regulation changes locally and internationally have no significant impact on The Company's financial and business activities.

(5) Effect on the company's financial operations of developments in science and technology (including cyber security risks) as well as industrial change, and measures to be taken in response.

The Company attaches great importance to improvements in technology and carefully monitors market trends and assesses the impact they may have on the Company's operations.

In terms of cyber security, the Company has obtained ISO22301 Operational Continuous Management System Certification, and regularly conducts information system operational impact analysis and risk assessment every year, and implements improvement measures based on risk level assessment results, and continuously strengthens security protection to respond to information systems. Possible risks to avoid disruption of operations. Up to now, the Company has no significant security risks.

In the hard disk industry, in the face of changes in the industry and the uncertainty of the COVID-19 epidemic, the company will use its existing core technologies to increase its market share and continue to develop new technologies and businesses. Through the vertical integration of the three main businesses, we will develop more diversified products and create product business opportunities.

(6) The Impact of Changes in Corporate Image on Corporate Risk Management, and the Company's Response Measures

The Company always adheres to relevant laws and regulations on fulfilling its corporate social responsibility. Since 2009, has successively implemented ISO22301:2012, ISO9001:2015, ISO14001:2015, ISO45001:2018, IATF16949:2016 and SA8000:2014. The Company has also implemented the RBA Responsible Business Alliance policy.

There are no negative reports on the Company's corporate image.

- (7) Expected Benefits from, Risks Relating to and Response to Merger and Acquisition Plans: N/A
- (8) Expected Benefits from, Risks Relating to and Response to Factory Expansion Plans:

In order to obtain business opportunities and product upgrades, the Company expects to expand the plant. and planned to expand the production capacity and increase the production scale in order to obtain business opportunities. The source of funds for the factory expansion plant is by Company's own funds, so the risks are still limited.

- (9) Risks Relating to and Response to Excessive Concentration of Purchasing Sources and Excessive Customer Concentration:
 - 1. Risks Relating to Excessive Concentration of Purchasing Sources

The Company has a large number of suppliers of the same nature to supply its main raw materials, in order to achieve high raw material flexibility. The supplier also has flexible schedules for special specifications and spot markets to secure a stable source of steel supply. The Company maintained a good relationship and business cooperation with all its suppliers, hence there are no risks associated with shortage or interruption of the source caused by consolidation of purchasing.

2. Risks Relating to Excessive Customer Concentration

The Company's main products are precision metal stamping, plastic injection parts and automatic machines, which are mainly sold to famous international companies or assembly foundries. The Company has a diverse customer base that provides stability, and maintains stable strategic partnership with downstream clients and upstream suppliers to ensure stable operations.

- (10) Effects of, Risks Relating to and Response to Large Share Transfers or Changes in Shareholdings by Directors, Supervisors, or Shareholders with Shareholdings of over 10%: N/A
- (11) Effects of, Risks Relating to and Response to the Changes in Management Rights: N/A
- (12) Litigious and non-litigious matters. List major litigious, non-litigious or administrative disputes that: (1) involve the Company and/or any company director, any company supervisor, the general manager, any person with actual responsibility for the firm, any major shareholder holding a stake of greater than 10 percent, and/or any company or companies controlled by the Company; and (2) have been concluded by means of a final and unappealable judgment, or are still under litigation. Where such a dispute could materially affect shareholders' equity or the prices of the Company's securities, the annual report shall disclose the facts of the dispute, amount of money at stake in the dispute, the date of litigation commencement, the main parties to the dispute, and the status of the dispute as of the date of publication of the annual report: N/A
- (13) Other important risks, and mitigation measures being or to be taken: N/A

Independent Auditors' Report

To the Board of Directors of Min Aik Precision Industrial Co., Ltd.:

Opinion

We have audited the consolidated financial statements of Min Aik Precision Industrial Co., Ltd. and its subsidiaries ("the Group"), which comprise the consolidated balance sheets as of December 31, 2021 and 2020, and the consolidated statement of comprehensive income, changes in equity and cash flows for the year ended December 31, 2021 and 2020, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the year ended December 31, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the International Financial Reporting Standards ("IFRSs"), International Accounting Standards ("IASs"), interpretation as well as related guidance endorsed by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audit in accordance with the Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The key audit matters that, in our professional judgement, should be communicated are as follow:

1. Revenue recognition

Please refer to Note 4(n) "Revenue recognized" of the notes to the consolidated financial statements for the accounting policies on revenue recognition.

Description of key audit matter:

The Group's automatic equipment would first need to be assembled, tested, and installed by clients; thereafter, revenue then is recognized. Therefore, the revenue recognition is considered to be one of our key audit matters.

How the matter was addressed in our audit:

Our principal audit procedures on revenue recognition included the testing of internal control system over automatic equipment revenue; inspecting the contracts entered into with the customers; sending confirmation requests to debtors selected from the sales customers. We also assessed the adequacy of the Group's disclosures of its revenue recognition policy and other related disclosures.

2. Inventory Valuation

Please refer to Note 4(h) "Inventory" of the notes to consolidated financial statement for the accounting policies on inventory measurement.

Description of key audit matter:

The Group's inventory are measured at lower of cost and net realized value. The Group's products may be obsolescent or do not meet the market requirement due to new product release or market change. Besides, the automatic products are customized based on specific client's need. Thus, the cost of inventory may exceed its net realizable value. Moreover, the sales ability of products may affect the inventory valuation, which also need to be taken into serious consideration. Therefore, the inventory valuation is considered to be the key audit matters.

How the matter was addressed in our audit:

Our principal audit procedures included understanding the Group's policies of inventory valuation to assess the appropriateness of its inventory valuation; on a sampling basis, testing the Group's inventory aging report to verify its correctness; understanding and testing, on a sampling basis, the selling price that the management used, or reviewing the subsequent sales of the inventories to assess the appropriateness of the net realizable value.

Other Matter

Min Aik Precision Industrial Co., Ltd. has additionally prepared its parent company only financial statements as of and for the years ended December 31, 2021 and 2020, on which we have issued an unqualified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRSs, IASs, interpretation as well as related guidance endorsed by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including the Audit Committee) are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Cheng-Chien Chen and Yung-Hua Huang.

KPMG

Taipei, Taiwan (Republic of China) March 11, 2022

Notes to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with the accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally accepted and applied in the Republic of China.

The independent auditors' audit report and the accompanying consolidated financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of the English and Chinese language independent auditors' audit report and consolidated financial statements, the Chinese version shall prevail.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2021 and 2020

(Expressed in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

(1) Company history

Min Aik Precision Industrial Co., Ltd. (the "Company"). was incorporated on January 18, 2001, as a company limited by shares and registered under the Ministry of Economic Affairs, ROC. The Company's shares were listed on the Taiwan Stock Exchange (TWSE) on January 6, 2016. The address of its registered office is No. 2, Guorui Rd., Guanyin Dist., Taoyuan City. The Group mainly engages in the processing and manufacturing of electroplating of aluminum and copper products, precision stamping components and electroless nickel plating.

The Company's subsidiaries mainly engage in the design, manufacture, sale, and after-sales service of medical injection, molding and automatic machines.

The consolidated financial statements comprise The Group and subsidiaries (together referred to as the "Group" and individually as "Group entities") and the right to the Group's associates.

(2) Approval date and procedures of the consolidated financial statements:

These consolidated financial statements were authorized for issuance by the Board of Directors on March 11, 2022.

(3) New standards, amendments and interpretations adopted:

(a) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The Group has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from January 1, 2021:

- Amendments to IFRS 4 "Extension of the Temporary Exemption from Applying IFRS 9"
- Amendments to IFRS 9, IAS39, IFRS7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform— Phase 2"

The Group has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from April 1, 2021:

- Amendments to IFRS 16 "Covid-19-Related Rent Concessions beyond June 30, 2021"
- (b) The impact of IFRS issued by the FSC but not yet effective

The Group assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2022, would not have a significant impact on its consolidated financial statements:

- Amendments to IAS 16 "Property, Plant and Equipment-Proceeds before Intended Use"
- Amendments to IAS 37 "Onerous Contracts Cost of Fulfilling a Contract"

- Annual Improvements to IFRS Standards 2018–2020
- Amendments to IFRS 3 "Reference to the Conceptual Framework"
- (c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The following new and amended standards, which may be relevant to the Group, have been issued by the International Accounting Standards Board (IASB), but have yet to be endorsed by the FSC:

| Standards or Interpretations | | | | | | |
|--|--|-----------------|--|--|--|--|
| Amendments to IAS 1 "Classification of Liabilities as Current or Non-current" | The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of balance sheet, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments include clarifying the classification requirements for debt a company might settle by converting it into equity. | January 1, 2023 | | | | |
| Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction" | The amendments narrowed the scope of the recognition exemption so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. | January 1, 2023 | | | | |

The Group is evaluating the impact of its initial adoption of the abovementioned standards or interpretations on its consolidated financial position and consolidated financial performance. The results thereof will be disclosed when the Group completes its evaluation.

The Group does not expect the following other new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its consolidated financial statements:

- Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
- IFRS 17 "Insurance Contracts" and amendments to IFRS 17 "Insurance Contracts"
- Amendments to IAS 1 "Disclosure of Accounting Policies"
- Amendments to IAS 8 "Definition of Accounting Estimates"

(4) Summary of significant accounting policies:

The significant accounting policies presented in the consolidated financial statements are summarized as below. Except for those specifically indicated, the following accounting policies were applied consistently throughout the periods presented in the consolidated financial statements.

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (hereinafter referred to as "the Regulations") and the IFRSs, IASs, IFRIC Interpretations, and SIC Interpretations endorsed and issued into effect by the FSC.

- (b) Basis of preparation
 - (i) Basis of measurement

Except for the following significant accounts, the consolidated financial statements have been prepared on a historical cost basis:

- 1) Financial instruments at fair value through profit or loss are measured at fair value;
- 2) The defined benefit assets are measured at fair value of the plan assets less the present value of the defined benefit obligation.
- (ii) Functional and presentation currency

The functional currency of each Group entity is determined based on the primary economic environment in which the entity operates. The consolidated financial statements are presented in New Taiwan Dollar (NTD), which is the Company's functional currency. All financial information presented in NTD has been rounded to the nearest thousand.

- (c) Basis of consolidation
 - (i) Principles of preparation of the consolidated financial statements

The consolidated financial statements comprise the Company and its subsidiaries. Subsidiaries are entities controlled by the Group. The Group 'controls' an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The financial statements of the subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases. Intragroup balances and transactions, and any unrealized income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated financial statements. The Group attributes the profit or loss and each component of other comprehensive income to the owners of the parent and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

The Group prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumstances.

Changes in the Group's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received will be recognized directly in equity, and the Group will attribute it to the owners of the parent.

(ii) List of subsidiaries in the consolidated financial statements

| | | | Percen Owners | 8 | |
|---------------------|--|---|----------------------|-------------------|--|
| Name of investor | Name of subsidiary | Main Activities and Location | December 31, 2021 | December 31, 2020 | |
| The Company | Esteem King | Holding Company | 100 % | 100 % | |
| The Company | Evolution | Holding Company | 100 % | 100 % | |
| Esteem King | MAPP | Design, Manufacture and Sale of tooling and medical injection molding | 100 % | 100 % | |
| MAPP | AMOULD PLASTIC TECHNOLOGIES (SUZHOU) CO., LTD (AMO) | Design, Manufacture and Sale of automatic machines | 100 % | 100 % | |

(d) Foreign currencies

(i) Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of Group entities at the exchange rates at the dates of the transactions. At the end of each subsequent reporting period, monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at that date. Non-monetary items denominated in foreign currencies that are measured at fair value are translated into the functional currencies using the exchange rate at the date that the fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

(ii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into the presentation currency at the exchange rates at the reporting date. The income and expenses of foreign operations are translated into the presentation currency at the average exchange rate. Exchange differences are recognized in other comprehensive income.

When a foreign operation is disposed of such that control, significant influence, or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When the Group disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interests. When the Group disposes of only part of its investment in an associate or joint venture that includes a foreign operation while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

(e) Classification of current and non-current assets and liabilities

An asset is classified as current under one of the following criteria, and all other assets are classified as non-current.

- (i) It is expected to be realized, or intended to be sold or consumed, in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be realized within twelve months after the reporting period; or
- (iv) The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current under one of the following criteria, and all other liabilities are classified as non-current.

- (i) It is expected to be settled in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is due to be settled within twelve months after the reporting period; or
- (iv) The Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by issuing equity instruments do not affect its classification.
- (f) Cash and cash equivalents

Cash comprise cash on hand and demand deposits. Cash equivalents is short term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Time deposits which meet the above definition and are held for the purpose of meeting short term cash commitments rather than for investment or other purposes should be recognized as cash equivalents.

(g) Financial instruments

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Group becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(i) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

On initial recognition, a financial asset is classified as measured at: amortized cost and FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

1) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- · It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

2) Impairment of financial assets

The Group recognizes loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, amortized costs, notes and trade receivables, other receivable, guarantee deposit paid and other financial assets) and contract assets.

The Group measures loss allowances at an amount equal to lifetime ECL, except for the following which are measured as 12-month ECL:

- · debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables and contract assets are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Group's historical experience and informed credit assessment as well as forward-looking information.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial instrument.

12-month ECL are the portion of ECL that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECL is the maximum contractual period over which the Group is exposed to credit risk.

ECL are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive). ECL are discounted at the effective interest rate of the financial asset.

At each reporting date, the Group assesses whether financial assets carried at amortized cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable data:

- · significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 120 days past due;

- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider;
- it is probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

3) Derecognition of financial assets

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group enters into transactions whereby it transfers assets recognized in its statement of balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

- (ii) Financial liabilities and equity instruments
 - 1) Classification of debt or equity

Debt and equity instruments issued by the Group are classified as financial liabilities or equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

3) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

4) Derecognition of financial liabilities

The Group derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

5) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

(h) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted average method and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(i) Investment in associates

Associates are those entities in which the Group has significant influence, but not control or joint control, over their financial and operating policies.

Investments in associates are accounted for using the equity method and are recognized initially at cost. The cost of the investment includes transaction costs. The carrying amount of the investment in associates includes goodwill arising from the acquisition less any accumulated impairment losses.

The consolidated financial statements include the Group's share of the profit or loss and other comprehensive income of those associates, after adjustments to align their accounting policies with those of the Group, from the date on which significant influence commences until the date on which significant influence ceases.

Gains and losses resulting from transactions between the Group and an associate are recognized only to the extent of unrelated Group's interest in the associate.

When the Group's share of losses of an associate equals or exceeds its interests in an associate, it discontinues recognizing its share of further losses. After the recognized interest is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

- (j) Property, plant and equipment
 - (i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

(ii) Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

(iii) Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

- 1) Buildings: 50~56 years
- 2) Building facilities: 3~5 years
- 3) Machinery and equipment: 2~20 years
- 4) Office and other equipment $: 2 \sim 20$ years
- 5) Leasehold improvement $: 2 \sim 10$ years

Depreciation methods, useful lives, and residual values are reviewed at each reporting date and adjusted if appropriate.

(k) Lease

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contracts conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

(i) As a lessee

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- Payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- There is a change in future lease payments arising from the change in an index or rate;
- There is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee;
- There is change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset;

- There is a change of its assessment on whether it will exercise a purchase, extension or termination option; or
- There is any lease modifications

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Group accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Group presents right-of-use assets that do not meet the definition of investment and lease liabilities as a separate line item respectively in the statement of financial position.

The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(1) Impairment of non-financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than inventories, deferred tax assets and the assets arising on employee benefits) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount for an individual asset or a cash generating unit is the higher of its fair value less costs to sell and its value in use. If, and only if, the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset shall be reduced to its recoverable amount. That reduction is an impairment loss. An impairment loss shall be recognized immediately in profit or loss.

An assessment is made at the end of each reporting period as to whether there is any indication that an impairment loss recognized in prior periods may no longer exist or may have decreased. An impairment loss recognized in prior periods for an asset is reversed if, and only if, there has been an improvement in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In this case, the carrying amount of the asset is increased to its recoverable amount by reversing an impairment loss. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(m) Provisions

A provision is recognized if, as a result of a past event, the Group has a present obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pretax rate that reflects the current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

(i) Warranties

A provision for warranties is recognized when the underlying products or services are sold, based on historical warranty data and a weighting of all possible outcomes against their associated probabilities.

(ii) Site restoration

In accordance with the leases agreement, the Group's has the obligation to restore the leased facilities and the office. The provision is measured by the discounted present value of restoration cost at the termination of agreement, and related expense are recognized during contract period.

- (n) Revenue recognized
 - (i) Revenue from contracts with customers policy

Revenue is measured based on the consideration to which the Group expects to be entitled in exchange for transferring goods or services to a customer. The Group recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Group's main types of revenue are explained below.

The Group manufactures and sells electronic, plastic components and automated machines. The Group recognizes revenue when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

The Group offers standard warranty with the automatic machines for months to one year to its clients. Therefore, the Group's obligation to provide a refund for faulty automatic machines under the standard warranty terms is recognized as a provision of warranty.

A receivable is recognized when the goods are delivered as this is the point in time that the Group has a right to an amount of consideration that is unconditional.

(ii) Financing components

The Group does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Group does not adjust any of the transaction prices for the time value of money.

(o) Employee benefits

(i) Defined contribution plans

Obligations for contributions to defined contribution pension plans are expensed as the related service is provided.

(ii) Defined benefit plans

The Group's net obligation in respect of defined benefit plans is calculated separately for each the plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Group recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

(iii) Short term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(p) Share based payment

The grant-date fair value of equity-settled share-based payment arrangements granted to employees is generally recognized as an expense, with a corresponding increase in equity, over the vesting period of the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognized is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

The fair value of the amount payable to employees in respect of share appreciation rights, which are settled in cash, is recognized as an expense with a corresponding increase in liabilities, over the period during which the employees become unconditionally entitled to payment. The liability is remeasured at each reporting date and at settlement date based on the fair value of the share appreciation rights. Any changes in the liability are recognized in profit or loss.

Grant date of a share-based payment award is the date which the group and employees reach a consensus in the subscription price and number of shares.

(q) Income taxes

Income taxes comprise current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes shall be recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to the temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes shall not be recognized for the following exceptions:

- (i) Temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits (losses) at the time of the transaction;
- (ii) Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- (iii) taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognized for the carry forward of unused tax losses, unused tax credits, and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized; such reductions are reversed when the probability of future taxable profits improves.

Deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reserve, using tax rates enacted or substantively enacted at the reporting date, and reflect uncertainty related to income taxes, if any.

Deferred tax assets and liabilities are offset if the following criteria are met:

- (i) the Group has a legally enforceable right to set off current tax assets against current tax liabilities; and
- (ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
 - 1) the same taxable entity; or
 - 2) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.
- (r) Earnings per Share

The Group discloses the basic and diluted earnings per share attributable to ordinary shareholders of the Company. Basic earnings per share is calculated as the profit attributable to the ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding. Diluted earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding after adjustment for the effects of all potential dilutive ordinary shares. Such as employee bonuses not yet resolved by the shareholders.

(s) Operating segments

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Group). Operating results of the operating segment are regularly reviewed by the Group's chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. Each operating segment consists of standalone financial information.

(t) Government grants

The Group recognizes an unconditional government grant in profit or loss as other income when the grant becomes receivable. Grants that compensate the Group for expenses or losses incurred are recognized in profit or loss on a systematic basis in the periods in which the expenses or losses are recognized.

For government grants related to depreciated assets, the Group recognized as the deduction of the assets if there is reasonable assurance that the grants will be received and the Group will comply with the conditions associated with the grant; and through the decrease in depreciation expenses, the grants are then recognized in profit or loss during the useful lives of the depreciated assets.

(5) Significant accounting assumptions and judgments, and major sources of estimation uncertainty:

The preparation of the consolidated financial statements in conformity with the Regulations and the IFRSs endorsed by the FSC requires management to make judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

The management continues to monitor the accounting estimates and assumptions. The management recognizes any changes in accounting estimates during the period and the impact of those changes in accounting estimates in the following period.

A critical judgment made in applying accounting policies that have significant effects on the amounts recognized in the consolidated financial statements is as follows:

Judgment regarding control of subsidiaries

The Group owns 20% shares of the related party MATC Technology(M) Sdn. Bhd., and the rest of 80% shares are owned by another single shareholder. Therefore, it is determined that the Group has no significant influence on MATC Technology(M) Sdn. Bhd.

Information about accounting assumptions and estimation uncertainties that have not a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the next financial year COVID-19 pandemic has not a significant influence on the Group.

The Group's accounting policies include measuring financial and nonfinancial assets and liabilities at fair value through profit or loss. The Group's financial division conducts independent verification on fair value by using data sources that are independent, reliable, and representative of exercise prices. This financial division also periodically adjusts valuation models, conducts back testing, renews input data for valuation models, and makes all other necessary fair value adjustments to assure the rationality of fair value.

The Group strives to use market observable inputs when measuring assets and liabilities. Different levels of the fair value hierarchy to be used in determining the fair value of financial instruments are as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the assets or liability that are not based on observable market data.

For any transfer within the fair value hierarchy, the impact of the transfer is recognized on the reporting date. Please refer to Note 6(r) for assumptions used in measuring fair value.

(6) Explanation of significant accounts:

(a) Cash and cash equivalents

| | Dec | December 31, 2020 | | |
|---|-----|----------------------|---------|--|
| Cash, petty cash, check and demand deposits | \$ | 524,527 | 522,812 | |
| Time deposits | | 265,980 | 365,720 | |
| Cash and cash equivalents | \$ | 790,507 | 888,532 | |

Please refer to note 6(r) for the exchange rate risk, interest rate risk, and sensitivity analysis of the financial assets and liabilities of the Group.

(b) Non-current financial assets at amortized cost

| | December 31, 2021 | December 31, 2020 |
|--------------------------|----------------------|----------------------|
| Restricted bank deposits | \$ <u> </u> | 4,852 |

On December 5, 2019, the Group applied to IRS for the application of "The Management, Utilization and Taxation of Repatriated Offshore Funds Act". The application had been approved and the dividend had been remitted back to the parent subsequently. According to the Act, the funds need to be deposited in a special-purpose account for five years and 5% of the funds can be used without restriction, 25% can be used on financial investment, and 70%, at least, can be used for the project investment plan approved by the Ministry of Economic Affairs. Otherwise, the funds can only be redeemed within 3 consecutive year on average after five years maturity. The Group has applied to the Ministry of Economic Affairs for substantial investments and has obtained approval, that were expected to be used for plant expansion and capital expenditure.

Please refer to note 6(r) for the exchange rate risk.

(c) Notes and accounts receivable (include related parties)

| | Dec | December 31, 2020 | |
|--|-----|-------------------|---------|
| Notes receivable from operating activities | \$ | 28,441 | 1 |
| Accounts receivable | | 339,643 | 416,165 |
| Accounts receivable-related parties | | 159,777 | 130,784 |
| Less: Loss allowance | | (20,862) | (4,354) |
| | \$ | <u>506,999</u> | 542,596 |

The Group applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, notes and accounts receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward looking information, including macroeconomic and relevant industry information. The loss allowance provision for notes and accounts receivables was determined as follows:

| | | De | ecember 31, 202 | 21 |
|---|-----|-----------------------|-----------------------------------|-----------------------------|
| Notes and Accounts Receivable -non-related parties | | ss carrying amount | Weighted- average loss rate | Loss allowance provision |
| Current | \$ | 311,411 | 1% | 3,376 |
| Past due(days): | | | | |
| 0 to 60 | | 14,140 | 1% | 141 |
| 61 to 120 | | 8,671 | 5% | 434 |

| 0 to 60 | | 53,611 | 1% | 536 |
| 61 to 120 | | 1,288 | 5% | 64 |
| 121 to 180 | | 190 | 20% | 38 |
| | \$ | 416,166 | | 4,354 |
| | | De | ecember 31, 202 | 20 |
| Accounts Receivable | | ss carrying | Weighted- average loss | Loss allowance |
| -related parties | | 120 784 | rate | provision |
| Current | \$ | 130,784 | 0% | - |

Current

The movement in the allowance for notes and accounts receivable was as follows:

| | 2021 | |
|---------------------------------------|--------------|-------|
| Balance on January 1, 2021 and 2020 | \$ 4,354 | 2,552 |
| Impairment losses recognized | 16,623 | 1,764 |
| Foreign exchange (gains) losses | (115) | 38 |
| Balance on December 31, 2021 and 2020 | \$ 20,862 | 4,354 |

(Continued)

As of December 31, 2021 and 2020, the Group did not provide any notes and accounts receivable as collateral for its loans.

Please refer to note 6(r) for other credit risk.

(d) Inventory

| | Decer 2 | December 31, 2020 | |
|-------------------------------|------------|----------------------|---------|
| Raw materials and consumables | \$ | 79,880 | 63,653 |
| Work in progress | | 109,696 | 107,610 |
| Finished goods | | 274,856 | 187,229 |
| | \$ | 464,432 | 358,492 |

The details of the cost of sales was as follows:

| | | 2021 | 2020 |
|---|-----------|-----------|-----------|
| Inventory that has been sold | \$ | 1,619,827 | 1,397,524 |
| Product warranty costs | | 39,721 | 30,413 |
| Abnormal amounts of production costs of inventories | | 34,306 | 31,436 |
| Write-down of inventories | | 9,932 | 24,182 |
| Inventory profit or losses and others | | 4,153 | 2,718 |
| | <u>\$</u> | 1,707,939 | 1,486,273 |

As of December 31, 2021 and 2020, the Group did not provide any inventories as collateral for its loans.

(e) Investments accounted for using equity method

The Group's financial information for investments accounted for using the equity method that are individually insignificant was as follows:

| | | Main operating | Propor | tion of |
|--------------------|------------------------|-----------------------|----------|-----------|
| | | location/ | shareh | olding |
| Name of | Nature of Relationship | Registered | and voti | ng rights |
| | _ | Country of the | December | December |
| Affiliates | with the Group | Company | 31, 2021 | 31, 2020 |
| MATC Technology(M) | Production of hardware | Malaysia | 20.00 % | 20.00 % |
| Sdn. Bhd. | components | | | |

The following consolidated financial information of significant affiliates has been adjusted according to individually prepared IFRS financial statements of these affiliates:

| | ember 31, 2021 | December 31, 2020 |
|--|-------------------|----------------------|
| Carrying amount of individually insignificant associates' equity | \$ 29,323 | 37,016 |

| | | 2021 | |
|-----------------------------------|-----------|---------|----------|
| Attributable to the Group: | | | |
| Loss from continuing operations | \$ | (5,379) | (29,021) |
| Other comprehensive income (loss) | | (2,314) | (2,484) |
| Comprehensive income (loss) | <u>\$</u> | (7,693) | (31,505) |

As of December 31, 2021 and 2020, the Group did not provide any investments accounted for using the equity method as collateral for its loans.

(f) Property, plant and equipment

The cost, depreciation, and impairment of the property, plant and equipment of the Group, were as follows:

| | | Land | Buildings and construction | Machinery and equipment | Office and other facilities | Construction in progress and testing equipment | Total |
|---------------------------------------|---------|---------|----------------------------------|-------------------------------|-----------------------------------|---|-----------|
| Cost or deemed cost: | | | | | | | |
| Balance on January 1, 2021 | \$ | 596,362 | 317,536 | 901,174 | 526,287 | 24,491 | 2,365,850 |
| Additions | | - | - | 53,062 | 12,677 | 38,142 | 103,881 |
| Disposal | | - | - | (16,253) | (8,745) | - | (24,998) |
| Transfer | | - | - | 4,881 | 2,283 | (13,437) | (6,273) |
| Effect of movements in exchange rates | | - | (6,948) | (9,817) | (8,694) | (2,069) | (27,528) |
| Balance on December 31, 2021 | <u></u> | 596,362 | 310,588 | 933,047 | 523,808 | 47,127 | 2,410,932 |
| Balance on January 1, 2020 | \$ | 596,362 | 295,079 | 855,128 | 500,369 | 6,497 | 2,253,435 |
| Additions | | - | 26,315 | 53,436 | 32,243 | 23,202 | 135,196 |
| Disposal | | - | - | (3,793) | (3,346) | - | (7,139) |
| Transfer | | - | 691 | 2,218 | 1,377 | (4,589) | (303) |
| Effect of movements in exchange rates | | - | (4,549) | (5,815) | (4,356) | (619) | (15,339) |
| Balance on December 31, 2020 | <u></u> | 596,362 | 317,536 | 901,174 | 526,287 | 24,491 | 2,365,850 |

| Effect of movements in exchange rates | | - | (1,911) | (4,633) | (4,039) | | (10,583) |
| Balance on December 31, 2020 | \$ | - | 74,866 | 744,634 | 432,839 | | 1,252,339 |
| Carrying amounts: | | | | | | | |
| Balance on December 31, 2021 | \$ | 596,362 | 232,371 | 162,660 | 79,211 | 47,127 | 1,117,731 |
| Balance on December 31, 2020 | \$ | 596,362 | 242,670 | 156,540 | 93,448 | 24,491 | 1,113,511 |
| Balance on January 1, 2020 | \$ | 596,362 | 224,646 | 154,462 | 92,701 | 6,497 | 1,074,668 |

(Continued)

In 2021 and 2020, the Group concluded that some of the machinery and equipment are in an idle. Therefore, the Group recognized impairment loss amounting to \$3,360 thousand and \$961 thousand, which report as non-operating expense, respectively.

As of December 31, 2021 and 2020, for the Group pledged property, plant and equipment as collateral for long-term borrowings, please refer to Note 8.

(g) Right-of-use assets

The Group leases many assets including land, buildings and structures, and other equipment. Information about leases for which the Group as a lessee is presented below:

| | | Land | Buildings and structures | Office and other facilities | Total |
|---|-----------|---------|--------------------------------|-----------------------------------|---------|
| Cost: | | | | | |
| Balance at January 1, 2021 | \$ | 60,122 | 27,683 | 2,411 | 90,216 |
| Additions | | - | 481 | 1,059 | 1,540 |

| Balance at December 31, 2020 | \$ | 56,581 | 11,877 | 940 | 69,398 |
| Balance at January 1, 2020 | \$ | 60,301 | 19,342 | 2,313 | 81,956 |

(h) Short-term borrowings

The details were as follows:

| | December 31, 2021 | | |
|-------------------------|----------------------|-------------|-------------|
| Unsecured bank loans | \$_ | 215,360 | 211,819 |
| Range of interest rates | = | 0.93%~0.94% | 0.94%~5.02% |

(i) Long-term borrowings

The details were as follows:

| | D | December 31, 2020 | |
|-------------------------|-------------|----------------------|-------------|
| Unsecured bank loans | \$ | 100,000 | 100,000 |
| Secured bank loans | | 318,000 | 382,000 |
| Less: current portion | | (164,000) | (64,000) |
| Total | \$ <u> </u> | 254,000 | 418,000 |
| Range of interest rates | = | 0.90%~1.10% | 0.90%~1.33% |

For the collateral for long-term borrowings, please refer to note 8.

Lease liabilities (j)

The details were as follows:

| | | December 31, 2021 | | |
|-------------|-----------|----------------------|--------|--|
| Current | <u>\$</u> | 1,110 | 9,188 | |
| Non-current | \$ | 55,597 | 58,498 | |

2021

The amounts recognized in profit or loss were as follows:

| | 2021 | | 2020 |
|--|------|--------|--------|
| Interest expenses on lease liabilities | \$ | 3,518 | 4,044 |
| Expenses relating to short-term leases | \$ | 11,450 | 10,495 |

For the maturity analysis, please refer to note 6(r).

The amounts recognized in the statement of cash flows for the Group was as follows:

| | , | 2021 | 2020 |
|-------------------------------|----|--------|--------|
| Total cash outflow for leases | \$ | 24,191 | 24,191 |

2020

(i) Real estate and buildings leases

The Group leases land and buildings for its offices and factories. The leases of offices typically run for a period of 2 to 5 years, and about 50 years for land. Some leases contain extension options exercisable up to the same period as original contracts before the end of the contract period.

(ii) Other leases

The Group leases staff dormitories, transportation equipment, and office facilities with lease terms of 2 to 5 years. Some lease contracts stipulate that upon the expiration of the lease period, which can extend to the same period as original contracts.

These are short-term lease the Group leases staff dormitories and some leases, with lease terms within one year. The Group has elected not to recognize right-of-use assets and lease liabilities for these leases.

(k) Employee benefit

(i) Defined benefit plans

Reconciliation of defined benefit obligation at present value and plan asset at fair value are as follows:

| | December 31, | | December 31, | |
|--|--------------|----------|--------------|--|
| | | 2021 | 2020 | |
| Present value of the defined benefit obligations | \$ | (26,028) | (26,351) | |
| Fair value of plan assets | | 51,813 | 50,772 | |
| Net defined benefit assets | \$ | 25,785 | 24,421 | |

The Group makes defined benefit plan contributions to the pension fund account with Bank of Taiwan that provides pensions for employees upon retirement. Plans (covered by the Labor Standards Law) entitle a retired employee to receive retirement benefits based on years of service and average monthly salary for the six months prior to retirement.

1) Composition of plan assets

The Group allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, Ministry of Labor. With regard to the utilization of the funds, minimum earnings shall be no less than the earnings attainable from two-year time deposits with interest rates offered by local banks.

The Group's Bank of Taiwan labor pension reserve account balance amounted to \$51,813 thousand as of December 31, 2021. For information on the utilization of the labor pension fund assets, including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labor.

2) Movements in present value of the defined benefit obligations

The movement in present value of the defined benefit obligations for the Group were as follows:

| | 2021 | 2020 |
|---|--------------|--------|
| Defined benefit obligations at January 1 | \$ 26,351 | 25,495 |
| Current service costs and interest costs | 147 | 253 |
| Remeasurements loss (gain): | | |
| Return on plan assets excluding interest income | 160 | (292) |
| -demographic assumptions | 994 | 149 |
| -financial assumptions | (1,209) | 746 |
| Benefits paid | (415) | - |
| Defined benefit obligations at December 31 | \$ 26,028 | 26,351 |

3) Movements of defined benefit plan assets

The movements in the present value of the defined benefit plan assets for the Group were as follows:

| | 2021 | 2020 |
|---|--------------|--------|
| Fair value of plan assets at January 1 | \$ 50,772 | 48,231 |
| Interest income | 179 | 389 |
| Remeasurements loss (gain): | | |
| Return on plan assets excluding interest income | 722 | 1,551 |
| Contributions paid by the employer | 555 | 601 |
| Benefits paid | (415) | - |
| Fair value of plan assets at December 31 | \$ 51,813 | 50,772 |

4) Expenses recognized in profit or loss

The expenses recognized in profit or loss for the Group were as follows:

| | 2 | 2021 | 2020 |
|--|----|------|-------|
| Current service costs | \$ | 55 | 49 |
| Net interest of net liabilities (assets) for defined benefit obligations | | (87) | (185) |
| | \$ | (32) | (136) |
| Operating expense | \$ | (32) | (136) |

5) Actuarial assumptions

The principal actuarial assumptions at the reporting date were as follows:

| | 2021.12.31 | 2020.12.31 |
|-----------------------------|------------|------------|
| Discount rate | 0.750 % | 0.350 % |
| Future salary increase rate | 2.875 % | 2.875 % |

The expected allocation payment to be made by the Group to the defined benefit plans for the one-year period after the reporting date is \$555 thousands.

The weighted average lifetime of the defined benefits plans is 9 years.

6) Sensitivity analysis

If the actuarial assumptions had changed, the impact on the present value of the defined benefit obligation shall be as follows:

| | Influences of defined benefit as | | | |
|--------------------------------------|----------------------------------|----------------|--|--|
| Original actuarial assumptions | Increased 0.5% | Decreased 0.5% | | |
| December 31, 2021 | | | | |
| Discount rate 0.750% | 756 | (795) | | |
| Future salary increasing rate 2.875% | (756) | 726 | | |
| December 31, 2020 | | | | |
| Discount rate 0.350% | 834 | (879) | | |
| Future salary increasing rate 2.875% | (830) | 796 | | |

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown above. The method used in the sensitivity analysis is consistent with the calculation of pension liabilities in the balance sheets.

There is no change in the method and assumptions used in the preparation of sensitivity analysis for 2021 and 2020.

(ii) Defined contribution plans

The Company allocates 6% of each employee's monthly wages to the labor pension personal account at the Bureau of Labor Insurance in accordance with the provisions of the Labor Pension Act. Under these defined contribution plans, the Company allocates a fixed amount to the Bureau of Labor Insurance without additional legal or constructive obligation.

The pension costs incurred from the contributions to the Bureau of the Labor Insurance amounted to \$36,156 thousands and \$25,990 thousands for the years ended December 31, 2021 and 2020, respectively.

(1) Income taxes

(i) The components of income tax in the years 2021 and 2020 were as follows:

| | 2021 | | 2020 | |
|--------------------|------|--------|--------|--|
| Current tax | \$ | 11,129 | 20,958 | |
| Deferred tax | | 14,609 | 2,519 | |
| Income tax expense | \$ | 25,738 | 23,477 | |

(ii) The amount of income tax recognized directly in equity or other comprehensive income for 2021 and 2020 were both 0.

(iii) Reconciliation of income tax and profit before tax for 2021 and 2020 is as follows :

| | | 2021 | 2020 |
|---|---------|----------|----------|
| Profit excluding income tax | <u></u> | 114,955 | 53,464 |
| Income tax using the Company's domestic tax rate | | 49,816 | 42,692 |
| Tax incentive | | (4,131) | - |
| Change in provision in prior periods | | (6,659) | (8,320) |
| Change in unrecognized temporary differences and others | | (13,288) | (10,895) |
| | \$ | 25,738 | 23,477 |

(iv) Deferred tax assets and liabilities

1) Unrecognized deferred tax liabilities

The Company's foreign subsidiaries have retained earnings, because of the demand of capital expenditures and working capital. The Group expects that some of these retained earnings will not be returned back to the Company in the foreseeable future under the consideration of Group's integral development and investment plan. Hence, the temporary differences are not recognized under deferred tax liabilities. As of December 31, 2021 and 2020, the unrecognized deferred tax liabilities amount was \$26,090 thousand, respectively.

2) Unrecognized deferred tax assets

| | Dec | ember 31, 2021 | December 31, 2020 | |
|--|-----|-------------------|----------------------|--|
| Tax effect of deductible temporary differences | \$ | 22,708 | 23,508 | |
| The carry forward of unused tax losses | | 10,970 | 16,660 | |
| | \$ | 33.678 | 40,168 | |

The Income Tax Act allows net losses, as assessed by the tax authorities, to offset taxable income over a period of five to ten years for local tax reporting purposes. Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the Group can utilize the benefits therefrom.

As of December 31, 2021 and 2020, the information of the Group's tax losses are as follows, and the Group's unused tax losses for which no deferred tax assets recognized were \$73,136 thousand and \$100,316 thousand.

| Company name | Year of loss | Unused tax loss | Expiry date |
|---------------------|-----------------|-----------------|-------------|
| The Company | 2020 (Filed) | \$ 60,334 | 2030 |
| АМО | 2018 (Approved) | 7,837 | 2028 |
| AMO | 2019 (Approved) | 65,299 | 2029 |

3) Recognized deferred tax assets and liabilities

Changes in the amount of deferred tax assets and liabilities for 2021 and 2020 were as follows:

| | Unrealized exchange gain | | | | | | Income from equity investments under the equity method | Fiscal and tax difference from Depreciation | Total |
|----------------------------------|-----------------------------|-------|---------|--------|---------|--|--|--|-------|
| Deferred Tax Liabilities: | | | | | | | | | |
| Balance at January 1, 2021 | \$ | - | 42,554 | 16,416 | 58,970 | | | | |
| Recognized in profit or loss | | - | (3,722) | 259 | (3,463) | | | | |
| Balance at December 31, 202 | 1\$ | - | 38,832 | 16,675 | 55,507 | | | | |
| Balance at January 1, 2020 | \$ | 341 | 18,285 | 16,750 | 35,376 | | | | |
| Recognized in profit or loss | | (341) | 24,269 | (334) | 23,594 | | | | |
| Balance at December 31, 202 | 0\$ | - | 42,554 | 16,416 | 58,970 | | | | |

| | Unrealized exchange loss | Allowance to reduce inventory | Unused tax losses carry forwards | Others | Total |
|------------------------------|-----------------------------|-------------------------------------|--|---------|----------|
| Deferred Tax Assets: | | | | | |
| Balance at January 1, 2021 | \$ (764) | (5,000) | (30,073) | (5,272) | (41,109) |
| Recognized in profit or loss | 429 | 557 | 18,006 | (920) | 18,072 |
| Balance at December 31, 202 | 1 \$ <u>(335</u>) | (4,443) | (12,067) | (6,192) | (23,037) |
| Balance at January 1, 2020 | (2,298) | (3,753) | (9,203) | (4,780) | (20,034) |
| Recognized in profit or loss | 1,534 | (1,247) | (20,870) | (492) | (21,075) |
| Balance at December 31, 2020 | 0\$ <u>(764</u>) | (5,000) | (30,073) | (5,272) | (41,109) |

(v) Examination and Approval

The Company's tax returns for the years through 2019 were examined and approved by the Taipei National Tax Administration.

(m) Capital and other equity

For the years ended December 31, 2021 and 2020, the authorized capital of the Company consisted of both \$1,000,000 thousand shares, with par value of \$10 per share, and its outstanding capital consisted of both \$770,000 thousand common shares of stock.

(i) Capital surplus

The balances of capital surplus were as follows:

| | December 31, 2021 | | December 31, 2020 |
|-------------------------------|----------------------|---------|----------------------|
| Issued share premium | \$ | 604,049 | 634,849 |
| Adjustment of re-segmentation | | 42,439 | 42,439 |
| Employee share options | | 7,847 | 7,847 |
| | \$ | 654,335 | 685,135 |

According to the R.O.C. Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, capital increases by transferring capital surplus in excess of par value should not exceed 10% of the total common stock outstanding.

In according to the company shareholder's meeting held on July 30, 2021 and May 15, 2020, approved to distribute the cash dividend of \$30,800 thousand and \$19,250 thousand, representing 0.40 and 0.25 New Taiwan dollars per share by using the issued share premium.

(ii) Retained earnings

The Company's Articles of Incorporation requires that after-tax earnings shall first be offset against any deficit, and 10% of the balance shall be set aside as legal reserve. The appropriation for legal reserve is discontinued when the balance of the legal reserve equals the total authorized capital. Aside from the aforesaid, the Company may, under its Articles of Incorporation or as required by the government, appropriate or reverse for special reserve. The remaining balance of the earnings, if any, may be appropriated according to a resolution of a shareholder's meeting.

In consideration of the shareholder's long-term benefit and stable operation, the Company adopts a stable dividends policy. Therefore, cash dividends should not be less than 30% of aggregate dividends

1) Legal reserve

When a company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

2) Special reserve

In accordance with Ruling No. 1010012865 issued by the FSC on April 6, 2012, a portion of current-period earnings and undistributed prior-period earnings shall be reclassified as special earnings reserve during earnings distribution. The amount to be reclassified should equal the current-period total net reduction of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be reclassified as special earnings reserve (and does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

3) Earnings distribution

Earnings distribution for 2020 and 2019 were decided via the general meeting of shareholders held on July 30, 2021 and May 15, 2020. The relevant dividend distributions to shareholders were as follows.

| | 20 | 20 | 2019 | | |
|---|----------------|-----------------|---------------------|-----------------|--|
| | nount share | Total amount | Amount per share | Total amount | |
| Dividends distributed to ordinary shareholders: | | | | | |
| Cash | \$ 0.15 | 11,550 | 0.10 | 7,700 | |

Earnings distributions for 2020 and 2019 that decided by the general meeting of shareholders were not different from the resolution of board meeting. Related information would be available at the Market Observation Post System website.

- (n) Earnings per share
 - (i) Basic earnings per share

The calculation of basic earnings per share at December 31, 2021 and 2020, were based on the profit attributable to ordinary shareholders of the Company and the weighted average number of ordinary shares outstanding, calculated as follows:

| | | 2021 | 2020 |
|--|----|--------|--------|
| Basic earnings per share | | | |
| Profit attributable to ordinary shareholders of the company | \$ | 89,217 | 29,987 |
| Weighted-average number of ordinary shares (thousand shares) | — | 77,000 | 77,000 |
| Basic earnings per share(dollar) | \$ | 1.16 | 0.39 |

(ii) Diluted earnings per share

The calculation of diluted earnings per share as of December 31, 2021 and 2020 were based on the profit attributable to ordinary shareholders of the Company and the weighted average number of ordinary shares outstanding after adjusting the effects of all dilutive potential ordinary shares, calculated as follows.

| | | 2021 | 2020 |
|---|----|--------|--------|
| Diluted earnings per share: | | | |
| Profit attributable to ordinary shareholders of the Company | \$ | 89,217 | 29,987 |
| Weighted-average number of ordinary shares (diluted (thousand shares) | d) | 77,365 | 77,110 |
| Diluted earnings per share(dollar) | \$ | 1.15 | 0.39 |

Weighted-average number of ordinary shares (diluted) (thousand shares):

| | 2021 | 2020 |
|--|--------|--------|
| Weighted-average number of ordinary shares (basic) (thousand shares) | 77,000 | 77,000 |
| Effect of dilutive potential ordinary shares: | | |
| Effect of employee share bonus | 365 | 110 |
| Weighted average number of ordinary shares (diluted) (thousand and shares) | 77,365 | 77,110 |

(o) Revenue from contracts with customers

(i) Details of revenue

| | 2021 | 2020 |
|------------------------------|-----------------|-----------|
| Primary geographical markets | | |
| Singapore | \$ 489,689 | 499,609 |
| Taiwan | 379,276 | 255,747 |
| Malaysia | 353,678 | 390,373 |
| China | 306,718 | 274,257 |
| Thailand | 282,060 | 165,181 |
| America | 238,891 | 225,420 |
| Others | 117,591 | 111,113 |
| | \$ 2,167,903 | 1,921,700 |

| Others | 141,814 | 160,288 |
| | \$ 2,167,903 | 1,921,700 |
| Contract holonces | | |

| (ii) Contract balances | |
|------------------------|--|
|------------------------|--|

| | Dec | cember 31, 2021 | December 31, 2020 | January 1, 2020 |
|--------------------------------|-----|--------------------|----------------------|--------------------|
| Notes and accounts receivable | \$ | 527,861 | 546,950 | 401,021 |
| Less: allowance for impairment | | (20,862) | (4,354) | (2,552) |
| Total | \$ | 506,999 | 542,596 | 398,469 |

For details on accounts receivable and allowance for impairment, please refer to note 6(c).

(p) Employee compensation and directors' and supervisors' remuneration

In accordance with the articles of incorporation the Company should contribute between $3\% \sim 9\%$ of the profit as employee compensation and less than 3% as directors' and supervisors' remuneration when there is profit for the year. However, if the Company has accumulated deficits, the profit should be reserved to offset the deficit.

The amount of remuneration of each director and supervisor and of compensation for employees entitled to receive the abovementioned employee compensation is approved by the Board of Directors. The recipients of shares and cash may include the employees of the Company's affiliated companies who meet certain conditions.

For the years ended December 31, 2021 and 2020, the Company estimated its employee remuneration amounting to \$9,991 thousand and \$3,303 thousand, directors' and supervisors' remuneration amounting to \$1,110 thousand and \$367 thousand, respectively. The estimated amounts mentioned above are calculated based on the net profit before tax, excluding the remuneration to employees, directors and supervisors of each period, multiplied by the percentage of remunerations were expensed under operating costs or operating expenses. Related information would be available at the Market Observation Post System website.

(q) Non-operating income and expenses

(i) Other income

The details of other income were as follows:

| | 2021 | 2020 | |
|-----------------|--------------|--------|--|
| Rent income | \$ 3,781 | 3,172 | |
| Interest income | 1,497 | 4,489 | |
| Other income | 23,333 | 29,207 | |
| | \$ 28,611 | 36,868 | |

(ii) Other gains and losses

The details of other gains and losses were as follows:

| | 2021 | 2020 |
|--|----------------|----------|
| Foreign exchange losses | \$ (23,339) | (53,346) |
| Loss on non-financial assets impairment | (3,360) | (961) |
| Losses on disposals of property, plant and equipment | (337) | (327) |
| Others | (875) | (584) |
| | \$ (27,911) | (55,218) |

(r) Financial instruments

(i) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, which arises from the Group's accounts receivable.

1) Credit risk exposure

As at reporting date, the carrying amount of financial assets represents the maximum amount exposed to credit risk. For the year end in 2021 and 2020, the maximum amount was \$1,309,404 thousand and \$1,441,622 thousand, respectively. Implicit credit risk of the Group is inherent in its cash and accounts receivable. The cash is deposited in different financial institutions. The Company manages the credit risk exposure with each of these financial institutions and believes that cash do not have a significant credit risk concentration.

2) Concentration of credit risk

The concentration of credit risk is mainly affected by creditors' rating and the client's industry. As of, December 31, 2021 and 2020, 58% and 68%, respectively, of the Group's accounts receivable were concentrated on top five sales clients.

- For the details of the accounts receivable aging and loss allowance, please refer to note 6 (c).
- (ii) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group manages sufficient cash and cash equivalents so as to cope with its operations and mitigate the effects of fluctuations in cash flows. The Group's management supervises the banking facilities and ensures compliance with the terms of loan agreements.

The following table shows the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements.

| | (| Carrying amount | Contractual cash flows | Less than 1 years | 1-2 years | 2-5 years | Over 5 years |
|--|---------|--------------------|---------------------------|----------------------|-----------|-----------|--------------|
| December 31, 2021 | | | | | <u> </u> | | |
| Non derivative financial liabilities | | | | | | | |
| Bank loans | \$ | 633,360 | 643,026 | 383,124 | 66,530 | 193,372 | - |
| Accounts payable (including related parties) | | 304,336 | 304,336 | 304,336 | - | - | - |
| Lease liabilities | | 56,707 | 114,372 | 4,076 | 4,145 | 11,690 | 94,461 |
| Other financial liabilities | | 264,001 | 264,001 | 264,001 | | | |
| | <u></u> | 1,258,404 | 1,325,735 | 955,537 | 70,675 | 205,062 | 94,461 |
| December 31, 2020 | | | | | | | |
| Non derivative financial liabilities | | | | | | | |
| Bank loans | \$ | 693,819 | 711,460 | 282,269 | 168,058 | 198,628 | 62,505 |
| Accounts payable (including related parties) | | 267,054 | 267,054 | 267,054 | - | - | - |
| Lease liabilities | | 67,686 | 131,909 | 12,765 | 4,046 | 11,724 | 103,374 |
| Other financial liabilities | - | 264,033 | 264,033 | 264,033 | | | |
| | \$ | 1,292,592 | 1,374,456 | 826,121 | 172,104 | 210,352 | 165,879 |

The Group does not expect the cash flows included in the maturity analysis to occur significantly earlier or at significantly different amounts.

(iii) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

1) Exposure to foreign currency risk

The Group's significant exposure to foreign currency risk was as follows:

| | December 31, 2021 | | | | December 31, 2020 | | |
|-----------------------|-----------------------|------------------|---------|---------------------|-------------------|---------|--|
| | oreign urrency | Exchange rate | TWD | Foreign currency | Exchange rate | TWD | |
| Financial assets | | | | | | | |
| Monetary items | | | | | | | |
| USD | \$ 21,242 | 27.68 | 587,978 | 21,686 | 28.48 | 617,629 | |
| Financial liabilities | | | | | | | |
| Monetary items | | | | | | | |
| USD | 3,416 | 27.68 | 94,561 | 1,118 | 28.48 | 31,852 | |

2) Sensitivity analysis

The Group's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, trade receivables, and trade payables that are denominated in foreign currency. A weakening or strengthening of 1% of the NTD against the Foreign currency as of 31 December, 2021 and 2020 would have decreased or increased the net profit before tax by \$4,934 thousand and \$5,858 thousand, respectively. The analysis assumes that all other variables remain constant. The analysis is performed on the same basis for 2020.

3) Foreign exchange gain and loss on monetary items

Since the Group has many kinds of functional currency, the information on foreign exchange gain (loss) on monetary items is disclosed by total amount. For years 2021 and 2020, foreign exchange loss (including realized and unrealized portions) amounted to \$23,339 thousand and \$53,346 thousand, respectively.

4) Interest rate analysis

Please refer to the notes on liquidity risk management and interest rate exposure of the Group's financial liabilities.

The following sensitivity analysis is based on the exposure to the interest rate risk of derivative and non-derivative financial instruments on the reporting date. Regarding assets with variable interest rates, the analysis is based on the assumption that the amount of assets outstanding at the reporting date was outstanding throughout the year. The rate of change is expressed as the interest rate increases or decreases a quarter-point when reporting to management internally, which also represents the Group management's assessment of the reasonably possible interest rate change.

If the interest rate had increased or decreased by a quarter-point, the Group's net income before tax would have increased or decreased by \$268 thousands and \$113 thousands for the year ended 2021 and 2020 with all other variable factors remaining constant. This is mainly due to the Group's financial liabilities in variable-rate loans and deposits.

The Group's fixed-interest-rate financial assets and liabilities are measured at amortized cost. The changes in market rate do not affect the Group's profit or loss on the reporting date. Therefore, the Group does not disclose the sensitivity analysis of the changes in fair value.

(iv) Fair value of financial instruments

The carrying amount and fair value of the Group' s financial assets and liabilities, including the information on fair value hierarchy were as follows; however, except as described in the following paragraphs, for financial instruments not measured at fair value whose carrying amount is reasonably close to the fair value, disclosure of fair value information is not required:

| | December 31, 2021 | | | | | |
|--|-------------------|------------|---------|---------|---------|-------|
| | | Fair Value | | | | |
| | B | ook Value | Level 1 | Level 2 | Level 3 | Total |
| Financial assets measured at amortized cost | | | | | | |
| Cash and cash equivalents | \$ | 790,507 | | | | |
| Notes and accounts receivable | | 347,222 | | | | |
| Accounts receivables – related party | | 159,777 | | | | |
| Other financial assets | _ | 11,898 | | | | |
| Subtotal | \$ | 1,309,404 | | | | |
| Financial liabilities measured at amortized cost | _ | | | | | |

| Subtotal | \$ | 1,441,622 | | | | |
| Financial liabilities measured at amortized cost | _ | | | | | |
| Long term and short term borrowings | \$ | 693,819 | | | | |
| Accounts payable (including related parties) | | 267,054 | | | | |
| Lease liabilities | | 67,686 | | | | |
| Other financial liabilities | | 264,033 | | | | |
| Subtotal | \$_ | 1,292,592 | | | | |

1) Valuation techniques for financial instruments measured at fair value

A financial instrument is regarded as being quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's-length basis. Whether transactions are taking place 'regularly' is a matter of judgment and depends on the facts and circumstances of the market for the instrument.

If quoted price of a financial instrument can be obtained in time and often from exchanges, brokers, underwriters, industrial union, pricing institute, or authorities and such price can reflect those actual trading and frequently happen in the market, then the financial instrument is considered to have quoted price in active market. If a financial instrument does not accord with the definition aforementioned, then it is considered to be without quoted price in active market. In general, market with low trading volume or high bid-ask spreads is an indication of non-active market.

The Group's valuation techniques and assumptions used for financial instruments measured at fair value are as follows:

• Measurements of fair value of financial instruments with an active market, such as corporate stock, beneficiary certificate etc., its fair value depends on the market quotation.

- Measurements of fair value of financial instruments without an active market are based on a valuation technique or quoted price from a competitor. Fair value measured by a valuation technique can be extrapolated from similar financial instruments, the discounted cash flow method, or other valuation technique including a model using observable market data at the reporting date.
- 2) There was no transfer between each fair value levels in 2021 and 2020.
- (s) Financial risk management
 - (i) Structure of risk management

The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group Audit Committee oversees how management monitors compliance with the Group' s risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

- (ii) The Group have exposures to the following risks from its financial instruments:
 - 1) Credit risk
 - 2) Liquidity risk
 - 3) Market risk

The following likewise discusses the Group's objectives, policies and processes for measuring and managing the above mentioned risks. For more disclosures about the quantitative effects of these risks exposures, please refer to note 6(r).

(t) Capital management

The Group's capital management policy is to ensure that it has sufficient and necessary financial resources to fund its working capital needs, capital asset purchases and debt service requirements associated with its existing operations over the next 12 months. And also consider the debt ratio to maintain investor, creditor and market confidence and to sustain future development of the business. The Group's capital management strategy is consistent with the prior year, and the debt ratio is 44% and 46% at December 31, 2021 and 2020.

(u) Investing and financing activities not affecting current cash flow

The Group's investing and financing activities which did not affect the current cash flow in the years ended December 31, 2021 and 2020, were as follows:

- (i) Obtain right-of assets by lease, please refer to notes 6(g).
- (ii) Reconciliation of liabilities arising from financing activities were as follows:

| | J | anuary 1, 2021 | Cash flows | Foreign exchange movement | December 31, 2021 |
|---|----|-------------------|------------|---------------------------------|----------------------|
| Long-term borrowings | \$ | 482,000 | (64,000) | - | 418,000 |
| Short-term borrowings | | 211,819 | 3,624 | (83) | 215,360 |
| Lease liabilities | | 67,686 | (9,223) | (1,756) | 56,707 |
| Total liabilities from financing activities | \$ | 761,505 | (69,599) | (1,839) | 690,067 |

| | Ja | nuary 1, 2020 | Cash flows | Foreign exchange movement | December 31, 2020 |
|---|-----------|------------------|------------|---------------------------------|----------------------|
| Long-term borrowings | \$ | 496,000 | (14,000) | - | 482,000 |
| Short-term borrowings | | 100,000 | 111,819 | - | 211,819 |
| Lease liabilities | | 78,937 | (9,652) | (1,599) | 67,686 |
| Total liabilities from financing activities | <u>\$</u> | 674,937 | 88,167 | (1,599) | 761,505 |

(7) Related-party transactions:

| BEACON INVESTMENT LIMITED (MALAYSIA) | 24,718,763 | 32.10 % |

(14) Segment information:

(a) General information

For the purpose of resource allocation and performance measurement, the Group classified operating segment based on its business types, and supervised and managed the divisions' performance by the Group's decision-maker. The Group has three reportable segments: the Company, MAPP and AMO. The Company engages mainly in the development, design and manufacture of precise components. MAPP engages mainly in the development and manufacture of medical plastic injection and molding. AMO engages mainly in development, manufacture and selling of automatic machines. Since the divisions offer different products and use different sales strategy, the Group managed them separately. Please refer to Note 6(o) for geographic information of operating segment.

The Group measures segment's profit or loss based on their operating income and use them as the basis for performance evaluation. The accounting policies of operating segments are identical to Note 4 "summary of significant accounting policies".

Independent Auditors' Report

To the Board of Directors of Min Aik Precision Industrial Co., Ltd. :

Opinion

We have audited the financial statements of Min Aik Precision Industrial Co., Ltd. ("the Company"), which comprise the parent company only balance sheets as of December 31, 2021 and 2020, the parent company only statement of comprehensive income, changes in equity and cash flows for the year ended December 31, 2021 and 2020, and notes to the parent company only financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company only financial statements present fairly, in all material respects, the parent company only financial position of the Company as of December 31, 2021 and 2020, and its parent company only financial performance and its parent company only cash flows for the year ended December 31, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audit in accordance with the Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the parent company only financial statements of the current period. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The key audit matters that, in our professional judgement, should be communicated are as follow:

1. Inventory valuation

Please refer to Note 4(g) "Inventory" of the notes to financial statement for the accounting policies on inventory measurement.

Description of key audit matter:

The Company's inventory are measured at lower of cost and net realized value. The Company's products may be obsolescent or do not meet the market requirement due to new product release or market change. Thus, the cost of inventory may exceed its net realizable value. Moreover, the sales ability of products may affect the inventory valuation, which also need to be taken into serious consideration. Therefore, the inventory valuation is one of the key audit matters.

How the matter was addressed in our audit:

In relation to the key audit matter above, our principal audit procedures included understanding the Company's policies of inventory valuation to assess the appropriateness of its inventory valuation; on a sampling basis, testing the Company's inventory aging report to verify its correctness; understanding and testing, on a sampling basis, the selling price that the management used, or reviewing the subsequent sales of the inventories to assess the appropriateness of the net realizable value.

2. Investments accounted for using equity method

Please refer to Notes 4(h) "Investment in subsidiaries" of the notes to financial statement for the accounting policies on investment in associates.

Description of key audit matter:

The subsidiaries that accounted for using equity method, revenue recognition and inventory valuation are material to the parent company only financial statements. The abovementioned valuation may have significant impact to the Company's operating results. Therefore, the revenue recognition and inventory valuation are considered to be the key audit matters.

How the matter was addressed in our audit:

In relation to the key audit matter above, our principal audit procedures on revenue recognition included the testing of internal control system over automatic equipment revenue; inspecting the contracts entered into with the customers; sending confirmation requests to debtors selected from the sales customers. We also assessed the adequacy of the Group's disclosures of its revenue recognition policy and other related disclosures.

Our principal audit procedures of inventory valuation included understanding the subsidiaries's policies of inventory valuation to assess the appropriateness of its inventory valuation; testing, on a sampling basis, the subsidiary's inventory aging report to verify its correctness; understanding and testing, on a sampling basis, the selling price that the management used, or reviewing the subsequent sales of the inventories to assess the appropriateness of the net realizable value.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including the Audit Committee) are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of the investment in other entities accounted for using the equity method to express an opinion on this parent company only financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Cheng-Chien Chen and Yung-Hua Huang.

KPMG

Taipei, Taiwan (Republic of China) March 11, 2022

Notes to Readers

The accompanying parent company only financial statements are intended only to present the financial position, financial performance and cash flows in accordance with the accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such parent company only financial statements are those generally accepted and applied in the Republic of China.

The independent auditors' audit report and the accompanying parent company only financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of the English and Chinese language independent auditors' audit report and parent company only financial statements, the Chinese version shall prevail.

See accompanying notes to parent company only financial statements.

Notes to the Financial Statements

For the years ended December 31, 2021 and 2020

(Expressed in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

(1) Company history

Min Aik Precision Industrial Co., Ltd. (the "Company") was incorporated on January 18, 2001, as a company limited by shares and registered under the Ministry of Economic Affairs, ROC. The Company's shares were listed on the Taiwan Stock Exchange (TWSE) on January 6, 2016. The address of its registered office is No. 2, Guorui Rd., Guanyin Dist., Taoyuan City. The Company mainly engages in the processing and manufacturing of electroplating of aluminum and copper products, precision stamping components and electroless nickel plating.

(2) Approval date and procedures of the financial statements:

These parent company only financial statements were authorized for issuance by the Board of Directors on March 11, 2022.

(3) New standards, amendments and interpretations adopted:

(a) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The Company has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from January 1, 2021:

- Amendments to IFRS 4 "Extension of the Temporary Exemption from Applying IFRS 9"
- Amendments to IFRS 9, IAS39, IFRS7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform— Phase 2"

The Company has initially adopted the following new amendments, which do not have a significant impact on its financial statements, from April 1, 2021:

- Amendments to IFRS 16 "Covid-19-Related Rent Concessions beyond June 30, 2021"
- (b) The impact of IFRS issued by the FSC but not yet effective

The Company assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2022, would not have a significant impact on its financial statements:

- Amendments to IAS 16 "Property, Plant and Equipment Proceeds before Intended Use"
- Amendments to IAS 37 "Onerous Contracts Cost of Fulfilling a Contract"
- Annual Improvements to IFRS Standards 2018–2020
- Amendments to IFRS 3 "Reference to the Conceptual Framework"

(c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The following new and amended standards, which may be relevant to the Company, have been issued by the International Accounting Standards Board (IASB), but have yet to be endorsed by the FSC:

| Standards or Interpretations | Effective date per IASB | | | |
|--|--|-----------------|--|--|
| Amendments to IAS 1 "Classification of Liabilities as Current or Non-current" | The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of balance sheet, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments include clarifying the classification requirements for debt a company might settle by converting it into equity. | January 1, 2023 | | |
| Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction" | The amendments narrowed the scope of the recognition exemption so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. | January 1, 2023 | | |

The Company is evaluating the impact of its initial adoption of the abovementioned standards or interpretations on its consolidated financial position and financial performance. The results thereof will be disclosed when the Company completes its evaluation.

The Company does not expect the following other new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its financial statements:

- Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"
- IFRS 17 "Insurance Contracts" and amendments to IFRS 17 "Insurance Contracts"
- Amendments to IAS 1 "Disclosure of Accounting Policies"
- Amendments to IAS 8 "Definition of Accounting Estimates"

(4) Summary of significant accounting policies:

The significant accounting policies presented in the parent company only financial statements are summarized as below. Except for those specifically indicated, the following accounting policies were applied consistently throughout the periods presented in the parent company only financial statements.

(a) Statement of compliance

These parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

- (b) Basis of preparation
 - (i) Basis of measurement

Except for the following significant accounts, the parent company only financial statements have been prepared on a historical cost basis:

- 1) Financial instruments at fair value through profit or loss are measured at fair value;
- 2) The defined benefit assets are measured at the fair value of the plan assets less the present value of the defined benefit obligation.
- (ii) Functional and presentation currency

The functional currency of the company is determined based on the primary economic environment in which the entity operates. The parent company only financial statements are presented in New Taiwan dollars, which is the Company's functional currency. All financial information presented in New Taiwan dollars has been rounded to the nearest thousand.

- (c) Foreign currencies
 - (i) Foreign currency transactions

Transactions in foreign currencies are translated into the respective functional currencies of the Company at the exchange rates at the dates of the transactions. At the end of each subsequent reporting period, monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at that date. Non-monetary items denominated in foreign currencies that are measured at fair value are translated into the functional currencies using the exchange rate at the fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

(ii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into New Taiwan Dollars at exchange rates at the reporting date. The income and expenses of foreign operations are translated into New Taiwan Dollars at the average exchange rate. Exchange differences are recognized in other comprehensive income.

When a foreign operation is disposed of such that control, significant influence, or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When the Company disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interests. When the Company disposes of only part of its investment in an associate or joint venture that includes a foreign operation while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

(d) Classification of current and non-current assets and liabilities

An asset is classified as current under one of the following criteria, and all other assets are classified as non-current.

- (i) It is expected to be realized, or intended to be sold or consumed, in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be realized within twelve months after the reporting period; or
- (iv) The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current under one of the following criteria, and all other liabilities are classified as non-current.

- (i) It is expected to be settled in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is due to be settled within twelve months after the reporting period; or
- (iv) It does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by issuing equity instruments do not affect its classification.
- (e) Cash and cash equivalents

Cash comprises cash, and cash in bank. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Time deposits which meet the above definition and are held for the purpose of meeting short term cash commitments rather than for investment or other purposes should be recognized as cash equivalents.

(f) Financial instruments

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(i) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

On initial recognition, a financial asset is classified as measured at: amortized cost and FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

1) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- \cdot it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

2) Impairment of financial assets

The Company recognizes loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, amortized costs, notes and trade receivables, other receivable, guarantee deposit paid and other financial assets) and contract assets.

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following which are measured as 12-month ECL:

- · debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables and contract assets are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Company's historical experience and informed credit assessment as well as forward-looking information.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

At each reporting date, the Company assesses whether financial assets carried at amortized cost have occurred. Evidence that a financial assets is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 120 days past due;
- the lender of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession that the lender would not otherwise consider;

- it is probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

3) Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognized in its statement of balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

- (ii) Financial liabilities and equity instruments
 - 1) Classification of debt or equity

Debt and equity instruments issued by the Company are classified as financial liabilities or equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

3) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

4) Derecognition of financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

5) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

(g) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted average method and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(h) Investment in subsidiaries

When preparing the parent company only financial statements, investment in subsidiaries which are controlled by the Company is accounted for using the equity method. Under the equity method, the net income, other comprehensive income and equity in the parent company only financial statements are the same as those attributable to the owners of parent in the consolidated financial statements.

Changes in parent's ownership interest in a subsidiary that do not result in the loss of control are recognized under equity.

- (i) Property, plant and equipment
 - (i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

(ii) Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

(iii) Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

- 1) Buildings: 50 years
- 2) Building facilities: 3~5 years
- 3) Machinery and equipment: 2~20 years
- 4) Office and other equipment $: 2 \sim 20$ years
- 5) Leasehold improvement $: 2 \sim 10$ years

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(j) Lease

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contracts conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

(i) As a lessee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- there is a change in future lease payments arising from the change in an index or rate;
- there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee;
- there is a change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset;
- there is a change of its assessment on whether it will exercise an extension or termination option; or
- there is any lease modifications

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Company accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Company presents right-of-use assets that do not meet the definition of investment and lease liabilities as a separate line item respectively in the statement of financial position.

The Company has elected not to recognize right-of-use assets and lease liabilities for shortterm leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(k) Impairment of non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories, deferred tax assets and the assets arising on employee benefits) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount. Impairment losses are recognized in profit or loss.

An assessment is made at the end of each reporting period as to whether there is any indication that an impairment loss recognized in prior periods may no longer exist or may have decreased. If any such indication exists, the recoverable amount of that asset is estimated. An impairment loss recognized in prior periods for an asset is reversed if, and only if, there has been an improvement in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In this case, the carrying amount of the asset is increased to its recoverable amount by reversing an impairment loss.

(l) Provisions

A provision is recognized if, as a result of a past event, the Company has a present obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects the current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

(m) Revenue recognized

(i) Revenue from contracts with customers

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Company's main types of revenue are explained below.

The Company manufactures and sells electronic components to computer and automobile manufacturers. The Company recognizes revenue when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Company has objective evidence that all criteria for acceptance have been satisfied.

(ii) Financing components

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Company does not adjust any of the transaction prices for the time value of money.

- (n) Employee benefits
 - (i) Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided.

(ii) Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated separately for each the plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

(iii) Short term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(o) Share-based payment

The grant-date fair value of equity-settled share-based payment arrangements granted to employees is generally recognized as an expense, with a corresponding increase in equity, over the vesting period of the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognized is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

The fair value of the amount payable to employees in respect of share appreciation rights, which are settled in cash, is recognized as an expense with a corresponding increase in liabilities, over the period during which the employees become unconditionally entitled to payment. The liability is remeasured at each reporting date and at settlement date based on the fair value of the share appreciation rights. Any changes in the liability are recognized in profit or loss.

Grant date of a share-based payment award is the date which the Company and employees reach a consensus in the subscription price and number of shares.

(p) Income taxes

Income taxes comprise current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes shall be recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to the temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes shall not be recognized for the following exceptions:

- (i) Temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profits (losses) at the time of the transaction;
- (ii) Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- (iii) taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognized for the carry forward of unused tax losses, unused tax credits, and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized; such reductions are reversed when the probability of future taxable profits improves.

Deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reserve, using tax rates enacted or substantively enacted at the reporting date, and reflect uncertainty related to income taxes, if any.

Deferred tax assets and liabilities are offset if the following criteria are met:

- (i) the Company has a legally enforceable right to set off current tax assets against current tax liabilities; and
- (ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
 - 1) the same taxable entity; or
 - 2) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.
- (q) Earnings per share

The Company discloses the basic and diluted earnings per share attributable to ordinary shareholders of the Company. Basic earnings per share is calculated as the profit attributable to the ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding. Diluted earnings per share is calculated as the profit attributable to ordinary shareholders of the Company divided by the weighted average number of ordinary shares outstanding after adjustment for the effects of all potential dilutive ordinary shares. Such as employee bonuses not yet resolved by the shareholders.

(r) Operating segments

The Company discloses the operating segment information in the consolidated financial statements. Therefore, the Company does not disclose the operating segment information in the parent company only financial statements.

(s) Government grants

The Company recognizes an unconditional government grant in profit or loss as other income when the grant becomes receivable. Grants that compensate the Company for expenses or losses incurred are recognized in profit or loss on a systematic basis in the periods in which the expenses or losses are recognized.

For government grants related to depreciated assets, the Company recognized as the deduction of the assets if there is reasonable assurance that the grants will be received and the Company will comply with the conditions associated with the grant; and through the decrease in depreciation expenses, the grants are then recognized in profit or loss during the useful lives of the depreciated assets.

(5) Significant accounting assumptions and judgments, and major sources of estimation uncertainty:

The preparation of the parent company only financial statements in conformity with the Regulations requires management to make judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

The management continues to monitor the accounting estimates and assumptions. The management recognizes any changes in accounting estimates during the period and the impact of those changes in accounting estimates in the following period.

There are no critical judgments made in applying accounting policies that have any significant effects on the amounts recognized in the Company's financial statement.

Information about accounting assumptions and estimation uncertainties that have not a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year COVID-19 pandemic has not a significant influence on the Company.

The Company's accounting policies include measuring financial and non-financial assets and liabilities at fair value through profit or loss. The Company's financial division conducts independent verification on fair value by using data sources that are independent, reliable, and representative of exercise prices. This financial division also periodically adjusts valuation models, conducts back testing, renews input data for valuation models, and makes all other necessary fair value adjustments to assure the rationality of fair value.

The Company strives to use market observable inputs when measuring assets and liabilities. Different levels of the fair value hierarchy to be used in determining the fair value of financial instruments are as follows:

• Level 1: quoted prices (unadjusted) in active markets for identifiable assets or liabilities.

- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the assets or liability that are not based on observable market data.

For any transfer within the fair value hierarchy, the impact of the transfer is recognized on the reporting date. Please refer to Note 6(r) for assumptions used in measuring fair value.

(6) Explanation of significant accounts:

(a) Cash and cash equivalents

| | December 31, 2021 | | December 31, 2020 |
|---|----------------------|---------|----------------------|
| Cash, petty cash, check and demand deposits | \$ | 227,012 | 328,244 |

Please refer to note 6(r) for the exchange rate risk, interest rate risk, and sensitivity analysis of the financial assets and liabilities of the Company.

(b) Non-current financial assets at amortized cost

| | December 31, | December 31, |
|--------------------------|--------------|--------------|
| | 2021 | 2020 |
| Restricted bank deposits | \$ <u> </u> | 4,852 |

On December 5, 2019, the Company applied to IRS for the application of "The Management, Utilization and Taxation of Repatriated Offshore Funds Act". The application had been approved and the dividend had been remitted back to the parent subsequently. According to the Act, the funds need to be deposited in a special-purpose account for five years and 5% of the funds can be used without restriction, 25% can be used on financial investment, and 70%, at least, can be used for the project investment plan approved by the Ministry of Economic Affairs. Otherwise, the funds can only be redeemed within 3 consecutive year on average after five years maturity. The Company has applied to the Ministry of Economic Affairs for substantial investments and has obtained approval, that were expected to be used for plant expansion and capital expenditure.

For credit risk, please refer to note 6(r).

(c) Notes and Accounts receivable (include related parties)

| | Dec | December 31, 2021 | |
|--|-----|----------------------|---------|
| Notes receivable from operating activities | \$ | - | 1 |
| Accounts receivable | | 194,541 | 137,104 |
| Accounts receivable from related parties | | 159,777 | 130,784 |
| Less: Loss allowance | | (1,954) | (1,440) |
| | \$ | 352,364 | 266,449 |

The Company applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, notes and accounts receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward looking information, including macroeconomic and relevant industry information. The loss allowance provision for notes and accounts receivables was determined as follows:

| | | D | ecember 31, 202 | 1 |
|---|----------------|-------------------------|----------------------|-----------------------------|
| | | | Weighted- | |
| Notes and Accounts receivable -non-related parties | | ss carrying mount | average loss rate | Loss allowance provision |
| Current | \$ | 191,858 | 1% | 1,927 |
| Past due (days): | | | | |
| 0 to 60 | | 2,683 | 1% | 27 |
| | \$ | 194,541 | | 1,954 |
| | | D | ecember 31, 202 | 1 |
| | | | Weighted- | |
| Accounts receivable | | ss carrying | average loss | Loss allowance |
| -related parties | <u>a</u> \$ | <u>mount</u> 159,765 | <u>rate</u> | provision |
| | Φ | 139,703 | 070 | - |
| Past due (days): | | | | |
| 0 to 60 | | 12 | 0% | |
| | \$ | 159,777 | | |
| | | D | ecember 31, 2020 | 0 |
| | | | Weighted- | |
| Notes and accounts receivable | | ss carrying | average loss | Loss allowance |
| -non-related parties Current | <u>a</u> 8 | 135,972 | <u>rate</u> 1% | provision 1,429 |
| | Ф | 155,972 | 170 | 1,429 |
| Past due (days): | | | | |
| 0 to 60 | | 1,133 | 1% | 11 |
| | \$ | 137,105 | | 1,440 |
| | | D | ecember 31, 2020 | 0 |
| | C | | Weighted- | |
| Accounts receivable | | ss carrying | average loss | Loss allowance |
| -related parties | <u> </u> | <u>mount</u> 130,784 | <u>rate</u> | provision |
| Current | ወ | 130,/04 | 070 | - |

The movement in the allowance for notes and accounts receivable was as follows:

| | 1 | 2021 | 2020 |
|---------------------------------------|----|-------|-------|
| Balance on January 1, 2021 and 2020 | \$ | 1,440 | 857 |
| Impairment losses recognized | | 514 | 583 |
| Balance on December 31, 2021 and 2020 | \$ | 1,954 | 1,440 |

As of December 31, 2021 and 2020, the Company did not provide any notes and accounts receivable as collateral for its loans.

Please refer to note 6(r) for other credit risk.

(d) Inventories

| | December 31, 2021 | | December 31, 2020 | |
|--|----------------------|---------|----------------------|--|
| Raw materials and supplies | \$ | 40,357 | 20,852 | |
| Work in progress | | 47,375 | 33,719 | |
| Finished goods | | 146,652 | 55,859 | |
| | \$ | 234,384 | 110,430 | |
| The detail of the cost of sales were as follows: | | | | |
| | | 2021 | 2020 | |
| Inventory that has been sold | \$ | 943,550 | 786,869 | |
| Abnormal amounts of production cost of inventories | | 34,306 | 31,436 | |
| Write down of inventories | | 2,424 | 12,626 | |
| Inventory profit or losses and others | | 4,084 | 2,703 | |
| | \$ | 984,364 | 833,634 | |

As of December 31, 2021 and 2020, the Company did not provide any inventories as collateral for its loans.

(e) Investments accounted for using equity method

A summary of the Company's financial information for investments accounted for using the equity method at the reporting date is as follows:

| | Dec | cember 31, 2021 | December 31, 2020 |
|--|-----|--------------------|----------------------|
| Esteem King Limited (Esteem King) | \$ | 893,643 | 947,407 |
| Evolution Holdings Limited (Evolution) | | 9,202 | 9,582 |
| | \$ | 902,845 | 956,989 |

| | 2021 | 2020 |
|------------------------------|---------------|---------|
| Attributable to the Company: | | |
| Profit for the year | \$ 106,368 | 121,346 |

The Company recognized investment income based on subsidiaries' financial statements with same fiscal period that was audited by the Certified Public Accountant.

As of December 31, 2021 and 2020, the Company did not provide any investments accounted for using the equity method as collateral for its loans.

(f) Property, plant and equipment

The cost, depreciation, and impairment of the property, plant and equipment of the Company were as follows:

| | Land | Buildings | Machinery and equipment | Office and other equipment | Construction in progress and testing equipment | Total |
|------------------------------------|---------------|-----------|-------------------------------|----------------------------------|---|-----------|
| Cost or deemed cost: | | | | | | |
| Balance on January 1, 2021 | \$ 596,362 | 181,339 | 670,668 | 292,773 | 14,317 | 1,755,459 |
| Additions | - | - | 46,291 | 12,218 | 3,584 | 62,093 |

| Total | <u>\$</u> | 254,000 | 418,000 | |
| Range of interest rates | 0. | 90%~1.10% | 0.90%~1.33% | |

For the collateral for long-term borrowings, please refer to note 8.

Lease Liabilities (j)

The details were as follows:

| | | December 31, 2021 | December 31, 2020 |
|-------------|-----------|----------------------|----------------------|
| Current | <u>\$</u> | 114 | 283 |
| Non-current | \$ | 83 | 197 |

The amounts recognized in profit or loss were as follows:

| | 2 | 2021 | 2020 |
|--|----|-------|-------|
| Interest on lease liabilities | \$ | 4 | 10 |
| Expenses relating to short-term leases | \$ | 1,261 | 1,161 |

The amounts recognized in the statement of cash flows was as follows:

| | | 2021 | 2020 |
|-------------------------------|------------|-------|-------|
| Total cash outflow for leases | \$ <u></u> | 1,548 | 1,895 |

(i) Real estate and buildings leases

The Company leases buildings for its offices. The leases of them typically run for a period of 2 to 5 years. Some leases contain extension options exercisable up to the same period as original contract before the end of the contract period.

(ii) Other leases

The Company leases offices and transportation equipment, with lease terms of 2 to 5 years. Some leases contain extension options exercisable up to the same period as original contract before the end of the contract period.

These are short-term lease the Company leases staff dormitories and some lease, with lease terms within one year. The Company has elected not to recognize right-of-use assets and lease liabilities for these leases.

(k) Employee benefit

(i) Defined benefit plans

Reconciliation of defined benefit obligation at present value and plan asset at fair value are as follows:

| | December 31, | | December 31, | |
|--|--------------|----------|--------------|--|
| | | 2021 | 2020 | |
| Present value of the defined benefit obligations | \$ | (26,028) | (26,351) | |
| Fair value of plan assets | | 51,813 | 50,772 | |
| Net defined benefit assets | <u>\$</u> | 25,785 | 24,421 | |

The Company makes defined benefit plan contributions to the pension fund account with Bank of Taiwan that provides pensions for employees upon retirement. Plans (covered by the Labor Standards Law) entitle a retired employee to receive retirement benefits based on years of service and average monthly salary for the six months prior to retirement.

1) Composition of plan assets

The Company allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, Ministry of Labor. With regard to the utilization of the funds, minimum earnings shall be no less than the earnings attainable from two-year time deposits with interest rates offered by local banks.

The Company's Bank of Taiwan labor pension reserve account balance amounted to \$51,813 thousand as of December 31, 2021. For information on the utilization of the labor pension fund assets, including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labor.

2) Movements in present value of the defined benefit obligations

The movement in present value of the defined benefit obligations for the Company were as follows:

| | 2021 | 2020 |
|---|--------------|--------|
| Defined benefit obligations at January 1 | \$ 26,351 | 25,495 |
| Current service costs and interest cost | 147 | 253 |
| Remeasurements loss (gain): | | |
| Return on plan assets excluding interest income | 160 | (292) |
| -demographic assumptions | 994 | 149 |
| -financial assumptions | (1,209) | 746 |
| Benefits paid | (415) | - |
| Defined benefit obligations at December 31 | \$ 26,028 | 26,351 |

3) Movements of defined benefit plan assets

The movements in the present value of the defined benefit plan assets for the Company were as follows:

| | 2021 | 2020 |
|---|--------------|--------|
| Fair value of plan assets at January 1 | \$ 50,772 | 48,231 |
| Interest income | 179 | 389 |
| Remeasurements loss (gain): | | |
| -Return on plan assets excluding interest | | |
| income | 722 | 1,551 |
| Contributions paid by the employer | 555 | 601 |
| Benefits paid | (415) | - |
| Fair value of plan assets at December 31 | \$ 51,813 | 50,772 |

4) Expenses recognized in profit or loss

The expenses recognized in profit or loss for the Company were as follows:

| | 2 | 2021 | 2020 |
|--|----|------|-------|
| Current service costs | \$ | 55 | 49 |
| Net interest of net liabilities (assets) for defined benefit obligations and plan assets | | (87) | (185) |
| | \$ | (32) | (136) |
| Operating expense | \$ | (32) | (136) |

5) Actuarial assumptions

The principal actuarial assumptions at the reporting date were as follows:

| | December 31, 2021 | December 31, 2020 |
|-----------------------------|----------------------|-------------------|
| Discount rate | 0.750 % | 0.350 % |
| Future salary increase rate | 2.875 % | 2.875 % |

The expected allocation payment to be made by the Company to the defined benefit plans for the one-year period after the reporting date is \$555 thousand.

The weighted average lifetime of the defined benefits plans is 9 years.

6) Sensitivity analysis

If the actuarial assumptions had changed, the impact on the present value of the defined benefit obligation shall be as follows:

T (11)

. . .

. .

. .

| Influences of defined benefit plan assets | | | |
|---|--|--|--|
| Increased 0.5% | Decreased 0.5% | | |
| | | | |
| 756 | (795) | | |
| (756) | 726 | | |
| | | | |
| 834 | (879) | | |
| (830) | 796 | | |
| | Increased 0.5% 756 (756) 834 | | |

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown above. The method used in the sensitivity analysis is consistent with the calculation of pension liabilities in the balance sheets.

There is no change in the method and assumptions used in the preparation of sensitivity analysis for 2021 and 2020.

(ii) Defined contribution plans

The Company allocates 6% of each employee's monthly wages to the labor pension personal account at the Bureau of Labor Insurance in accordance with the provisions of the Labor Pension Act. Under these defined contribution plans, the Company allocates a fixed amount to the Bureau of Labor Insurance without additional legal or constructive obligation.

The pension costs incurred from the contributions to the Bureau of Labor Insurance amounted to \$12,601 thousands and \$10,679 thousands for the years ended December 31, 2021 and 2020, respectively.

(1) Income taxes

(i) The components of income tax in the years 2021 and 2020 were as follows:

| | 2021 | 2020 |
|--------------------|---------------|-------|
| Current tax | \$ (3,656) | 190 |
| Deferred tax | 14,350 | 2,853 |
| Income tax expense | \$ 10,694 | 3,043 |

(ii) The amount of income tax recognized directly in equity or Other Comprehensive Income for 2021 and 2020 was 0.

(iii) Reconciliation of income tax and profit before tax for 2021 and 2020 is as follows:

| | 2021 | 2020 |
|--|---------|---------|
| Profit excluding income tax \$ | 99,911 | 33,030 |
| Income tax using the Company's domestic tax rate | 19,982 | 6,606 |
| Change in provision in prior periods | 817 | 303 |
| None-deductible expenses | 115 | 190 |
| Tax incentives | (3,769) | - |
| Change in unrecognized temporary differences and other | (6,451) | (4,056) |
| \$ | 10,694 | 3,043 |

(iv) Deferred tax assets and liabilities

1) Unrecognized deferred tax liabilities

The Company's foreign subsidiaries have retained earnings, because of the demand of capital expenditures and working capital. The Company expects that some of these retained earnings will not be returned back to the Company in the foreseeable future under the consideration of Company's integral development and investment plan. Hence, the temporary differences are not recognized under deferred tax liabilities. As of December 31, 2021 and 2020, the unrecognized deferred tax liabilities amount was \$26,090 thousand, respectively.

2) Unrecognized deferred tax assets

| | December 31, 2021 | December 31, 2020 |
|--|-------------------|-------------------|
| The carry forward of unused tax losses | \$ <u> </u> | 6,451 |

The R.O.C. Income Tax Act and subsidiaries tax jurisdiction allows net losses, as assessed by the tax authorities, to offset taxable income over a period of ten years for local tax reporting purposes.

3) Recognized deferred tax assets and liabilities

Changes in the amount of deferred tax assets and liabilities for 2021 and 2020 were as follows:

| | | Gain on foreign investments under the equity method |
|----------------------------------|----|--|
| Deferred Tax Liabilities: | | |
| Balance at January 1, 2021 | \$ | 42,554 |
| Recognized in profit or loss | - | (3,722) |
| Balance at December 31, 2021 | \$ | 38,832 |
| Balance at January 1, 2020 | \$ | 18,285 |
| Recognized in profit or loss | _ | 24,269 |
| Balance at December 31, 2020 | \$ | 42,554 |

| | - | nrealized hange loss | Unused tax losses carry forwards | Allowance to reduce inventory | Others | Total |
|------------------------------|----|-------------------------|--|-------------------------------------|---------|----------|
| Deferred Tax Assets: | | | | | | |
| Balance at January 1, 2021 | \$ | (764) | (30,073) | (5,000) | (5,272) | (41,109) |
| Recognized in profit or loss | | 429 | 18,006 | 557 | (920) | 18,072 |
| Balance at December 31, 2021 | \$ | (335) | (12,067) | (4,443) | (6,192) | (23,037) |
| Balance at January 1, 2020 | \$ | (1,958) | (9,203) | (3,753) | (4,779) | (19,693) |
| Recognized in profit or loss | | 1,194 | (20,870) | (1,247) | (493) | (21,416) |
| Balance at December 31, 2020 | \$ | (764) | (30,073) | (5,000) | (5,272) | (41,109) |

(v) As of December 31, 2021, the information of the Company's tax losses are as follows:

| Year of loss | Unused tax loss | | Expiry date |
|--------------|-----------------|--------|-------------|
| 2020 (Filed) | \$ | 60,334 | 2030 |

(vi) Examination and Approval

The Company's tax returns for the years through 2019 were examined and approved by the Taipei National Tax Administration.

(m) Capital and other equity

As of December 31, 2021 and 2020, the total value of authorized ordinary shares both were amounted to \$1,000,000 thousand with par value of \$10 per share. As of that date, ordinary shares both were issued amounted to \$770,000 thousand.

(i) Capital surplus

The balances of capital surplus as of December 31, 2021 and 2020, were as follows:

| | December 2021 | | , December 31, 2020 | |
|------------------------|---------------|---------|------------------------|--|
| Share premium | \$ | 604,049 | 634,849 | |
| Reorganization | | 42,439 | 42,439 | |
| Employee share options | | 7,847 | 7,847 | |
| | \$ | 654,335 | 685,135 | |

According to the R.O.C. Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, capital increases by transferring capital surplus in excess of par value should not exceed 10% of the total common stock outstanding.

The general meeting of shareholders that held separately July 30, 2021 and May 15, 2020, decided to distribute capital surplus resulting from share premium as cash dividends amounted separately to \$30,800 thousand and \$19,250 thousand with \$0.40 per share and \$0.25 per share.

(ii) Retained earnings

The Company's Articles of Incorporation requires that after-tax earnings shall first be offset against any deficit, and 10% of the balance shall be set aside as legal reserve. The appropriation for legal reserve is discontinued when the balance of the legal reserve equals the total authorized capital. Aside from the aforesaid, the Company may, under its Articles of Incorporation or as required by the government, appropriate or reverse for special reserve. The remaining balance of the earnings, if any, may be appropriated according to a resolution of a shareholder's meeting.

In consideration of the shareholder's long-term benefit and stable operation, the Company adopts a stable dividends policy. Therefore, cash dividends should not be less than 30% of the aggregate dividends.

1) Legal reserve

When a company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

2) Special reserve

In accordance with Ruling No. 1010012865 issued by the FSC on April 6, 2012, a portion of current-period earnings and undistributed prior-period earnings shall be reclassified as special earnings reserve during earnings distribution. The amount to be reclassified should equal the current-period total net reduction of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be reclassified as special earnings reserve (and does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

3) Earnings distribution

Earnings distribution for 2020 and 2019 were decided via the general meeting of shareholders held on July 30, 2021 and May 15, 2020. The relevant dividend distributions to shareholders were as follows.

| | 20 | 20 | 2019 | |
|---|----------------|-----------------|---------------------|-----------------|
| | nount share | Total amount | Amount per share | Total amount |
| Dividends distributed to ordinary shareholders | | | | |
| Cash | \$ 0.15 | 11,550 | 0.10 | 7,700 |

Earnings distributions for 2020 and 2019 that decided by the general meeting of shareholders were not different from the resolution of board meeting. Related information would be available at the Market Observation Post System website.

(n) Earnings per share

(i) Basic earnings per share

The calculation of basic earnings per share at December 31, 2021 and 2020 were based on the profit attributable to ordinary shareholders of the Company and the weighted average number of ordinary shares outstanding, calculated as follows:

| | 2021 | 2020 | |
|---|--------------|--------|--|
| Basic earnings per share | | | |
| Profit attributable to ordinary shareholders of | | | |
| the Company | \$ 89,217 | 29,987 | |
| Weighted-average number of ordinary shares | | | |
| (thousand shares) | 77,000 | 77,000 | |
| Basic eanrings per share (dollar) | \$ 1.16 | 0.39 | |

(ii) Diluted earnings per share

The calculation of diluted earnings per share as of December 31, 2021 and 2020 were based on the profit attributable to ordinary shareholders of the Company and the weighted average number of ordinary shares outstanding after adjustment for the effects of all dilutive potential ordinary shares, calculated as follows:

| | 2021 | 2020 |
|--|------------------|--------|
| Diluted earnings per share: | | |
| Profit attributable to ordinary shareholders of the Company | \$ <u>89,217</u> | 29,987 |
| Weighted-average number of ordinary shares (diluted) (thousand shares) | 77,365 | 77,110 |
| Diluted earnings per share (dollar) | \$1.15 | 0.39 |

Weighted-average number of ordinary shares (diluted) (thousand shares):

| | 2021 | 2020 |
|--|--------|--------|
| Weighted-average number of ordinary shares (basic) (thousand shares) | 77,000 | 77,000 |
| Effect of dilutive potential ordinary shares: | | |
| Effect of employee share bonus | 365 | 110 |
| Weighted average number of ordinary shares (diluted) (thousand shares) | 77,365 | 77,110 |

(o) Revenue from contracts with customers

(i) Details of revenue

| | 2021 | 2020 |
|------------------------------|-----------------|---------|
| Primary geographical markets | | |
| Taiwan | 375,380 | 255,261 |
| Malaysia | \$ 331,655 | 361,542 |
| Thailand | 282,060 | 165,181 |
| China | 96,737 | 95,278 |
| Others | 58,927 | 80,620 |
| | \$ 1,144,759 | 957,882 |

(ii) Contract balances

| | De | cember 31, 2021 | December 31, 2020 | January 1, 2020 |
|--------------------------------|----|--------------------|----------------------|--------------------|
| Notes and accounts receivable | \$ | 354,318 | 267,889 | 238,159 |
| Less: allowance for impairment | | (1,954) | (1,440) | (857) |
| Total | \$ | 352,364 | 266,449 | 237,302 |

For details on notes and accounts receivable and allowance for impairment, please refer to note 6(c).

(p) Employee compensation and directors' and supervisors' remuneration

In accordance with the Articles of Incorporation the Company should contribute 3%~9% of the profit as employee compensation and less than 3% as directors' and supervisors' remuneration when there is profit for the year. However, if the Company has accumulated deficits, the profit should be reserved to offset the deficit.

The amount of remuneration of each director and supervisor and of compensation for employees entitled to receive the abovementioned employee compensation is approved by the Board of Directors. The recipients of shares and cash may include the employees of the Company's affiliated companies who meet certain conditions.

For the years ended December 31, 2021 and 2020, the Company estimated its employee remuneration amounting to \$9,991 thousand and \$3,303 thousand, directors' and supervisors' remuneration amounting to \$1,110 thousand and \$367 thousand, respectively. The estimated amounts mentioned above are calculated based on the net profit before tax, excluding the remuneration to employees, directors and supervisors of each period, multiplied by the percentage of remunerations were expensed under operating costs or operating expenses during 2021. Related information would be available at the Market Observation Post System website.

- (q) Non-operating income and expenses
 - (i) Other income

The details of other income were as follows:

| | 2021 | 2020 | |
|-----------------|--------------|-------|--|
| Rent income | \$ 3,262 | 3,171 | |
| Interest income | 60 | 455 | |
| Other income | 7,120 | 3,589 | |
| | \$ 10,442 | 7,215 | |

(ii) Other gains and losses

The details of other gains and losses were as follows:

| | | 2021 | 2020 |
|---|-----------|----------|----------|
| Foreign exchange gains (losses), net | \$ | (10,660) | (31,844) |
| Loss on non-financial assets impairment | | (3,360) | (961) |
| Losses on disposals of property, plant and equipmen | nt, | (324) | (361) |
| Others | | | (120) |
| | <u>\$</u> | (14,344) | (33,286) |

(r) Financial instruments

(i) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, which is derived primarily from the Company's accounts receivable.

1) Credit risk exposure

The maximum exposure to credit risk is mainly from carrying amount of financial assets. As of December 31, 2021 and 2020, the maximum amounts that exposed to credit risk were \$590,165 thousand and \$605,046 thousand, respectively. Since the Company's bank deposits are deposited in many different finance institutions with good credit rating. Therefore, there is no significant credit risk.

2) Concentration of credit risk

The concentration of credit risk is mainly affected by creditors' rating and the client's industry. As of December 31, 2021 and 2020, 91% and 95%, respectively, of the Company's accounts receivable were concentrated on top five sales clients.

- 3) Please refer to note 6(c) for the details of the accounts receivable aging and loss allowance.
- (ii) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company manages sufficient cash and cash equivalents so as to cope with its operations and mitigate the effects of fluctuations in cash flows. The Company's management supervises the banking facilities and ensures compliance with the terms of loan agreements.

The following table shows the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements.

| | | Carrying amount | Contractual cash flows | within 1 year | 1-2 years | 2-5 years | Over 5 years |
|--|-----------|--------------------|---------------------------|------------------|-----------|-----------|--------------|
| December 31, 2021 | | | | · · · · · | | | |
| Non-derivative financial liabilities | | | | | | | |
| Bank loans | \$ | 633,360 | 643,026 | 383,124 | 66,530 | 193,372 | - |
| Accounts payable (including related parties) | | 197,970 | 197,970 | 197,970 | - | - | - |
| Lease liabilities | | 197 | 199 | 115 | 60 | 24 | - |
| Other financial liabilities | | 167,519 | 167,519 | 167,519 | | - | |
| | <u>\$</u> | 999,046 | 1,008,714 | 748,728 | 66,590 | 193,396 | |
| December 31, 2020 | | | | | | | |
| Non-derivative financial liabilities | | | | | | | |
| Bank loans | \$ | 672,000 | 689,104 | 259,913 | 168,058 | 198,628 | 62,505 |
| Accounts payable (including related parties) | | 131,816 | 131,816 | 131,816 | - | - | - |
| Lease liabilities | | 480 | 486 | 287 | 115 | 84 | - |
| Other financial liabilities | | 155,854 | 155,854 | 155,854 | | | |
| | <u></u> | 960,150 | 977,260 | 547,870 | 168,173 | 198,712 | 62,505 |

The Company does not expect the cash flows included in the maturity analysis to occur significantly earlier or at significantly different amounts.

(iii) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices, will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

1) Exposure to foreign currency risk

The Company's significant exposure to foreign currency risk was as follows:

| | Dec | ember 31, 202 | 21 | December 31, 2020 | | |
|-----------------------|-------------------|------------------|---------|---------------------|------------------|---------|
| | oreign Irrency | Exchange rate | TWD | Foreign currency | Exchange rate | TWD |
| Financial assets | | | | | | |
| Monetary items | | | | | | |
| USD | \$ 13,164 | 27.68 | 364,370 | 10,903 | 28.48 | 310,513 |
| Financial liabilities | | | | | | |
| Monetary items | | | | | | |
| USD | 2,313 | 27.68 | 64,030 | 279 | 28.48 | 7,947 |

2) Sensitivity analysis

The Company's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, accounts receivable, and accounts payable that are denominated in foreign currency. A weakening or strengthening of 1% of the NTD against the abovementioned foreign currency as of 31 December, 2021 and 2020 would have decreased or increased the net profit before tax by \$3,003 thousand and \$3,026 thousand, respectively. The analysis assumes that all other variables remain constant. The analysis is performed on the same basis for 2020.

3) Foreign exchange gain and loss on monetary items

Since the Company has many kinds of functional currency, the information on foreign exchange gain (loss) on monetary items is disclosed by total amount. For years 2021 and 2020, foreign exchange gain (loss) (including realized and unrealized portions) amounted to \$10,660 thousand and \$31,844 thousand, respectively.

4) Interest rate analysis

Please refer to the notes on liquidity risk management for the interest rate exposure of the Company's financial assets and liabilities.

The following sensitivity analysis is based on the exposure to the interest rate risk of derivative and non-derivative financial instruments on the reporting date. Regarding assets with variable interest rates, the analysis is based on the assumption that the amount of assets outstanding at the reporting date was outstanding throughout the year. The rate of change is expressed as the interest rate increases or decreases a quarter-point when reporting to management internally, which also represents the Company management's assessment of the reasonably possible interest rate change.

If the interest rate had increased or decreased by a quarter-point, the Company's profit before income tax would have decreased or increased by \$475 thousand and \$373 thousand for the year ended 2021 and 2020 with all other variable factors remaining constant. This is mainly due to the changes in the Company's variable-interest-rate loans and deposits.

The Company's fixed-interest-rate financial liabilities are measured at amortized cost. The changes in market rate do not affect the Company's profit or loss on the reporting date. Therefore, the Company does not disclose the sensitivity analysis of the changes in fair value.

(iv) Fair value of financial instruments

The carrying amounts and fair value of the Company's financial assets and liabilities, including the information on fair value hierarchy are as follows; however, except as described in the following paragraphs, for financial instruments not measured at fair value whose carrying amount is reasonably close to the fair value disclosure of fair value information is not required:

| | December 31, 2021 | | | | | | | | |

1) Valuation techniques for financial instruments measured at fair value

The fair value of financial instruments traded in an active market is based on the quoted market price. The quotation announced by the stock exchange center or exchange center, might be regarded as the fair value of the listed equity securities which is traded in an active market.

If quoted price of a financial instrument can be obtained in time and often from exchanges, brokers, underwriters, industrial union, pricing institute, or authorities, and such price can reflect those actual trading and frequently happen in the market, then the financial instrument is considered to have quoted price in active market. If a financial instrument does not accord with the definition aforementioned, then it is considered to be without quoted price in active market. In general, market with low trading volume or high bid-ask spreads is an indication of non-active market.

The Company's valuation techniques and assumptions used for financial instruments measured at fair value are as follows:

- Measurements of fair value of financial instruments with an active market, such as listed company stock, beneficiary certificate etc., its fair value depends on the market quotation.
- Measurements of fair value of financial instruments without an active market are based on a valuation technique or quoted price from a competitor. Fair value measured by a valuation technique can be extrapolated from similar financial instruments, the discounted cash flow method, or other valuation technique including a model using observable market data at the reporting date.
- 2) There were no transfers between each fair value levels in 2021 and 2020.

- (s) Financial risk management
 - (i) Structure of risk management

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

- (ii) The Company have exposures to the following risks from its financial instruments:
 - 1) Credit risk
 - 2) Liquidity risk
 - 3) Market risk

The following likewise discusses the Company's objectives, policies and processes for measuring and managing the above mentioned risks. For more disclosures about the quantitative effects of these risks exposures, please refer to the respective notes 6(r) in the accompanying consolidated financial statements.

(t) Capital management

The Company's capital management policy is to ensure that it has sufficient and necessary financial resources to sustain its working capital, capital expenditures and debt refunding requirements within twelve months after the reporting date. And also considers the debt ratio to maintain investor, creditor and market confidence. The Company's capital management strategy is consistent with the prior year, and the debt ratio were 38% and 37% as of December 31, 2021 and 2020, respectively.

(u) Investing and financing activities not affecting current cash flow

The Company's investing and financing activities which did not affect the current cash flow in the years ended December 31, 2021 and 2020, were as follows:

(i) Adoption lease for right-of-use assets, please refer to note 6(g).

(ii) Reconciliation of liabilities arising from financing activities were as follows:

| | J | anuary 1, 2021 | Cash flows | Other | December 31, 2021 |
|---|---------|-------------------|------------|-------|----------------------|
| Long-term borrowings | \$ | 482,000 | (64,000) | - | 418,000 |
| Short-term borrowings | | 190,000 | 25,360 | - | 215,360 |
| Lease liabilities | | 480 | (283) | - | 197 |
| Total liabilities from financing activity | <u></u> | 672,480 | (38,923) | - | 633,557 |
| | J | anuary 1, 2020 | Cash flows | Other | December 31, 2020 |
| Long-term borrowings | \$ | 496,000 | (14,000) | - | 482,000 |
| Short-term borrowings | | 100,000 | 90,000 | - | 190,000 |
| Lease liabilities | | 1,106 | (724) | 98 | 480 |
| Total liabilities from financing activity | <u></u> | 597,106 | 75,276 | 98 | 672,480 |

(7) Related-party transactions:

(a) Names and relationship with related parties

| Name of related party | Relationship with the Company |
|---|--|
| Min Aik Technology Co., Ltd. (MAT) | The entity with significant influence over the Company |
| Min Aik Technology (M) Sdn. Bhd. (MAM) | Other related party (MAT's subsidiary) |
| MATC Technology (M) Sdn. Bhd. (MATC) | // |
| Min Aik Technology (Suzhou) Co., Ltd. (MAY) | // |
| Min Aik Automation (Suzhou) Co., Ltd. (MAA) | // |
| Evolution Holdings Limited. (Evolution) | Subsidiaries or indirect-holding subsidiaries |
| Esteem King Limited. (Esteem King) | // |
| MAP Plastics Pte. Ltd. (MAPP) | // |
| Amould Plastic Technologies (Suzhou) Co., Ltd. (AMO) | " |
| Key management personnel | The Company's major management personnel |

(b) Parent company and ultimate controlling company

The Company is the subsidiaries' parent company and the ultimate controlling party.

(c) Significant transactions with related parties

(i) Sales

The amounts of significant sales transactions and outstanding balances between the Company and related parties were as follows:

| | Sales | | Receivables from related partie | |
|---|---------------|---------|---------------------------------|----------------------|
| | 2021 | 2020 | December 31, 2021 | December 31, 2020 |
| Subsidiaries | \$ 146 | - | - | - |
| The entity with significant influence over the Company: | | | | |
| MAT | \$ 193,415 | 156,410 | 80,484 | 62,411 |
| Other related parties: | | | | |
| MAM | 267,875 | 307,758 | 79,293 | 68,369 |
| Others | 35 | 5 | | 4 |
| | \$ 461,471 | 464,173 | 159,777 | 130,784 |

The payment term of sales to related parties was O/A 75-120 days, which may be changed depending on the Company's operation. The payment term to non-related parties was normally about two to three months. The selling price to related parties was referred to the market price and negotiated by both parties.

(ii) Purchases

| | Transactio | n amount | Payables to related parties | | |
|--------------|----------------|----------|-----------------------------|--------------|--|
| | | | December 31, | December 31, | |
| | 2021 | 2020 | 2021 | 2020 | |
| Subsidiaries | \$ - | 3,824 | | | |

The Company purchased the machines from the subsidiary to satisfy sales demand in 2020. As of December 31, 2020, the Company has not recognized as Prepayments

(iii) Accepting services from and other accounts payable to related parties

| | Transaction amount | | | Other accounts p | |
|--|--------------------|--------|-------|----------------------|-------------------|
| | | 2021 | 2020 | December 31, 2021 | December 31, 2020 |

| Acquisition of property, plant and equipment | \$ | 19,475 | 8,241 |

(b) The guarantee notes issued by the Company for the line of credit and for the financing were as follows:

| | December 31, | December 31, |
|------------------------|---------------------|--------------|
| | 2021 | 2020 |
| Issued guarantee notes | \$ <u>1,042,880</u> | 965,680 |

(c) Please refer to note 7 for the Company provided an endorsements and guarantees for subsidiaries' bank loan.

(10) Losses Due to Major Disasters: None.

(11) Subsequent Events: None.

(12) Other:

A summary of current-period employee benefits, depreciation, and amortization, by function, is as follows:

| By function | | 2021 | | | 2020 | |
|----------------------------|-----------------|----------------------|---------|-----------------|----------------------|---------|
| By item | Cost of Sale | Operating Expense | Total | Cost of Sale | Operating Expense | Total |
| Employee benefits | | | | | | |
| Salary | 272,729 | 68,205 | 340,934 | 219,905 | 75,193 | 295,098 |
| Labor and health insurance | 28,979 | 5,480 | 34,459 | 21,559 | 6,131 | 27,690 |
| Pension | 9,913 | 2,656 | 12,569 | 7,379 | 3,164 | 10,543 |
| Remuneration of directors | - | 5,770 | 5,770 | - | 4,707 | 4,707 |
| Others | 10,093 | 3,949 | 14,042 | 8,231 | 3,314 | 11,545 |
| Depreciation | 44,774 | 8,531 | 53,305 | 42,898 | 11,795 | 54,693 |
| Amortization | 16,361 | - | 16,361 | 6,101 | - | 6,101 |

For the year ended 2021 and 2020, additional information about the number of employees and employee benefits are as follows:

| | 2021 | 2020 |
|---|------------|---------|
| Average number of employees | 532 | 486 |
| Number of directors, not in concurrent employment | 7 | 7 |
| Average employee benefits | \$ 766 | 720 |
| Average salaries | \$ 649 | 616 |
| Average salaries adjustments | 5.36 % | 16.89 % |
| Remuneration for supervisors | \$ | - |

The remuneration to the Company's employees and managers is mainly based on individual performance in addition to consideration to the human resources market, the salaries for those in similar industries, and the Company's salary and welfare policies. Directors' remuneration is mainly based on the value of individual's participation and contributions in the Company's operations.

Furthermore, the Company has established a remuneration committee to determine and regularly review the Company's directors and managers' annual and long term performance goals and remuneration policies, systems, standards and structures, as well as regularly evaluate the Company's directors and managers' performances. The salary and remuneration are set to ensure that the Company's salary and remuneration arrangements comply with relevant laws and regulations and are sufficient to attract outstanding talents.

All matters concerning the remuneration to directors and managers must be reported to the remuneration committee first, and then submitted to the board of directors for resolution before implementation.

(13) Other disclosures:
